Qatar to host 16th international junior Olympiad from tomorrow

By Joseph Varghese

The Ministry of Education and Higher Education will host the 16th edition of the International Junior Science Olympiad (IJSO 2019) from tomorrow until December 12, at the Khalifa International Stadium, Doha. The event will be held under the patronage of His Highness the Amir Sheikh Tamim bin Hamad Al Thani, who will attend the opening ceremony.

The IJSO, which was launched by Qatar in 1996, is an annual competition that brings together the best junior students from around the world to compete in various science disciplines. The competition is organised by the International Olympiad of School Sciences and is open to students aged 15 to 18.

In addition to the main Olympiad, Qatar is also hosting a series of workshops and seminars for students and teachers, as well as a science fair, which will be held at the Khalifa International Stadium from December 4 to 8. The science fair will feature exhibitions, demonstrations, and interactive workshops on a wide range of scientific topics.

During the meeting, bilateral relations and topics of common interest were reviewed.

His Highness the Amir Sheikh Tamim bin Hamad al-Thani received yesterday a written message from Albanian Prime Minister Edi Rama, pertaining to relations between Qatar and Albania. The message was received by HE the Minister of State for Foreign Affairs Sultan bin Saad al-Muraikhi during a meeting with the Charge d’Affaires of the Albanian embassy in Doha, Kujtim Xhani.

Mexican Foreign Minister Marcelo Ebrard has met Qatar’s ambassador Mohamed bin Jassim al-Kuwari. During the meeting, the two sides reviewed the bilateral relations, in addition to issues of common concern.

Qatar, Germany launch UNDP Accelerator Lab in Azerbaijan

Qatar, in partnership with Germany and the United Nations Development Programme (UNDP), has launched the Accelerator Lab in Baku, Azerbaijan, to achieve the Sustainable Development Goals (SDGs) in the country. This Accelerator Lab will be joining the 60 labs set up in many countries around the world.

Speaking at the inauguration ceremony in Baku, Qatar’s ambassador to Azerbaijan Faisal bin Abdullah al-Henzab said that Qatar is an advocate of human rights and requirements for achieving sustainable human development, and that reaching this vision is of great importance in the presence of responsible leadership, good governance and strategic decisions to participate in global efforts to achieve prosperity for the people.

The ambassador added that according to Qatar Vision 2030, which guides Qatar’s policies and strategies, the country is an innovator in human development and is working to achieve the SDGs, and that this is the reason for Qatar’s participation in the launch of this Accelerator Lab.

He pointed out that through the UNDP Accelerator Labs, it is possible to identify and give meaning to emerging trends and their potential impact on development, approaches and solutions, and to diagnose those that do not work, adding that the Accelerator Laboratory network, the fastest and largest network of knowledge in the field of development, is able to identify and give meaning to emerging trends and their potential impact on development, approaches and solutions, and to diagnose those that do not work.

“One of the reasons for Qatar’s participation in the launch of this Accelerator Lab is that the SDGs are human rights and requirements for achieving sustainable human development, and that reaching this vision is of great importance in the presence of responsible leadership, good governance and strategic decisions to participate in global efforts to achieve prosperity for the people. Our aim is to achieve successful results and identify solutions to achieve the Sustainable Development Goals, mitigate disparities and provide a faster solution to the challenges of implementation.”

Al-Henzab added: “We are delighted to offer innovative ways to accelerate our pace and achieve relevant results to reach the Sustainable Development Goals, evaluate the solutions that failed, and finally, find the right solutions to the challenges of implementation.”

“With the Accelerator Labs, we achieve relevant results to reach the Sustainable Development Goals, and to find appropriate solutions for UN Member States to move forward in order to achieve development goals in accordance with the policies and guidelines of the United Nations through an integrated, consistent and innovative approach.”

The ceremony was attended by representatives of the diplomatic corps, resident United Nations offices, the media and civil society and private institutions.

Qatar Charity builds mosque in Pakistan’s Punjab

Qatar Charity (QC), in collaboration with the government departments concerned and local communities, has successfully built a mosque in Allah Ditta Machi, a locality in Rajanpur district of Pakistan’s Punjab, with 150 households including more than 600 individuals.

The 2,695 sqft mosque, which was a long-standing need of the community in Allah Ditta Machi, can accommodate up to 150 worshippers at a time.

“Due to the need for a place of worship, the community of Allah Ditta Machi, who are mostly laborers and hardily fulfill their daily life needs, due to their limited economic resources” said a statement.

