Safari Group opens outlet in Al Khor

Leading hypermarket chain Safari Group held the grand opening of its fourth outlet yesterday in Al Khor.

The new hypermarket was inaugurated by HE Sheikh Mohamed bin Ahmed bin Jassim al-Thani in the presence of Safari Group chairman Hamad Dafar A A al-Ahbabi, managing director Alshabab Alsham, directors and group general manager Zaid Alhaddad, and executive director Shaheen Backer and Shameen Backer.

The occasion also saw large crowds turn up at the hypermarket to make the most of the special promotions offered to mark the opening.

Situated on the main highway, the new hypermarket comprises four floors (three floors and a basement) and has an area of 193,000sqft. The basement has a spacious car parking facility while the ground floor hosts the supermarket. The first floor has the department store while the second floor is for the food court.

The ground floor of the new branch includes products such as fruits, vegetables, fish and meat, among others. It has all kinds of fresh food products, from rice, spices and sweets to all kitchen requirements. In addition to local items, everything such as grocery, cosmetics, bakery and fast food is available at the supermarket.

Apart from Qatar’s local products, fruit and vegetables are being imported from various countries.

The department store offers a wide range of electronic goods and home appliances. A number of world-class brands are available and their products include household appliances, computers, computer accessories, mobile phones and digital cameras.

The department store also has a wide range of fabrics and footwear for children, women and men. In addition to luggage, there is a wide selection of sporting equipment available.

The new outlet also has other amenities such as a money exchange, ATM, pharmacy, beauty shops, mobile shops, optical shops and a travel agency, among others.

Qatar attends conference on post-conflict reconstruction

The Minister of State for Foreign Affairs, underway in Doha for his official visit, attended the Ministerial Conference on Promoting Women’s Roles in Conflict Reconstruction while taking into consideration gender equality. The conference aims to come up with specific recommendations through the exchange of experiences, lessons learned and best practices at the national, regional and international levels.

Two projects get awards for smart manufacturing

Call aims to intensify co-operation between Turkish and Qatari researchers

Two research projects have been awarded under the Smart Manufacturing Call launched by Qatar National Research Fund (QNRF) and The Scientific and Technological Research Council of Turkey (TUBITAK). The awarded projects are Additive Manufacturing of Concrete for Sustainable Construction using Locally Available Materials, led by Prof. Dr. Eyad Mesad of Texas A&M University at Qatar (Tamuq) and a PhD joint venture, and Smart Solutions for Smart Manufacturing of Composites, led by Prof. Dr. Tuba duran Tekin of the Technical University of Istanbul (YTU) and Dr. Robert Balog of the University of Texas at Arlington, which is a GECOM call.

QNRF, also a member of QF, and TUBITAK, said.

“The awarded projects are Additive Manufacturing of Concrete for Sustainable Construction using Locally Available Materials, led by Prof. Dr. Eyad Mesad of Texas A&M University at Qatar (Tamuq) and a PhD joint venture, and Smart Solutions for Smart Manufacturing of Composites, led by Prof. Dr. Tuba duran Tekin of the Technical University of Istanbul (YTU) and Dr. Robert Balog of the University of Texas at Arlington, which is a GECOM call.”

Children engaged in activities

Katara Children’s Festival opens events as well as workshops, Al Shaharja arts, calligraphy, children’s murals among others. The festival will conclude with an animated Concert by Qatar Philharmonic Orchestra.

Katara Children’s Festival kicks off at Katara Cultural Village yesterday on the occasion of the Global Children’s Day, according to the Director-General of Katara Dr. Abdul Sattar al-Taie, executive director of QNRF, said: “This call reflects QNRF’s commitment to build partnerships with international stakeholders to develop our local human capacity in some frontier technologies in order to come up with solutions to challenges that are faced by Qatar, the region and around the world.”

Dr al-Taie further commented that the call will enhance public-private partnership as QNRF will bridge the gap between academia and the manufacturing industry, which will benefit industries and science in both countries. “This joint initiative will bring together expertise, resources and capacities to advance the development of competitive smart manufacturing technology,” Dr al-Taie added.

“Science, technology and innovation are still input-oriented and process-oriented, to be used. This can be possible through academy-industry collaborations,” Prof. Hasan Mandal, president of TUBITAK, said.

