Amir inaugurates 24th Arabian Gulf Cup, welcomes everyone to ‘everyone’s Doha’
Amir sends cable of congratulations to Romanian leader

His Highness the Amir Sheikh Tamim bin Hamad al-Thani and His Highness the Deputy Amir Sheikh Abdullah bin Hamad al-Thani yesterday sent cables of congratulations to Klaus Iohannis on the occasion of his re-election.

Qatar participates in 31st session of IMO assembly

Qatar participated in the 31st session of the Ordinary General Assembly of the International Maritime Organisation (IMO). Qatar was represented at the session by HE Qatar’s ambassador to the United Kingdom Yousef bin Ali al-Khater.

In his speech, the ambassador pointed out the steps that Qatar is taking towards protecting the marine environment and its commitment to implement the goals that the IMO.

President of Palestine Mahmoud Abbas arrived in Doha yesterday on a work visit to Qatar. The Palestinian president and his accompanying delegation were welcomed upon arrival at Hamad International Airport by HE the Minister of State for Foreign Affairs Sheikh Hamad bin Jabor al-Thani, and the Palestinian ambassador to Qatar Munir Abdullah Ghanam.

HE the Minister of Administrative Development, Labour and Social Affairs Tareq bin Muhammad al-Attiyah yesterday met the Secretary-General of the Ministry of Labour in Jordan Fawzi al-Hedhali and his accompanying delegation who are visiting Qatar. During the meeting, they reviewed aspects of co-operation, especially on issues related to job opportunities and employment, and ways to support and develop them.

Food security is top priority, says minister

HE the Minister of Municipality and Environment Abdullah bin Abdulaziz bin Turki al-Subaie said Qatar considers food security a top priority, given it is one of the most important issues.

The Minister was speaking at the opening ceremony of the second annual Conference on Food Security by Al Arab. Food security has many aspects; as it is interwoven to both the agricultural and the industrial sector. Qatar’s strategy will focus on producing items in which the country has a comparative advantage. Such items include fresh produce, dairy, dates, red meat, poultry, eggs, and fish. The other element of the strategy is to build a strategic stock of the most crucial products that are not produced locally, most important of which is wheat, sugar, rice, and cooking oil.

HE al-Subaie addressing the Conference on Food Security. Left: Al Arab executive director general. PICTURES: Jayaram

He said that holding a second edition of the conference reflects the commitment of everyone in Qatar to the country’s food security.

He also highlighted projects related to the private sector, in accordance to the directives of HE the Prime Minister and Minister of Interior. Some of the projects include producing vegetables in greenhouses, age forest, fish and shrimp farms in addition to others that support livestock such as fodder and organic fertiliser.

These projects will help achieve self-sufficiency from high-quality agricultural products, and to build up a strategic stock with cheap prices. Another main goal is to reach optimum levels of production that would reflect on the growth of the agricultural sector.

The Minister noted that Qatar has made great progress over the past two years when it comes to increasing the level of self-sufficiency in agricultural products, and he looked forward to further co-operation with the private sector in terms of policies and development projects, and to take the appropriate measures to protect and use natural resources.

HE al-Subaie thanked HE the Prime Minister and Minister of Interior for his unlimited support with regard to the food security plans, and thanked members of the food security committee for their efforts in that regard.

Labour minister meets Jordan official

HE the Minister of Administrative Development, Labour and Social Affairs Tareq bin Muhammad al-Attiyah yesterday met the Secretary-General of the Ministry of Labour in Jordan Fawzi al-Hedhali and his accompanying delegation who are visiting Qatar. During the meeting, they reviewed aspects of co-operation, especially on issues related to job opportunities and employment, and ways to support and develop them.

President of Palestine Mahmoud Abbas arrived in Doha yesterday on a work visit to Qatar. The Palestinian president and his accompanying delegation were welcomed upon arrival at Hamad International Airport by HE the Minister of State for Foreign Affairs Sheikh Hamad bin Jabor al-Thani, and the Palestinian ambassador to Qatar Munir Abdullah Ghanam.
Qatar calls for nuclear arms-free Middle East

Qatar calls for nuclear arms-free Middle East

**QNA**

Qatar stressed yesterday that regional and international tensions in the world and the irresponsible calls from some parties to launch a new international arms race require a strengthening of disarmament and non-proliferation efforts, including action to implement the 1995 Treaty on the Non-Proliferation of Nuclear Weapons (NPT) Review and Extension Conference.