According to the Imam Aman Ullah, who leads worshippers at the mosque, people of the locality consider it as a “gift from the heavens” for them, because it was tough for them to construct a place of worship for themselves due to their challenging economic conditions.

“Now, it is very easy and comfortable to perform the prayers in a proper place, and offer our prayers in a choir place with peace. Along with offering our prayers, we can now teach our children with ease. We are grateful to the people of Qatar for this immense gift,” said Aman Ullah.

In Pakistan, Qatar Charity started its first humanitarian operation in 1992. Since then, it has been implementing various charitable, humanitarian and developmental projects across the country.

Second Flowers Festival opens at Souq Waqif

The second Flowers Festival organized by Souq Waqif in collaboration with the Ministry of Municipality and Environment (MME), kicked off yesterday. The 10-day long festival is being held in the West Square of Souq Waqif.

Director of Souq Waqif Mohamed al-Salem noted that the event aims to introduce the public to local companies engaged in this field and to give them the opportunity to purchase flowers of all kinds and enjoy the exhibits at the festival.

He invited the public to visit the Festival and enjoy the different types of flowers displayed in one place under one roof.

The festival hours are from 9am to 9pm, except Thursday. On Friday, the Festival will be open until 10pm. – QNA
Made in Qatar: The key drivers to sustaining local produce market

**Carrefour highlights partnerships with suppliers**

Carrefour has stressed that it is working closely with local farmers to help grow their businesses and ensure that they adapt to market trends.

The fresh produce market in Qatar continues to flourish and more than 130mn tonnes of locally grown vegetables have been sold in the past month through the Qatar Farms programme run by the Ministry of Municipality and Environment (MME), in collaboration with the Ministry of Commerce and Industry, Carrefour points out in a statement.

The local poultry market has expanded as well, reaching a volume of 22mn tonnes produced in 2018 versus 10mn tonnes in 2017.

The growth of the produce industry did not come easily, as Qatar’s arid climate, as well as a lack of water and fertile soil, were all major issues faced by farmers. However, in a “remarkable turnaround”, plots of land were transformed to produce a variety of fresh vegetables and raise chicken, forming a market that few would have expected to thrive, the retailer pointed out.

Providing support to farmers and suppliers is “key to sustaining this supply chain”. “Carrefour is one retailer that is working closely with local farmers to help grow their businesses and ensure they adapt to market trends,”

One key example of this relationship is Mazzraty, a local chicken farm that opened its doors a few months ago and today offers chicken grown naturally with no hormones and no antibiotics. It uses global best practices to raise its chicken, which allows them to ensure a quality outcome. “Its products sell the most at the Villaggio hypermarket, one of Carrefour’s leading stores,” the statement noted.

Abdul Rahman Hamad al-Mana, chairman, Mazzraty, said: “Our farm is proudly run right here in Qatar, using high-tech machinery and leading manufacturing standards. Our vision is to cater to the poultry needs of the entire population and develop new ranges of products based on customer feedback.”

According to Laurent Hausknecht, country head of Carrefour in Qatar, “It’s important that we form strong partnerships with local suppliers so that our customers continue to receive fresh, high-quality products at the best possible value.”

For Carrefour, the rationale behind working with local farms is two-fold. Firstly, consumers are becoming increasingly conscious of where their food comes from. According to Laurent Hausknecht, country head of Carrefour in Qatar, “It’s important that we form strong partnerships with local suppliers so that our customers continue to receive fresh, high-quality products at the best possible value.”

The distribution of the chicken supply is done daily by the Mazzraty team, ensuring that Carrefour’s customers have access to fresh poultry at all times.

Another example is Qatarat Agricultural Development Company, a leader in farming in Qatar, which operates three main farms spanning a total of 8mn sqm. It also functions as a technical and marketing consultant to 30 other farms, providing them with the knowhow, coaching and support they require to operate.

Carrefour is a key partner for Qatarat as it is its “biggest client for its range of premium Qatari vegetables, driven by Carrefour customers’ demand for high-quality vegetables.”

According to Nezar al-Atawneh, operation manager at Qatar Agricultural Development Company, “Establishing a local agricultural farm in the middle of the desert has been a major milestone, with many facilities producing a wide range of vegetables, from eggplant, tomato and cucumber to more specialised vegetables. Our goal is to continue to innovate to better serve our customers and leverage Carrefour’s expertise in the retail landscape to sustain our growth.”