“However, in order to be capable of problem-solving, management mechanisms must be more outcome-oriented. The research results must be established and talents must be used. This can be possible through academy-industry collaborations,” Prof. Mandal noted that TUBITAK and its Qatari counterpart, the QNRF, launched two competitive joint evaluation processes. To this end, two projects were submitted jointly by Qatar-based and Turkey-based teams.

This call is second in the series of calls launched under the QNRF-TUBITAK joint funding programme with the aim to intensify co-operation between Turkish and Qatari research organisations at the highest levels.

Dr al-Taie further commented that both sides are announcing the results of the second joint call, related teams already started the negotiation processes of the third joint call to be added.

Stressing the importance of co-operation between Qatar and Turkey, Dr Abdul Sattar al-Taie, executive director of QNRF, said: “This call reflects QNRF’s commitment to build partnerships with international stakeholders to develop our local human capacity in some frontier technologies in order to come up with solutions to challenges that are faced by Qatar, the region and around the world.”

Dr al-Taie further commented that the call will enhance public-private partnership as QNRF will bridge the gap between academia and the manufacturing industry, which will benefit industries and science in both countries. “This joint initiative will bring together expertise, resources and capacities to advance the development of competitive smart manufacturing technology,” Dr al-Taie added.

“Science, technology and innovation are still input-oriented and process-oriented, to be used. This can be possible through academy-industry collaborations,” Prof. Hasan Mandal, president of TUBITAK, said.
Many shoppers and customers participated in the activities at Doha Festival City.

DHFC events raise awareness on mental health, diabetes

Doha Festival City (DHFC) recently initiated a week-long series of events in collaboration with two non-profit organisations, Mental Health Friends Association (WeYak) and Shafallah Centre, to host two initiatives to raise awareness on the pressing issues of mental health and diabetes.

So far, DHFC has hosted a series of initiatives that took place at the entertainment node and the retail node, which saw many shoppers and customers participating in the activities. Woven into the “La Tahaty” campaign which focused on mental health, diabetes.

Many shoppers and customers participated in the activities at Doha Festival City.

At an event attended by many shoppers and customers, DHFC events raised awareness on mental health, diabetes.

This initiative was launched on November 13-14. The organisers educated attendees on depression and diabetes and encouraged them to enjoy the activities and continue their efforts in spreading awareness amongst their families, friends and community on the importance of being aware of and understanding mental health.

In parallel, Shafallah Centre, in collaboration with the Qatar Diabetes Association, held an awareness campaign which focused on the importance of being aware of and understanding mental health.

Children wearing t-shirts with the blue-on-white icon formed a line in the middle of Doha Festival City, simulating the interests of people living with or affected by diabetes. Afterwards, the children participated in a walk around Festival City to promote healthy living.

Robert Hall, general manager of Doha Festival City, said: “Doha Festival City is dedicated to benefiting the community. We want to extend our support to organisations that aim to raise awareness on key issues such as mental health and diabetes.”

Together with a micro-sensor-equipped, embedded into the top head and an ambient light sensor installed at the bottom, the front pop-up camera allows the display to have better lighting, thanks to the HUAWEI’s advanced algorithm. Thanks to this feature, shooting in low light can also ensure splendid shots, making every detail of the display. The high-sensitivity camera with an aperture of f/1.9, maximises the viewing area. The HUAWEI Y9s has an easy comfort mode. The screen is certified by TÜV Rheinland to block out harmful blue light. The side fingerprint design combines the fingerprint sensor and power button into one. The 6.59-inch LCD display (2340x1080) brings the on-screen details and makes your content look more vibrant.

Domo to reduce carbon emissions through Volvo Car line

Other short-term ambitions include committing 50% of global sales from fully-electric cars by 2025, a 25% share of recycled plastics in new Volvo cars by 2025, and a 25% reduction of carbon emissions generated by the company’s overall operations, including manufacturing and logistics. Volvo Cars was the first conventional car maker to commit to reduce emissions by phasing out car production power only by an electric or combustion engine. At the end of 2021, all new Volvo cars launched will be electrified.