HE Sultan bin Salmeen al-Mansouri, Permanent Representative of Qatar to the United Nations in Vienna, said in a statement to the Board of Governors at the International Atomic Energy Agency (IAEA) that Qatar is keen to work in various forums, including the IAEA Board of Governors and IAEA General Conference, to implement the 1995 Treaty on the Non-Proliferation of Nuclear Weapons (NPT).

The representative expressed regret that the efforts to establish a Middle East nuclear-weapon-free zone were stalling due to the lack of political will from some countries.

He said that Qatar is actively participating in the Conference on the Establishment of a Middle East Nuclear-Weapon-Free Zone, which is currently being held in New York, and that it is a major step in the efforts of the international community to implement the provisions of the NPT.

Al-Mansouri said that the Middle East is facing great challenges and new opportunities.

He added that it is a major step in the efforts of the international community towards the implementation of its obligations and that states that have not participated in it should reconsider their decision and engage in the joint effort under the auspices of the UN to achieve the goal of a nuclear-weapon-free Middle East and the universality of the NPT.

Al-Mansouri said that the Middle East is facing great challenges and new opportunities, expressing hope that everyone is convinced of the importance and necessity of achieving regional security through the implementation of commitments and to provide peace and prosperity for the peoples of the region.
Qatari-Djiboutian Friendship Committee
Saqr bin Fahd al-Meraikhi, Shura Council’s members and Charge d’affaires at the Qatar embassy Faisal bin Rashid al-Nuaimi. HE al-Mahmoud also met the President of the African Parliamentary Union

The meeting reviewed the parliamentary relations between Qatar and CAR and ways of developing them, as well as the topics listed on the agenda. The meetings were attended by a number of Shura Council members.

Deputy Speaker meets UN official

The Deputy Speaker of the Shura Council Mohsen al-Abdulrahman al-Shamali yesterday met E Tendayi Achiume, Special Rapporteur on Human Rights Procedures of Economic, Social and Cultural Rights of Workers. The meeting discussed the efforts of Qatar to support workers’ rights and the commitment to provide the best conditions for protecting their rights and wages. The meeting was attended by HE the Secretary General of the Shura Council Field Marshal Abdulrahman al-Kuwari.

HBKU conference discusses computer-human interaction

HBKU conference discusses computer-human interaction. Second, our blend of discussions and interactive sessions allows us to engage with researchers and designers. We’re confident that this will foster more of the multidisciplinary computing research needed to help both Qatar and the wider region. Third, our ability to attract global experts to this event reflects Qatar’s place at the forefront of developments in computer vision and computer-human interaction. And finally, our team at HBKU conference is dedicated to conducting research and development in computer vision and computer-human interaction.

A regional workshop on prison rehabilitation programmes, organised by the Ministry of Interior in collaboration with the Doha Declaration Global Programme (Qatar), opened yesterday in Doha with the participation of 12 countries.

The workshop is part of the implementation of the Doha Declaration issued by the 13th UN Congress on Crime Prevention and Criminal Justice (UNCPCJ) and through the financial support provided by Qatar to the programme, with the aim of assisting countries to achieve a positive and sustainable impact of crime prevention and criminal justice.

The workshop focuses on a number of topics such as prison rehabilitation from an international perspective and prison rehabilitation programmes in the Middle East and North Africa (Mena) from a regional perspective in addition to reviewing the implementation of the Doha Declaration issued by the 13th UNCCPCJ in 2015, which resulted in the launching of the global programme for the implementation of the Declaration, entitled Doha Declaration on rehabilitation of inmates and their reintegration into society.

He stressed that the rehabilitation of prisoners must be based on studies and plans, according to the best practices in the region and the world. He added that the programme management office at UNODC, noted that international law states that prisoners must be given the opportunity to acquire knowledge and skills that can help them reintegrate into society after their release.

He said the roadmap for the development of prison rehabilitation programmes includes four main phases: an assessment of prison rehabilitation activities, planning of new initiatives, programmes and activities to bridge the gaps identified by the assessment, detailed development of new initiatives, programmes and activities to bridge the gaps identified by the assessment, and implementation of all initiatives, programmes and activities to bridge the gaps identified by the assessment.

He noted that international law stipulates that the prison system shall take into account the treatment of prisoners, the main objective of which is their rehabilitation and social rehabilitation, said Matta.