For Carrefour, the rationale behind working with local farms is two-fold. Firstly, consumers are becoming increasingly conscious of where their food comes from.

According to Laurent Hausknecht, country head of Carrefour in Qatar, “It’s important that we form strong partnerships with local suppliers so that our customers continue to receive fresh, high-quality products at the best possible value.”

Buying local is also seen as a corporate responsibility, as “we’ve always seen ourselves as part of the communities in which we operate, as such, it is our duty to extend our support to local farmers to ensure a thriving industry for years to come.”

As a main player in the market since 1999, Carrefour aims to continue giving back through ongoing support of the local market, thereby contributing to the nation’s economic and environmental development, both of which are key pillars of Qatar National Vision 2030, the statement added.

Qatarat produces a wide range of vegetables including eggplant.

Made in Qatar: The key drivers to sustaining local produce market
First Hot Air Balloon Festival to begin on December 7

D ozens of hot air balloons in various shapes, designs, and colors will adorn the skies of Qatar’s capital on December 7, when the country’s first Hot Air Balloon Festival, taking place from December 7-18, organisation has announced. 

Begging a press conference recently, Safari High (Saf) Solutions CEO, Captain Hassan bin Amin al-Thani and Dimdex chairman Staff Brigadier (Sea) Abdulbaqi Saleh al-Thani and hosted and organised by the Doha International Maritime Defence Exhibition (Dimdex) under the patronage of His Highness the Amir Sheikh Tamim bin Hamad al-Thani and in strengthening Qatar’s defence and security sector, the event will celebrate and promote a diversity of international companies and partnerships and will be held on December 18.

Nasser Hassan al-Naimi, and Staff Brigadier (Sea) Abdulbaqi Saleh al-Thani, signed an agreement at a ceremony at the Ministry of Defence.

Safari High (Saf) Solutions and Dimdex announced Barzan Holdings as a strategic partner for this edition with a stronger and more incisive presence, demonstrating our confidence and full commitment to ensuring the success of this event. 

A commercial gateway for the region, Dimdex was publicly launched in 2010, as the first dedicated company responsible for organising the Doha International Maritime Defence Exhibition (DIMDEX) since then, Dimdex has supported partnerships with local and regional and international organisations in the industry to enhance defence and security sector and has forged successful partnerships with leaders and most high-profile defence and security executive and other key decision makers. Each edition brings together various commercial and national drill and cyber threat intelligence, insider threats. “The National Cyber Security Drill (NCSD) is the only countrywide drill of its kind, it was designed to ensure that all government and private sector partners taking the lead in building national cyber security capabilities. It is a milestone event for our nation. “

William Bowman, CEO of netIQ USA, highlighted that the MoTC official laid stress on the importance of understanding the threats in context of the threat actors. Another, it helps the participants understand how to evaluate and analyse credible and contextual threat intelligence reports that are produced and simulated. The event shines light on various topics including cyber threat intelligence, insider threat, cyber threat modeling, information sharing, and sharing threat models with each other. 

He noted that this festival will also be a new addition to Qatar’s tourism agenda. “We are keen to deliver Qatar’s calendar of festivals in a similar way as we see on our private sector partners taking the lead in building national cyber security capabilities. This is being worked on as a part of this event, which introduces a brand new tourism product by Qatar tourism and hospitality sector, the event will be held on December 18, it is the third different activities, which include the ‘Balloon night flight’, will continue in December? Albida Ansar Al-Abi, Director of Events and Facilities at Aspire Zone Foundation, said “We are hosting the largest parade in the region in the field of cyber security. The MoTC annually organises a national cyber security exercise as part of the efforts to achieve the goals” she added.

Qatar National Library launches QNF lecture highlights Gandhi’s life and ideas

A former student of Texas A&M University at Qatar (TAMUQ) has earned the title of ‘Highly Cited Researcher 19’ from Clarivate Analytics, an international research and analytics company. Prof. Dr. Bassim Hammadi, associate professor of political science at Qatar University (QU), was named one of the world’s most influential researchers.”

A press release by Clarivate Analytics said that the recognition was based on the number of times the researcher’s work had been cited by other researchers, and that the title is awarded to only 0.1% of the world’s researchers. Hammadi has earned this distinction for his significant contributions to the field of political science.