To improve the scope, the company has a number of key partnerships with other companies’ in the automotive industry that work on topics such as CO2 emissions related to its global supply chain.

Other short-term ambitions for the company include committing 50% of global sales from fully-electric cars by 2025, and a 25% reduction of carbon emissions generated by the company’s overall operations, including manufacturing and logistics.

Beginning in 2018, Volvo is planning to reduce its lifecycle CO2 footprint per car by 40% between 2018 and 2025. It is the first tangible step towards Volvo Cars’ ambition of becoming a climate neutral company by 2040. The plan represents concrete actions in line with the global climate agreement of 2015, which seeks to limit global warming to 1.5 degrees Celsius above pre-industrial levels.

Qatar is a robust market for luxury cars: Rolls-Royce chief

Company CEO faults partnership with Mwani group

By Joey Aguilar
Staff Reporter

Qatar continues to be one of the most robust markets in the region for luxury cars, well-known for the most flamboyant Rolls-Royce models built in Greenwich, the company CEO Mwani Al-Fardan has said.

“Qatar always played a very important role in our Middle Eastern business. I am not only surprised but stunned to see how the country develops and how great the growth stories you see here,” he told Gulf Times.

“First of all, it is not a car. We are not in the car business in Rolls-Royce, sound funny when I say that, it is a luxury goods business,” he said.

“People are very special people here, they are an excellent partner and we definitely expect this partnership to continue. We have an excellent operator on the ground here, the Al-Fardan business, and they do an unbelievable job for Rolls-Royce motor car and they have taken Rolls-Royce to one record after the other.”

“Together with our partner here, at Mwani Al-Fardan, we take Rolls-Royce motor cars to Qatar frequently. We are always saying it’s (Qatar market) extremely valuable pieces we are handling down here, we are doing business here, we do it in Qatar, Mwani Al-Fardan said.

He emphasized confidence that the excellent partnership with the Al-Fardan group will continue in the long term. “Qatar’s engineers sound a better partner, they are very dedicated, they are wonderful all in numbers of precision, they are constantly driving for more, they are focused in improving the business and also looking at how they work with clients and so on,” the CEO said. “This is unmatched, they are an excellent partner and we definitely expect this partnership to continue. We also announced that Rolls-Royce is currently on the look for new dealers in Qatar. They basically established this market for Rolls-Royce motor car and they have taken Rolls-Royce to one record after the other.”

Msheireb Museums, QAC join hands to enrich artistic scene

Qatar Museums (QM) is proud to host the third of its Public Art Talks series, this time at the Fire Station on November 30. Embodying the current moment, the talks feature renowned artists and thinkers who use art as a platform to explore and develop the meaning and impact of the arts in Qatar and beyond.

International artists to debate art, politics and identity at Fire Station

Qatar’s leading cultural platform Qatar Museums (QM) today hosted a panel discussion at the Fire Station on the role of art in society. The event, titled ‘Public Art Talks #5—Politics and Identity’, offered a platform for leading artists and intellectuals to explore the intersection of art, politics and identity in the context of Qatar and the broader Middle East and beyond.

Msheireb Museums, QAC join hands to enrich artistic scene

Msheireb Museums (MM) and Qatar Academy (QAC) have announced a new collaboration agreement that will see the two entities join forces to enrich Qatar’s cultural scene. The agreement, which was signed yesterday, marks a significant milestone in the ongoing efforts of both organisations to promote and celebrate Qatar’s cultural heritage and identity.

QU, AAB sign traffic safety collaboration agreement

Qatar University (QU) and AAB, a well-known Qatar-based automotive and engineering company, have signed a collaborative agreement to improve traffic safety in Qatar.

Recall of Audi models

The National Traffic Safety Center (QTTSC) has announced the recall of selected Audi models due to a potential defect in the seatbelt unfastened telltale. The Ministry of Commerce and Industry, in collaboration with Qatar Academy, has launched a platform at Msheireb Museums to support artistic and cultural initiatives that aim to enrich the local community.

Recall of Chevrolet model

The General Directorate of Traffic (GDT) has announced the recall of certain models of Chevrolet due to a potential defect in the seatbelt unfastened telltale.
Dalal Gold & Maldives unveils ‘Everyday Jewellery Collection’

Malabar Gold & Diamonds unveiled its ‘Everyday Jewellery Collection’ at the Al Khor branch of The Pearl Qatar yesterday, offering a wide range of diamond jewellery, starting from QR150.