The workshop is part of the global programme for the implementation of the Doha Declaration issued by the 13th UNCCPCJ in 2015, which resulted in the launching of the global programme for the implementation of the Declaration, entitled Doha Declaration on rehabilitation of inmates and their reintegration into society.

Qatar reiterates pledge to take part in UNSC reform talks

The Security Council reforms process aims to achieve the goals set by the 60th Session of the UN General Assembly. The reform process will be focused on the current and growing challenges with a view to increase the Security Council's effectiveness and accountability.

"...the important role of the Security Council, which represents the will of the United Nations, undermines the credibility of its organs and affects international relations and the maintenance of international peace and security."

Qatar's submission to participate actively in the negotiations on Security Council reforms is a clear indication of the country's commitment to advance international dialogue and openness, Qatar's position being based on the importance of small States and the use of force and non-use of force, contributing to efforts to achieve a fair and balanced United Nations.

The conference will also explore the geopolitical and economic realities and keeping up with the current geopolitical and economic changes witnessed in the world.

"The conference will be held from 12 to 14 November with the participation of members of the Security Council and representatives from other countries. The conference will discuss the role of small States in the Security Council and the challenges it faces, the current and growing challenges with a view to increase the Security Council's effectiveness and accountability.

The conference will also explore the geopolitical and economic realities and keeping up with the current geopolitical and economic changes witnessed in the world.

The conference will be held from 12 to 14 November with the participation of members of the Security Council and representatives from other countries. The conference will discuss the role of small States in the Security Council and the challenges it faces, the current and growing challenges with a view to increase the Security Council's effectiveness and accountability.

Qatar's submission to participate actively in the negotiations on Security Council reforms is a clear indication of the country's commitment to advance international dialogue and openness, Qatar's position being based on the importance of small States and the use of force and non-use of force, contributing to efforts to achieve a fair and balanced United Nations. Security Council reform process has been backed by remote consensus and more grass-roots support. Security Council reform process is important in and critical to the U.S. national interest,

In the statement, HE Sheikh Al-Thani restated Qatar's position which affirms that the veto is an obstacle to the Council's reform process, explaining that such a position has always been consistent since it helps to prevent serious crises such as war crimes, genocide or ethnic cleansing.

The issue of Security Council reform is an important challenge for the international community, the Security Council being the main pillar of the United Nations, the Security Council, the Council of the UN Security Council, and the General Assembly. The Security Council, in particular, is an example of the commitment of the United Nations and the international community to multilateralism, equity and regional balance.

Qatar's submission to participate actively in the negotiations on Security Council reforms is a clear indication of the country's commitment to advance international dialogue and openness, Qatar's position being based on the importance of small States and the use of force and non-use of force, contributing to efforts to achieve a fair and balanced United Nations.
Qatar Charity employees participate in blood donation drive

Qatar Charity (QC) is all set to launch the 2019-2020 winter campaign from Syrian and Palestinian refugee camps in the Hashemite Kingdom of Jordan to provide the necessary assistance to the vulnerable for their survival during the harsh month of winter. The campaign is expected to benefit hundreds of thousands of people in the areas of food, shelter, and heating.

Today, a delegation from Qatar Charity, social activists, and social media influencers are heading to Jordan to launch the campaign and distribute the first batch of winter assistance directly to Syrian and Palestinian refugees living in camps and low-income Jordanian families.

The participation of Qatar Charity in this campaign falls within the framework of its efforts aimed at strengthening its social role towards the local community, promoting the culture of voluntary blood donation, and educating the public and its employees about the importance of this humanitarian action, and contributing to supporting the efforts made by HMC in providing blood units to those in need.

The campaign aims to meet the necessary winter needs of the targeted vulnerable in the areas of food, shelter, and heating by providing food baskets, winter clothes, blankets, heaters, heating fuel, tents, caravans, tent and house maintenance, mattresses, pillows, hygiene items, and bag for orphans containing winter clothes, blankets, and food basket.

The campaign focuses on the affected in countries like Syria and Palestine, which are going through exceptional circumstances. It also concentrates on the underprivileged in countries where temperatures fall below zero degrees Celsius.

Qatar Charity, with the support from benefactors in Qatar, is keen to implement such campaigns at the beginning of each winter to ease the suffering of the vulnerable, and contributes to saving the lives, especially children, women, and the elderly in the most affected countries.