Hammadi, a Qatar University faculty member, is currently the director of the Department of Political Science and Comparative Politics. He has been given the title of ‘Highly Cited Researcher’ for five consecutive years (2014–2019).

Hammadi successfully supervised four PhD students and several MSc students. He has published over 100 articles and has more than 1000 citations. He has been a principle investigator and has published several books and chapters.

Hammadi earned his PhD from the School of Advanced International Studies (SAIS) at George Washington University, USA. He also earned his MSc degree in political science from the same university and his BSc degree in political science from the University of Arab Thought, Baghdad, Iraq.

Hammadi has been a faculty member at the Qatar University since 2010.

He has been actively involved in research and the development of his academic field. Hammadi has been a member of various international conferences and has participated in many research projects.

Hammadi has been a member of the Qatar National Library (QNL) and has been involved in the organization of various events at the library, including the QNF lecture highlights Gandhi’s life and ideas event. He has also been involved in the organization of various events at the Qatar library, including the QNF lecture highlights Gandhi’s life and ideas event.

Romanian community marks National Day

The Romanian community in Qatar celebrated their country’s National Day, marking 63 years since Romania’s revolution, at the Pearl Ballroom in the Doha Sheraton Grand Hotel.

Romanian embassy charge d'affaires Ana Silvia Qaraghi, Qatar's Minister of Commerce and Industry Ali bin Ahmed al-Kuwari, and other dignitaries attended the event, which featured the Italian choir “La Voce di Medioevo” and a Romanian choir.

The event was organized by the Romanian community to commemorate the day, which marks the beginning of the Romanian Revolution of 1989.

United Shipping facilitates MSC Bellissima’s maiden call

United Shipping Agency, a subsidiary of Qatar Investment Group, services, facilitated the MSC Bellissima maiden cruise call in Doha Port recently.

The MSC Bellissima, the sixth largest cruise vessel in the world, having a passenger capacity of more than 6,700 passengers, docked at Doha Port for the first time, marking the start of the MSC cruise season 2019-2020 in Qatar.

To commemorate the event, a crest exchange ceremony was held aboard the MSC Bellissima on its maiden call to Doha Port, with Qatari Investment Group Marine Services executive director Captain Mohamed Ali Abdelrahim presenting the crest to MSC Cruises executive chairman Francesco Vago and the MSC Bellissima's first call to Doha Port, “Abdulla al-Khanji, Qatari Investors Group’s executive director said: “MSC Bellissima’s maiden call to Doha Port is a significant milestone in the MSC Cruises’ journey in the region and marks the start of the new cruise season in Qatar.”

The ship's deck surface area is equivalent to 63 football pitches and is the largest cruise ship in the Middle East.

The MSC Bellissima features a maximum capacity of 4,000 cabins and acts as a floating hotel with a variety of onboard facilities and activities, including a variety of restaurants, bars, shops, and entertainment venues.

MSC Cruises is a leading cruise line in the Middle East, and this marks the start of the MSC cruise season 2019-2020 in Doha Port.

The MSC Bellissima, the sixth largest cruise vessel in the world, having a passenger capacity of more than 6,700 passengers, docked at Doha Port for the first time, marking the start of the MSC cruise season 2019-2020 in Qatar.

To commemorate the event, a crest exchange ceremony was held aboard the MSC Bellissima on its maiden call to Doha Port, with Qatari Investment Group Marine Services executive director Captain Mohamed Ali Abdelrahim presenting the crest to MSC Cruises executive chairman Francesco Vago and the MSC Bellissima's first call to Doha Port, “Abdulla al-Khanji, Qatari Investors Group’s executive director said: “MSC Bellissima’s maiden call to Doha Port is a significant milestone in the MSC Cruises’ journey in the region and marks the start of the new cruise season in Qatar.”

The ship's deck surface area is equivalent to 63 football pitches and is the largest cruise ship in the Middle East.

The MSC Bellissima features a maximum capacity of 4,000 cabins and acts as a floating hotel with a variety of onboard facilities and activities, including a variety of restaurants, bars, shops, and entertainment venues.

MSC Cruises is a leading cruise line in the Middle East, and this marks the start of the MSC cruise season 2019-2020 in Doha Port.

Malomatia Develops the Complaint Management Solutions System (CMS) to the Communications Regulatory Authority (CRA)

United Shipping Agency, a subsidiary of Qatar Investment Group, services, facilitated the MSC Bellissima maiden cruise call in Doha Port recently.