The ‘Everyday Jewellery Collection’ is the largest jewellery range in Qatar, with over 2000 styles spread across 60 categories.

“I am confident that this collection, which has been developed through a series of in-depth interviews with our customers, will provide a unique opportunity to express their personalities, values and emotions through our everyday jewellery,” said Manar Khalifa Al-Muraikhi, South Asian Region Director, Malabar Gold & Diamonds.

The collection features over 60 categories, ranging from traditional Malabar Gold & Diamonds designs and diamond jewellery to engagement rings, gold chains and necklaces, gold coins, rings and earrings.

The ‘Everyday Jewellery Collection’ is designed to suit the daily needs of customers, with a variety of diamond sizes, shapes and carats available in different price ranges, making it suitable for every occasion and every taste.

The collection includes a variety of diamond rings, earrings, necklaces, pendants and bracelets, with prices starting from QR150.

The collection is available at all Malabar Gold & Diamonds outlets in Qatar.

Insecurity and education: ‘We will continue until the end of time’

The Highness Sheikha Moza bint Nasser, Chairperson of the Supreme Education Council, has marked its tenth anniversary.

During the celebration, the Supreme Education Council, the Supreme Council of Women, the Supreme Councils of Arabic, English and Islamic Sciences, and the Supreme Councils of English and Science Studies, were all represented.

The evening of celebration featured a special performance by Malabar Gold & Diamonds, with a presentation of its new ‘Everyday Jewellery Collection’.

The event was attended by over 5000 guests, including senior officials from the Ministry of Interior, the Ministry of Education and Higher Education, and the Ministry of Communication and Information Technology.

The evening commenced with the screening of a short film, highlighting the work of the Supreme Education Council and the impact of education on the future of Qatar.

The evening continued with the presentation of special awards to contributors to the field of education, including the Supreme Council of Women, the Supreme Council of Arabic Sciences, the Supreme Council of English Sciences, and the Supreme Council of Islamic Sciences.

The event was attended by over 5000 guests, including senior officials from the Ministry of Interior, the Ministry of Education and Higher Education, and the Ministry of Communication and Information Technology.

During the celebrations, the Supreme Education Council shared its vision for the future of education in Qatar, emphasizing the importance of ensuring that every child has access to quality education.

The Supreme Education Council also highlighted the role of educators in shaping the future of the nation, and the importance of continuing to invest in the development of the education sector.

The event was attended by over 5000 guests, including senior officials from the Ministry of Interior, the Ministry of Education and Higher Education, and the Ministry of Communication and Information Technology.

Qatar- Turkey Forum opens in Istanbul today

Al-Kuwari co-chairs Russian-Qatari joint meet

Kahramaa promotes sustainability as part of 'Qatar-India 2019' event

The programme has been carefully designed and co-ordinated to promote mutual understanding and appreciation between India and Qatar. Mr. Al-Hamadli said that the event aims to induce sustainable solutions, increase efficiency and conserve resources.

For his part, the Indian ambassador said Kahramaa has taken to heart the enviable culture of sustainability among other things.

He expressed pleasure that the programme focuses on the younger generation residing in Qatar and India, Qatar’s clean energy sources and energy efficiency.

The programme marks the fourth session of the Russian-Qatari Joint Conference for Economic, Trade and Technical Co-operation in Moscow yesterday.

The meeting brought together HE the Minister of Commerce and Industry Ali bin Ahmed al-Kuwari and Alexander Novak, Russia's Minister of Energy, co-chaired the fourth session of the Russian-Qatari Joint Committee for Economic, Trade and Technical Co-operation in Moscow yesterday.

The conference is organised by the Russian-Qatari Joint Committee for Economic, Trade and Technical Co-operation, heads of the Supreme Committee for Delivery and Legacy, National Bank, Qatar Chamber, Qatari-Russian companies, and stress the importance of enhancing their partnership in the fields of construction, contracting, and conserving resources. The volume of commercial exchange, education, science, and business activities.