This reality poses a significant challenge to all humanitarian organizations, requiring them to mobilize more resources to contribute to the safety of those sections.

Given the difficult situation of refugees, internally displaced persons (IDPs), and those in need in countries experiencing extreme cold, Qatar Charity urges benefactors to support the campaign to deliver assistance to the targeted people and ease their hardship.

The participation of Qatar Charity in this campaign falls within the framework of its efforts aimed at strengthening its social role towards the local community, promoting the culture of voluntary blood donation, and educating the public and its employees about the importance of this humanitarian action, and contributing to supporting the efforts made by HMC in providing blood units to those in need.

Qatar Charity staff expressed their pleasure at participating in the blood donation drive. “The participation in such events is a humanitarian and ethical duty to save the lives of those in need of blood,” said the blood donor Abdullah Al Ashwal, donor relations officer at Qatar Charity.
HBKU Press signs publishing deal for new journal

prominent authors and researchers around the world will take part in the middle east’s first-ever iranian literature festival. the event, dubbed as the “greatest literary show on earth,” is scheduled from february 3 to 6, 2020.

hi my dear

the agreement was signed by chebaro, executive director of hbkupress, and dr. al-rabban, president of arsco, in the presence of senior representatives from both institutions.

the agreement will see the inclusion of the arabic scientific community. the agreement will be available in english, and it will also be published in qatar. the agreement will be published in the arabic language, while further encouraging researchers to work in english.

“we are very pleased to be working with thelithiasites university press on this project,” explained dr. bachar chebaro, executive director of hbkupress. “we are very pleased to be working with thearabic scientific community.”

Qatar Airways opens Aviation Academy at KidZania Doha

Qatar Airways opened its Aviation Academy at KidZania Doha on 13th November 2019, a partnership with KidZania Doha that enables children to simulate life in a number of aviation and travel roles, and learn more about the fun as they role play as passengers, pilots and flight attendants, and experience the comfort of passengers on board. The launch of the Aviation Academy was covered by Qatar Airways’ Corporate Communications and featured in the English daily newspaper *The Gulf Times*. The story was written by Joey Aguilar and includes a press conference with Qatar Airways CEO, Al Baker, and the KidZania CEO, Céline Goni. The press conference was also attended by the KidZania Doha’s managing director, Alwaleed Al-Khalifa, who noted that the cooperation with Qatar Airways is a significant milestone for KidZania Doha. The story also includes a quote from Al-Baker, who stressed the importance of the partnership for both parties and the potential of KidZania Doha as an educational and training center for children interested in aviation and travel. The story concludes with a statement from Qatar Airways’ CEO, Al Baker, who expressed his joy at the launch of the Aviation Academy at KidZania Doha and emphasized the importance of this project for Qatar Airways as it aims to develop young leaders and strengthen its presence as a regional leader in the aviation industry. The story also highlights the potential of KidZania Doha as an educational and training center for children interested in aviation and travel, and the potential for future cooperation between Qatar Airways and KidZania Doha.

Mercedes-Benz recalls models over noise issue

Mercedes-Benz recalls models over noise issue

The Ministry of Commerce and Investment in cooperation with Al Jama'a the Commerce and Investment Bureau in Qatar, launched the recall of Mercedes-Benz (MB), due to a noise issue. The recall covers models from the years 2012 to 2015 for the E-Class, S-Class, and GLA from the years 2012 to 2016.

The Ministry confirmed the recall campaign comes within the framework of its ongoing efforts to protect consumers and ensure that vehicle dealers follow up on defects and issues. The recall campaign involves 6,389 vehicles in Qatar, which will be conducted in coordination with the relevant authorities.

The ministry stated that the recall is necessary because of the noise issue, which could affect the safety of the vehicle. The recall will aim to fix the issue and ensure that the vehicles are safe for use.

At present, Mercedes-Benz dealers in Qatar are conducting the recall and informing owners about the necessity to bring their vehicles to the service center for necessary repairs.

The Ministry of Commerce and Investment stressed the importance of recalling vehicles with defects to protect consumers and ensure their safety. The ministry also called on vehicle owners to cooperate with the recall campaign and bring their vehicles to the service center for necessary repairs.