Shaded pushcarts to help protect cleaning workers

The General Cleanliness Department, under the Ministry of Municipality and Environment (MME), has launched new shaded pushcarts that provide protection from rain and sunlight to workers engaged in cleaning work.

Safar Mubarak Al-Shafi, MME assistant undersecretary for General Services Sector, in his talk with the ministry’s sustainable plan (2020-2022), said the new carts would provide adequate protection to the cleaning staff from sun and rain.

This, in turn, will help improve the ministry’s policy that ensures the safety of workers and provide them with the suitable equipment to carry out their tasks.

He noted that the MME pays great attention to general cleanliness works and continuously works to develop the services of the department as they are direct- ly linked to the well-being of people and their health, in addition to maintaining the general appearance of places around the country.

Further, he stressed that Qatar occupies an advanced position among the region’s countries in terms of general cleaning services, among the region’s countries in terms of general cleaning services, quality of places around the country, and the introduction of the shaded pushcarts in a considerable development in this area.

The new carts have a notable design with high technical specifications, include being lightweight and easy to maneuver, providing ergonomic support to help the workers carry out their tasks efficiently and with ease, according to an MME statement.

Qatar regulator prepares for future telecom requirements

The Communications Regulatory Authority (CRA) participated in WRC-19, the World Radiocommunication Conference, held in Sharm El Sheikh, Egypt, from October 24 to November 17, 2019.

This conference is one of the most important conferences on the International Telecommunication Union (ITU) calendar.

The agenda considered several important items, which have been included based on the proposals submitted by the member states, the study reports of the Study Group, and the report of the Conference Preparatory Meeting, and what needs to be taken into consideration for the existing and future services.

The CRA submitted a number of contributions to the conference, related to several topics, including the CRA contributed with 26 documents as part of the Arab Regional group in addition to eight separate documents submitted in all of Qatar’s related nationwide services of interest to Qatar. The CRA’s contributions were welcomed by a large number of European and African administrations, especially the European Commission which expressed its appreciation for the frequency allocation that support number of modern technologies and applications and contribute to the digital transformation and achieving one of the Sustainable Development Goals: industry, innovation and infrastructure.

Thanks to the CRA, during the conference, the introduction of high-speed facilities, the future of the digital revolution; Professor Donald Love, Sidra Medicine; and Professor Ihab Younis, Carnegie Mellon University; Dr. Sheng Gao, Erasmus University in the Netherlands, delivered a keynote address on how genomic studies are increasingly influential in the study and application of genomic medicine.

Dr. Sheng Gao’s talks were well-received by people and their health, in addition to maintaining the general appearance of places around the country. The new carts have a notable design with high technical specifications, including being lightweight and easy to maneuver, providing ergonomic support to help the workers carry out their tasks efficiently and with ease, according to an MME statement.
Qatar’s reforms to improve workers’ conditions hailed

She noted that many United Nations Special Rapporteurs had visited Qatar and some of them would subsequently visit it, continuing the overall commitment of Qatar to human rights issues, adding that there was a balance between the respect that had been imposed and the challenges and additional reforms expected to be implemented.

She pointed out that Qatar, through hosting the 2022 World Cup, has demonstrated a high level of commitment of the state to all issues related to the visit. In that context, she cautioned that other countries visiting would subsequently visit it, confirming the overall commitment of Qatar to human rights issues, adding that there was a balance between the respect that had been imposed and the challenges and additional reforms expected to be implemented.

At least 24 killed as bus plunges off cliff in Tunisia

Tunisian roads are known to be dangerous, with tens of thousands killed on them every year. On Tuesday, a bus carrying 43 people plunged over a cliff, killing at least 24. The bus was on its way from Nablus to the picturesque mountain region of Ain Snoussi. The passenger and driver remained trapped for several hours before they were rescued. The official toll could rise as some of those missing were Tunisian tourists.
**Nigerian farmers hope to spread shea butter wealth**

By Ikim Efiong, AFP

Nigerian farmers hope to spread shea butter wealth

---

The shea tree is thought to have originated in central Africa, where it has been cultivated for thousands of years. The fruit of the tree is used to produce shea butter, which is high in vitamins and minerals and is used in a variety of products, including skincare and cosmetics. The butterfly is a symbol of change and transformation, which is fitting for the story of the shea butter industry in Nigeria. The shea butter market is expected to grow significantly in the coming years, with demand for the product increasing both domestically and internationally. The farmers who grow and extract the shea nuts are at the heart of this industry, and their efforts are essential for its success.