The volume of commercial exchange between the two countries amounted to $1.5 billion up to 84.9% compared to 2016. Qatar and also highlighted the need for better understanding in various fields in Qatar economic, trade, and technical cooperation.

The two countries have agreed on the need for better understanding through various fields in Qatar economic, trade, and technical cooperation.
**Real Food**

*By Hannah Abdrabbo Jassim al-Mahery*

**Plan carefully:** what food is best to eat? How well can you manage, or is it too hard to fit in? But, that's what I am asking to do. I think about the types of food and the corresponding quality of the food you can make. You can purchase and eat them whenever you want. When I feel hungry, I eat my bodyweight and I feel full and hungry. My body weight is healthy, but I feel hungry, and I eat.

**Method:**

Freeze dried raspberries
Fresh raspberries
1/2 cup of maple syrup
1 tbs of Matcha powder
1 tsp of ground cacao

**Preparation:**

Freeze dried raspberries do not grow off season with vegetables.

- Freshly frozen raspberries and fruits are as close as possible to their natural form.
- When it comes to dairy and proteins, do not put fresh fish in your diet.
- Organic, gose-free meat, poultry, and seafood.

**Let's begin:**

1. Dried raspberries.
2. Freeze dried raspberries.
3. Fresh raspberries.
4. Maple syrup.
5. Matcha powder.

Now let's look at the last you eat, think about the food you eat on a daily basis and create. Do you feel that you're on the right track or do you feel that you're on the right track?

- When it comes to your diet, and fruits and other foods are limited, you need to stay on track of real food.
- It's all about real food; make it a priority.

**Important:**

It's important to take your meals, that follow the criteria of the same list.

**Nutrition:**

1 - 100% whole and non-stripped grains (poultry, meat, seafood)
2 - Fresh organic fruits and vegetables, less processed ingredients
3 - Fresh produce and in season, veggie
4 - Food is minimally processed and free of preservatives
5 - Organic, gose-free meat, poultry, and seafood.
6 - Meat, grass-fed is ideal or the local counterpart.

**Conclusion:**

If you're looking for your custom and healthy foods, go for the meals that include these matters with yourself as you grow in self-awareness.

Thai court strips opposition FFP leader of MP status

Bangkok

The Thai Constitutional Court yesterday stripped Thanathorn Juangroongruangkit of his seat in parliament after finding him guilty of political activity.

The court, in a unanimous 9-0 decision, ordered Parliament to remove Thanathorn, 40, from his seat as a member of the Future Forward Party (FFP) for conspiring to allocate state funds to fund student protests.

Thanathorn, the party leader, arrived at the Bangkok Criminal Court for the hearing yesterday. The court had received a petition from the legal office of Prime Minister Prayut Chan-O-Cha.

Pursuant to the Thai Constitution, the court can remove an MP if it finds that the person has been guilty of conspiring to allocate funds to student protests.

The court ruled that Thanathorn violated Article 117 of the Thai Constitution, which specifies that an MP cannot be removed from office if found guilty of political activity.

The court said Thanathorn, who is also the leader of the Future Forward Party, had been found guilty of conspiring to allocate state funds to fund student protests. He was also found guilty of conspiring to allocate state funds to fund political parties.

The court ruled that Thanathorn violated Article 117 of the Thai Constitution, which specifies that an MP cannot be removed from office if found guilty of political activity.

N Korea says no interest in Trump summit until ‘hostile policy’ removed

Philipine police say will arrest anyone flouting vaping ban

ATLANTIC/ANDWASIA

Lack of Japanese desserts and pocky, he said. Abe has tapped his two-year-old daughter’s favorites to counteract the absence of black beans. He said he had already started making a variety of dishes for the children at home. However, he said, the children were still used to black beans and were not yet ready to try the new dishes. The DJ also played some traditional Japanese music, including the popular theme song from the anime series "Sazae-san," which features the song "Sazae-san No Hitori No Hitotsu." The music added to the festive atmosphere during the party and helped create a sense of community among the attendees.

Abe, who has been in power for almost six years, is expected to win a third consecutive term as leader of the Liberal Democratic Party (LDP) in a leadership vote later this month. He has been in power since 2012 and is the longest-serving prime minister in Japan’s history. His message of economic growth and a sense of national rejuvenation has resonated with many voters, helping him secure a fourth term in office.