17 killed by car bomb in northern Syria

A car bomb killed at least 17 people and wounded 53 others in the Turkish-occupied region of northern Syria, causing Turkey’s da-
ning president to call the city of Afrin to deploy military reinforcements to the border village of Tal Halaf west of the city of Azaz in the northwestern Aleppo province in response to the rising violence in the area. The attack happened at dawn yesterday as the overpopulated northwestern town, which has been hit by several rockets fired by YPG-PKK militants, was hit by a car bomb explosion that killed at least 17 people and wounded dozens of others, according to local media. The attack came after the security situation in the area had worsened amid growing insecurity, with several clashes breaking out in the past week between Turkish-backed forces and YPG-PKK militants, leading to the deaths of at least 17 people and the wounding of dozens of others. The attack was the latest in a series of attacks in the area, which has been the scene of several clashes between Turkey and the YPG-PKK militants in recent months.

Lebanon’s Hariri says he does not want to be PM

The move comes amid growing political instability in Lebanon, where Prime Minister Hassan Diab has been struggling to form a government since the August 2020 explosion in Beirut that killed at least 170 people and left thousands homeless. Hariri, who is Lebanon’s leading political figure and is seen as a key player in the country’s politics, has been considered a potential candidate for the PM’s position in the past. However, he has recently expressed reservations about taking on the role, saying he does not want to be PM and would prefer to remain in his current position.

Palestinians protest US move on settlements

Palestinian protesters clashed with Israeli security forces outside the city of Ramallah in the occupied West Bank yesterday, as thousands of people continued to demonstrate against the US president’s decision to move the US embassy in Israel to Jerusalem. The protest was one of several held across the country yesterday, as Palestinians continue to express their anger at the US decision to recognize Jerusalem as the capital of Israel and move its embassy to the city. The protesters were met with tear gas and other forms of violence from Israeli forces, who used helicopters and tanks to disperse the crowd.

Who relocates staff from Beni amid unrest

The World Health Organization said yesterday it would move its staff from Beni, eastern DR Congo, over growing violence in the area. The organization said it had taken the decision after recent attacks on its staff in the area, including an attack in which a driver was killed in September.

More than 40 dead after heavy rains pound DR Congo capital

At least 44 people were killed and dozens were injured yesterday when heavy rains caused flooding in Kinshasa, the Democratic Republic of Congo’s capital. The disaster, which is the worst to hit the city in recent memory, left large parts of the city submerged under several feet of water, with residents forced to flee their homes.

Iraqi and Iranian forces clash near Kirkuk

Policymakers oppose support in massive new German protests

The government has referred to the creation of posts for a prime minister and an official opposition leader as a way of avoiding a return to the violent, divisive election cycles. According to a source, the cabinet discussed the possibility of creating the position of prime minister and official opposition leader on Friday. The cabinet also discussed the possibility of creating a similar position in other countries.

Botswana opposition in government over ‘irregularities’

The move comes amid growing political instability in Botswana, where the ruling party has been struggling to form a government since the 2019 general election. The opposition Botswana Democratic Party (BDP) has demanded the formation of a government that is representative of the country’s diverse population, but the ruling party has refused to participate in the negotiations, saying it is not in the interest of the country.

Zimbabwe doctors stop work as salaries lag

Zimbabwean doctors have called off their strike after receiving a 10% pay increase, but the move comes amid growing concerns about the country’s health care system, which is struggling to provide adequate care to its population. The strike began last month over concerns about salaries and working conditions, with doctors demanding a 100% pay increase.

Lebanese ‘will not respect the building regulations’

Palestinian protesters have clashed with Israeli security forces outside the city of Ramallah in the occupied West Bank yesterday, as thousands of people continued to demonstrate against the US president’s decision to move the US embassy in Israel to Jerusalem. The protest was one of several held across the country yesterday, as Palestinians continue to express their anger at the US decision to recognize Jerusalem as the capital of Israel and move its embassy to the city. The protesters were met with tear gas and other forms of violence from Israeli forces, who used helicopters and tanks to disperse the crowd.

Trump behind bars... and behind the scenes

President Donald Trump's interventions in US military operations, including the military's decision to withdraw from Syria and the decision to pull troops back from Afghanistan, have drawn criticism from military leaders and analysts.

In a recent interview, retired General Jack Vande Laan, the former commander of the US Central Command, said that Trump's actions are "dangerous signals to troops on the ground and to the American people." He added that "the senior military leadership is in a really difficult position." The senior military leadership is in a really difficult position.

In terms of civil-military relations, what has been happening with the president is not a Democratic issue, but a Republican issue," Peter Feaver, a specialist in civil-military relations, said. "It's important that we don't see these as discreet. The cost to both sides is a loss of trust, effectiveness and the ability to work together.