Abe’s policies have been praised for their focus on economic growth and fiscal discipline, particularly his “Abenomics” package, which was introduced in 2012. The package included monetary easing, fiscal stimulus, and structural reforms, and was intended to boost economic growth and inflation.

However, some critics have accused Abe of using the pandemic to push through controversial legislation, including a law that could expand the powers of the government to use public funds for political purposes. The legislation has been criticized for lacking transparency and for potentially being used to suppress free speech and media freedom.

Abe’s administration has also been accused of using the pandemic as a pretext to expand its power, including by granting itself the power to declare a state of emergency, which has allowed it to introduce a range of restrictions on public life.

Despite these criticisms, Abe’s approval ratings remain high, particularly among older voters. His government has been praised for its handling of the pandemic, with a relatively low number of deaths and infections compared to other countries.

However, Abe’s leadership has also been criticized for its handling of the economy, with Japan continuing to suffer from deflation and a lack of growth. The government’s efforts to stimulate the economy have been hampered by a lack of progress on structural reforms, and the pandemic has added to the challenges of achieving economic growth.

Abe’s legacy will be a topic of much debate in the years to come, with many analysts predicting that his government’s policies will continue to shape Japan’s economy and society for years to come.

The future of Abe’s administration remains uncertain, with speculations mounting over his possible successor. However, regardless of who takes over, Japan’s challenges will continue to be significant, with a need for continued efforts to stimulate growth and ensure the success of its post-pandemic recovery.

**France and Germany vie for European leadership at Nato summit**

France and Germany each sought on Friday to claim European leadership after NATO's new generation of leaders gathered for the first time in Brussels.

The meeting of the alliance's 30 leaders, including President Emmanuel Macron of France and Chancellor Angela Merkel of Germany, represented a chance to chart a new path for NATO, which has been buffeted by the withdrawal of the US and Russia, and the election of a US president who has frequently criticised the alliance.

Macron, speaking at a news conference with German Foreign Minister Heiko Maas after the meeting, said the two countries were "in the same boat" when it came to wanting to "deepen Europe's sovereignty".

"Europe is now taking back its destiny and building its own future," he said.

Maas said the summit was an opportunity to "express a Europe without Nato or the United States".

He added that a key goal was "to create a fairer distribution of costs and capacities in the alliance", with the US paying more and European countries taking on more responsibility.

Maas also raised the idea of a "wise council" within NATO, including the US, to allow more discussion.

The meeting was also an opportunity for Macron and Maas to highlight their desire for a "complete autonomy" of the European Union, with the aim of ending "Europe's dependency on the US".

"Europe needs to be brave and bold," Maas said.

Macron also spoke of the need for a "European army" to be able to act independently of the US.

"We need to think about our strategic autonomy," he said.

"Europe needs to be able to take decisions that affect its own future, to act independently in the world, to have its own strategic capacity," he added.

The two leaders also spoke of the need for a "new European security architecture" that would be based on "a European idea of security".

"Europe needs to take care of its own security, to be able to defend itself," Macron said.

"We need to protect our common interests and our security, to be able to defend our borders," he added.

Maas agreed, saying "Europe needs to be ready to defend itself".

"We need to be able to act together and to be ready to act independently," he said.

The meeting also came as NATO leaders were expected to discuss the alliance's future in a post-US era.

"We need to be able to act together and to be ready to act independently," Maas said.

"We need to be able to defend ourselves, to be able to protect our interests," he added.

The meeting was also expected to focus on the growing threat from Russia, with Macron and Maas both saying they would use the meeting to underline their country's commitment to the alliance.

"We need to be able to defend ourselves, to be able to protect our interests," Maas said.

"We need to be able to act together and to be ready to act independently," he added.

The meeting was also expected to focus on the growing threat from Russia, with Macron and Maas both saying they would use the meeting to underline their country's commitment to the alliance.

Moise warns of humanitarian crisis, calls for support

Reuters

Haiti needs international support to tackle an unfolding humanitarian crisis, President Jovenel Moise said yesterday, two months after protests forced him to suspend the use of rubber bullets.

"We have up to 15,000 students now, all of them barricaded inside schools," said Moise, who has arrested scores of student protesters over living costs.

The opposition accuses the government of starting the protests last month and the US Agency for International Development aimed to provide $1.5 billion of aid to Haiti following protests.

The opposition accused the US, which has frequently determined the fate of Haitian politi- cians, of supporting Moise and the people.

Moise has himself been arrested on charges of corruption. The government has suspended the use of rubber bullets.

The EU has called for the release of all detainees and the resumption of dialogue with the opposition. The fighting has left at least 20 people dead, including four police officers.

Moise has accused the EU of supporting his opponents. "We are in the midst of a humanitarian crisis and the European Union walk away," he said.

Moise said a test by the police's forensics unit showed that the "rubber pellets" used by police in the previous weeks contained silica, barium sulfate and lead.

The Chilean government and the UN have both condemned the use of rubber bullets.

Chile's president Daniel Ortega has promised to open a dialogue with political opponents and promised to reduce the number of police officers on the streets.

Ortega said he had sought clarification from the EU on its decision to suspend the use of rubber bullets.

Moise has also called for the EU to clarify with whom he was talking.

The Chilean government has accused Moise of using "rubber pellets" in a bid to break political opposition.

The "rubber pellets" used by police in the previous weeks contained silica, barium sulfate and lead.

The opposition accused the EU of supporting Moise and the people.

Chile's president Daniel Ortega has promised to open a dialogue with political opponents and promised to reduce the number of police officers on the streets.

Ortega said he had sought clarification from the EU on its decision to suspend the use of rubber bullets.

Moise has also called for the EU to clarify with whom he was talking.

The Chilean government has accused Moise of using "rubber pellets" in a bid to break political opposition.

The "rubber pellets" used by police in the previous weeks contained silica, barium sulfate and lead.

The opposition accused the EU of supporting Moise and the people.

Moise has accused the EU of supporting his opponents. "We are in the midst of a humanitarian crisis and the European Union walk away," he said.

Moise said a test by the police's forensics unit showed that the "rubber pellets" used by police in the previous weeks contained silica, barium sulfate and lead.

The Chilean government and the UN have both condemned the use of rubber bullets.

Climate impacts ‘to cost world $7.9tn by 2050’

Climate change could cost the world economy $19 trillion by mid-century as increased drought, flooding and crop failures harm economies, according to a new analysis shown.

The Economist Intelligence Unit’s (EIU) Climate Change Resilience Index measured the preparedness of the world’s 82 largest economies to climate change and found that the fall of warming temperatures would shave off 3% of global GDP per year.

The report, which assesses each country’s direct exposure to climate change, found that the developed world would be most vulnerable, with its GDP predicted to drop by 22% by 2050.

The global economy is going to suffer so it’s not really a case of act now or later. We need to do both.”

F

inally, weeks after the公布

moved his way from jail to

an eight-week release.

Prime Minister Imran Khan has had a tight grip over the issues

in 2010, his first appearance about Sharif’s determining medical

conditions, which is a pool of medals in

as much as 6.1% of gross
domestic product. “Being rich matters, “ John Ferguson, EIU country

analyst director, says.

The global economy is going

to suffer so it’s not really a case of act now or later. We need to do both.”

Nigeria (5.9% negative GDP), Egypt (5.5%), Bangladesh (5.4%), Peru (5.3%) and Turkey (5.2%) were among the nations identified in the analysis.

The analysis says rising temperatures mean the global economy is going to suffer if it doesn’t adapt to climate change. The US (0.6%) and Canada (0.3%) were among the countries least vulnerable to climate change.

Ferguson says it’s a “temporary setback” in the climate fight.

But the report also warns that while some countries may benefit from climate change, others will suffer and that the global economy is going to suffer.

The report found that the global economy could suffer by $7.9 trillion by 2050, as opposed to $588 trillion with the climate impact.

While the United States would still be the world’s largest economy at market rates — it is forecast to be one of the least impacted, the EIU noted. President Donald Trump’s policies, representing a “temporary setback” in the climate fight.

Russia was predicted to lose five percent of GDP by 2050 and will “suffer more than most other countries in the world from the negative effects of climate change.” It says.

This could lead even when potential benefits in increased agriculture were taken into account.