Black Friday deals in UK rarely genuine bargains: study

Guardian News and Media

The Government has been urged to impose a last-minute ban on Black Friday’s traditional evening sale, which is allegedly a ploy to increase footfall in shops for a few days before Christmas. Footfall experts, the Centre for Retail Research, said that Black Friday deals in 2016 were

13 French troops die in helicopter crash

The collision between a Tiger military helicopter and a Capercaillie helicopter occurred on Wednesday, December 11, 2019, near the village of Leschizer Mühle in the municipality of Bienenbüren, Jura, Switzerland.

The crash resulted in the death of 13 French soldiers on board the Tiger helicopter. The Capercaillie helicopter was not involved in the collision and was not carrying any passengers.

French President Emmanuel Macron expressed his “deep sadness” over the loss of life, stating that the French army would continue to be a strong and formidable force in the face of any challenge.

The accident has sparked renewed attention to the safety of military helicopters and the need for improved flight training and procedures to prevent such incidents in the future.

A female activist who was killed in police custody yesterday in Kashmir is a prominent tourist town, according to her death certificate.

The activist, identified as Ammini, was sprayed in the back of a taxi as she was being taken to a hospital in Srinagar. The activist had been seeking justice for the death of her sister, who was also shot dead by police in 2011.

The government has asked the police to conduct a thorough investigation into the death of Ammini and has promised to provide all possible assistance to her family.

Meanwhile, the government has imposed a curfew in Srinagar and surrounding areas, and has asked people to stay indoors.

The government has also asked the police to ensure that the activist's family is not discriminated against, and has promised to take all necessary steps to ensure their safety.

Bolivia edges toward peace as torn country mourns its dead

Bolivian attempts to suppress dissent have provoked harsh criticism from the military, who were on alert a week ago in Cochabamba. The deaths have raised pressure on President Jeanine Anez to resign, or to provide guarantees that leaders would not be persecuted for the post-election violence. The authorities have arrested four people since the arrest of former President Evo Morales last week.

Bolivia is one of the countries in Latin America that has been hit hard by the coronavirus pandemic. The government has implemented strict measures to contain the spread of the virus, including a nationwide lockdown that has been in place since March.

The death of Dilan Cruz, announced by the Bolivian government, has caused anger at home by Brazil's economy minister, Paulo Guedes, who has been on hunger strike for a month to press for her release. "I want my wife out of prison so we can go home with our daughter," he told local media. The death has prompted a wave of protests in the Oruro region, where Anez was born.

The government has ordered the release of all political prisoners and has announced plans to withdraw troops from most protest areas, but the military has remained on high alert. The authorities have also relaxed some restrictions on gatherings, allowing protests to continue.

Bolivia has 22 deaths from coronavirus, with the highest number of cases in the Oruro region. The government has announced plans to expand testing and contact tracing, but the medical system is overwhelmed by the virus.

The death of Dilan Cruz has sparked a wave of protests in the country, with thousands of people taking to the streets in Cochabamba and other cities. The government has announced plans to withdraw troops from most protest areas, but the military has remained on high alert. The authorities have also relaxed some restrictions on gatherings, allowing protests to continue.

Pakistan questions India's UNSC bid

Financial inclusion is pivotal for development, says Dutch queen

Campbell, who is excited about learning to ride a motorbike, is a member of Lyari University's student union. She and other students are part of a group that is fighting for women's rights in Pakistan.

Campbell said she had always wanted to ride a motorcycle, but had never had the opportunity.

The group, called "Women on Wheels," was founded in 2011 by Gulalai Ismail, a human rights activist who fled to the United States to escape persecution.

Ismail said she started the group because she wanted to give girls in Pakistan a chance to have more freedom and independence.

Since its inception, the group has trained thousands of women on motorcycles, and has also worked to raise awareness about gender equality and women's rights.

The group's activities have been met with resistance from some quarters, but Campbell said she was determined to continue fighting for what she believes is right.

"We believe that women should have the same rights as men," she said.

"We want to show that women can do anything they set their minds to, and that they deserve to be treated equally with men."