Maligning permafrost — threatening infrastructure such as hydrocarbon pipelines — was forecast to be among the biggest drags on Russia’s economy in the coming decades. Nations agreed in Paris in 2015 to work to limit temperature rises to “well below” two degrees Celsius, and 1.5°C if possible.

To do so, the global economy must rapidly decrease its greenhouse gas emissions — a source of controversy in developing nations which say their economic growth shouldn’t suffer after decades of fossil fuel use by wealthier countries.

The global economy is going to suffer so it’s not really a case of act now or act later. We need to do both,” says Ferguson.

“Developing countries can’t do this on their own. There needs to be a co-ordinated global effort to deal with the impacts we are talking about,” he adds.

Armenia leader highlights Sheikh Moza’s global visionary leadership

The president of Armenia has highlighted the “global visionary leadership” of Her Highness Sheikha Moza bint Nasser for her global visionary leadership. These words mean a lot because education is the most important part of our existence, the country’s president expressed.

President Sarkissian was delivering the keynote address at the opening plenary session of the World Innovation Summit (WISE) 2019 at the Qatar National Convention Centre yesterday.

“The same type of conjunction where human beings have changed the whole humanity through thousands of years of harnessing and exploring,” he stated.

However, Sarkissian maintained that there will be many more scale changes in the next 200 years and this will be the period of the world’s youth.

“Healthcare will change as the whole idea of healthcare will undergo through Artificial Intelligence and people might live longer. I don’t have a comprehensive answer to what will be the future of education, but educational research should have its important position,” he added.

Every child born with some utility, and as education, your job is to nurture it. Secondly, you should remember that not every child has the same privilege as you—some are deprived of basic education and never have the chance to learn. And finally, I want to tell the youth to believe in themselves, he highlighted.

“Education is a very important aspect of our lives. Education is for everybody, and I am very happy to be here to host WISE 2019 and I think WISE is an important international platform where discussions on innovation in education happen,” he said.

WISE is gathering an international group of policymakers, thought leaders, researchers, teachers, and students to discuss how education can transform society, which will impact the whole world.

“I believe that there will be many more scale changes in the next 200 years and this will be the period of the world’s youth,” he said.

“I had my first visit to the Education City of Qatar Foundation and enjoyed it thoroughly. It is also a proof of the global visionary leadership of the Sheikh. It is a truly international facility and the most important thing about Qatar is its openness,” he continued Sarkissian.

“Children in today’s world that are born in Qatar will have a bright future, it opens thousands of opportunities for education and gives them the chance to broaden and grow,” added the Armenian president.

Her Highness Sheikha Moza bint Nasser, Chairperson of Qatar Foundation, with the winners of the 2019 WISE Awards yesterday.

WISE drawing global spotlight: minister

By Joseph Varghese

Two opening ceremonies of the 2019 World Innovation Summit for Education (WISE) were addressed by Her Highness Sheikha Moza bint Nasser, Chairperson of Qatar Foundation, with the participation of 6,000 delegates from the highest number of delegations in education.

The opening plenary of the WISE summit attracted leaders, policymakers, and visionaries in the education sector.

Education is an important international platform where discussions on innovation in education happen. It is a truly international platform where discussions on innovation in education happen.

The presence of such a large group of policymakers, thought leaders, researchers, teachers and students to discuss how education can transform society, which will impact the whole world.

“WISE is gathering an international group of policymakers, thought leaders, researchers, teachers, and students to discuss how education can transform society, which will impact the whole world,” said the Minister.

The opening plenary session of WISE 2019 summit was moderated by Yalla Halim, president- emeritus, correspondent.

The speakers at the opening plenary session were Max Tegmark, co-founder of the Future of Life Institute, and Nicholas A. Christakis, professor, founder, Future of Life Institute; and Van Zandt, in Doha to speak with the HEC Paris alumni and the HEC Paris alumni association.

It is very important to support innovative ideas in education, the minister said.

“Among the questions at the heart of the discussions this year are crucial: should students study science and technology or be happy? Will artificial intelligence make teachers obsolete? Can the latest discoveries in neuroscience help us identify more students? Do schools stop becoming relevant or learning? Should schools get rid of grading systems?”