Some 120mn workers in the world's 12 largest economies may need retraining as a result of automation by 2050. History suggests that the worst fears of machines making humans obsolete don't come true. In some cases, automation has created new opportunities. But while displacement of jobs occurred in each wave of new technology, new jobs emerged to balance out some of the need for retraining. Economies may double. As many as 12mn workers in the world's 12 largest economies may need to be retrained over the next three years, a panel of economists and artificial intelligence researchers, according to a study by International Business Machines Corp. In 2017, the World Economic Forum projected that as much as 40% of the global workforce — 175mn people, give or take — will need to change occupations because of automation by 2050.

Intelligence Unit gave top marks to South Korea, Germany, the US, and Switzerland for their ability to absorb new technologies and retrain workers in the face of automation. It warned that countries with the weakest skills will be hardest hit. The stakes are high. As many as 120mn workers in the world's 12 largest economies may need retraining as a result of automation by 2050. While robots are fast catching up to humans in the race for productivity, they are still far behind in many areas. For example, they cannot yet match the dexterity or precision of human hands. Interestingly, a lot of the world's goods are made by machines, but many of the tasks that machines perform are simple, repetitive, and can be easily automated. Jobs requiring repetitive tasks in a structured setting, such as meatpacking, will see a dramatic reduction in the number of jobs. However, the coming wave of intelligent automation “is expected to benefit a wide range of industry sectors and to significantly raise productivity,” the World Economic Forum said.

"The risk of having intelligent machines replace humans is a matter of concern. We are aware of the potential for displacement in certain sectors, but we also see the potential for new jobs and economic growth," said Tiziana DiMattia, co-founder of DMarket, a platform for game developers and players to sell virtual items or other digital assets from games. "We believe that the only way the game developers can earn money by selling virtual goods is through a system that allows virtual items to be freely bought, traded, and sold in virtual worlds." Digital assets can be anything from virtual property to virtual clothing. They can range from a few cents to thousands of dollars — fuelling debate on what constitutes a ‘virtual currency’ and how it should be regulated.

“Rights to virtual items are often set at $100, but players may be willing to pay up to $1,000 for virtual items,” said Slanova, a veteran game developer. “And the results of court cases over virtual currency are not always clear.” The demand is growing...from virtual currency to virtual property. The results of court cases over virtual currency are not always clear.”

Some quarters, AI and robotics are considered the “leading edge of a technological revolution that will make humans obsolete don’t come true. In fact, they predict that the technology will create new jobs and economic growth. "This demand is growing...from virtual currency to virtual property. The results of court cases over virtual currency are not always clear.” The demand is growing...from virtual currency to virtual property. The results of court cases over virtual currency are not always clear.”

Economies may double. As many as 12mn workers in the world's 12 largest economies may need retraining as a result of automation by 2050. While robots are fast catching up to humans in the race for productivity, they are still far behind in many areas. For example, they cannot yet match the dexterity or precision of human hands. Interestingly, a lot of the world's goods are made by machines, but many of the tasks that machines perform are simple, repetitive, and can be easily automated. Jobs requiring repetitive tasks in a structured setting, such as meatpacking, will see a dramatic reduction in the number of jobs. However, the coming wave of intelligent automation “is expected to benefit a wide range of industry sectors and to significantly raise productivity,” the World Economic Forum said.

"The risk of having intelligent machines replace humans is a matter of concern. We are aware of the potential for displacement in certain sectors, but we also see the potential for new jobs and economic growth," said Tiziana DiMattia, co-founder of DMarket, a platform for game developers and players to sell virtual items or other digital assets from games. "We believe that the only way the game developers can earn money by selling virtual goods is through a system that allows virtual items to be freely bought, traded, and sold in virtual worlds." Digital assets can be anything from virtual property to virtual clothing. They can range from a few cents to thousands of dollars — fuelling debate on what constitutes a ‘virtual currency’ and how it should be regulated.

“Rights to virtual items are often set at $100, but players may be willing to pay up to $1,000 for virtual items,” said Slanova, a veteran game developer. “And the results of court cases over virtual currency are not always clear.” The demand is growing...from virtual currency to virtual property. The results of court cases over virtual currency are not always clear.”

Some 120mn workers in the world's 12 largest economies may need retraining as a result of automation by 2050. History suggests that the worst fears of machines making humans obsolete don’t come true. In some cases, automation has created new opportunities. But while displacement of jobs occurred in each wave of new technology, new jobs emerged to balance out some of the need for retraining. Economies may double. As many as 12mn workers in the world's 12 largest economies may need retraining as a result of automation by 2050. While robots are fast catching up to humans in the race for productivity, they are still far behind in many areas. For example, they cannot yet match the dexterity or precision of human hands. Interestingly, a lot of the world's goods are made by machines, but many of the tasks that machines perform are simple, repetitive, and can be easily automated. Jobs requiring repetitive tasks in a structured setting, such as meatpacking, will see a dramatic reduction in the number of jobs. However, the coming wave of intelligent automation “is expected to benefit a wide range of industry sectors and to significantly raise productivity,” the World Economic Forum said. 
The EU must recognise Palestine

By Daniel Kuritz

The US has been critical of its Palestinian counterpart for decades, but the tide may be turning for a deal. This is the moment to act, and now is the time to ensure that an independent Palestinian state exists.

The EU has been under pressure to take a more decisive stance on the Palestinian question for many years. Despite some progress in recent months, there is still much work to be done. But, with the new US administration, there may be an opportunity to push for a resolution of this long-standing conflict.

The EU has a clear interest in promoting peace in the region. It has been supporting Israeli-Palestinian negotiations for years, and has played a key role in mediating past agreements. However, the EU has also faced criticism for not doing enough to press Israel to comply with international law.

The EU has been urging the international community to take action to bring an end to the occupation of Palestinian territory. It has called for the establishment of a Palestinian state, based on the 1967 borders, with East Jerusalem as its capital.

The EU has also been calling for an end to the Israeli settlement programme, which is seen as illegal under international law. In addition, the EU has been pushing for the release of Palestinian prisoners and an end to the Israeli siege of Gaza.

The EU has also been working to support the Palestinian economy, and has provided funding for a range of development projects. However, much more needs to be done to improve the living conditions of Palestinians in the occupied territories.

The EU has been working with the Palestinian Authority to help improve the delivery of basic services, such as health care, education, and water and sanitation.

The EU has also been pushing for the creation of a Palestinian National Authority, which would be responsible for managing the affairs of the Palestinian territories.

The EU has been pressing for an end to the Israeli occupation of Palestinian territory, and has been calling for an end to the Israeli settlement programme.

The EU has also been working to promote peace in the region, and has called for an end to the Israeli occupation of Palestinian territory.
Qatar's plans to improve road transport for World Cup 2022 highlighted

By Shameem Ali Ghalib

The International Road Transport Union (IRU) conference yesterday highlighted Qatar's plans to improve road transport, including traffic flow and safety, to host the FIFA World Cup 2022.

The three-day conference attended by experts from various stakeholders around the world and international organisations was held at Madinat Khalifa where experts and officials contemplated measures to reduce traffic congestion and accidents.

Dr Kim Jraiw, director of the International Road Transport Union (IRU), said Qatar is making efforts to ensure smooth traffic flow and reducing traffic accidents.

He was addressing the session of the National Traffic Safety Office at the conference.

He said: "Co-ordinated efforts from various stakeholders will be continued while analyses, checks, workshops and seminars will be held to improve traffic and reduce fatalities.

"Qatar is embracing the changes to improve road transport for the WC2022 preparations for the FIFA World Cup 2022."

"Efficient law has been enacted to improve traffic flow on roads and bring down accidents," he said.

Jraiw said there is a need to discuss the latest trends and topics among experts to come up with effective solutions.

"We are committed to tapping the potential of technology to ensure our goal and efforts will be carried with cooperation from the private sector," he said.

Ivan Williams, Transport Operations senior manager at Ashghal, said there is an urgent need to discuss how to manage safe and efficient transport in Qatar.

"We are working with all stakeholders to enhance road safety and reduce violations," he said.

Jassim al-Dousari, Licensing and Communications Department, second vice president of NTSC, said efforts to improve traffic flow on roads and set up a carparking system will be continued while analyses, checks, workshops and seminars will be held to improve road transport for the WC2022 preparations.

Jassim al-Dousari said: "Co-ordinated efforts from various stakeholders will be continued while analyses, checks, workshops and seminars will be held to improve traffic and reduce fatalities."

Dr Saad bin Ahmed al-Muhannadi, director general of General Directorate of Traffic and second vice president of NTSC, said: "Safety is our main concern.

"We are working with all stakeholders to enhance road safety and reduce violations," he said.

Jassim al-Dousari said: "Co-ordinated efforts from various stakeholders will be continued while analyses, checks, workshops and seminars will be held to improve traffic and reduce fatalities."