Two children were found dead on Saturday morning in Arizona. The children were found unresponsive in a car while crossing a street near their home. Rescue workers were unable to revive the children. The cause of death is under investigation. Rescue workers continued searching for the children's parents, who were last seen in the area. The children were found by a passerby who noticed the car pulled over on the side of the road. The parents have been charged with manslaughter and child abuse. The children were 5 and 7 years old. The investigation is ongoing.

The US Supreme Court is weighing a challenge to New York gun transport limits. The case involves a New York resident who was denied permission to transport his handguns outside the state. The gun owner, Joseph Smich, argues that the state's transport rules violate his Second Amendment right to keep and bear arms. The court is expected to issue a decision next week. The case could have implications for gun rights advocates nationwide.

The White House has faced criticism for its handling of the impeachment proceedings. House Speaker Nancy Pelosi recently said that the White House was uncooperative and obstructing the investigation. The White House has said that it is fully cooperating with the investigation. The case is expected to come to a head when the House votes on the articles of impeachment next week.

Florida citrus farmers have seen a drop in orange production due to the citrus greening disease. The disease is caused by the Asian citrus psyllid and the bacteria Candidatus Liberibacter. The disease has been spreading across the state, causing significant economic losses to the citrus industry. The federal government has provided funding for research and development to combat the disease. The citrus industry is working with universities and government agencies to develop new strains of oranges that are resistant to the disease. The case is expected to come to a head when the House votes on the articles of impeachment next week.

Dhaka plans to ban e-cigarettes amid growing health concerns

Bangladesh will ban e-cigarettes amid growing health concerns, the government has announced, following a petition from a non-governmental organization that called for a ban on the sale and use of e-cigarettes.

A ban on e-cigarettes in Bangladesh follows a similar move by several other countries around the world. The decision is expected to be announced by the health ministry on Monday.

The government has been under pressure to act on the issue for some time, with reports indicating that e-cigarettes are becoming increasingly popular among young people.

The move is likely to be welcomed by health advocates, who have long campaigned for a ban on e-cigarettes, citing concerns over their health impacts.

However, the move may also face opposition from some quarters, with some arguing that e-cigarettes can help smokers quit traditional cigarettes.

As a result of the ban, e-cigarettes will be illegal to buy, sell, or use, and any possession or distribution of e-cigarettes will be punishable by law.

Bangladesh joins growing list of countries to ban e-cigarettes

Several countries have already banned e-cigarettes, including the United States, the United Kingdom, and Australia, among others.

In Bangladesh, the ban will be effective from Monday, with the health ministry announcing that it will be enforced from that date.

The move is part of a broader effort to combat tobacco use in the country, where smoking and the use of traditional cigarettes are widespread.

The government has also announced plans to increase taxes on tobacco products, in an effort to discourage people from using them.

Despite these efforts, tobacco use remains a significant health problem in Bangladesh, with high rates of smoking and the use of traditional cigarettes.

The ban on e-cigarettes is expected to help reduce the number of people using these products, and to contribute to the overall decline in tobacco use in the country.
Hong Kong protesters return to streets

Police fired tear gas and pepper spray at thousands of black-clad protesters as they flooded into the streets, a week after pro-democracy demonstrators scored a landslide local election victory.

The wounds of the summer-long protest movement remain raw, and a sense of uncertainty is back, just as the election results showed.

New South Wales rolls out cell phone detection software

"It's a system to change the culture," NSW Police Inspector-Commander Michael Corfield told Australian media.

The Netherlands launched a nationwide system in October driving 24-hour (€200) for illegal use of mobile phones, according to a statement on a Dutch police website.

In both cases, drivers will also be given a warning notice, with some voicing concerns about invasion of privacy.

China introduces mandatory face scans for phone users

China's government has pushed to enact new registration for phone users since at least 2013—meaning ID cards or passports are required to be used with phone numbers.

In December, the country's real-name registration for phone users since at least 2013—meaning ID cards or passports are required to be used with phone numbers.

A former prisoner has been named as the second person interviewed to take down the perpetrator of the London Bridge attack, having told police he was aware of the attacker’s plan.

The former prisoner, who is named as Matthew Barlow, told police he had been released from prison in the London area on Friday and had been aware of the attacker’s plan.

He told police he had been released from prison earlier this year and had been told by the attacker that he was planning to attack a prison officer.

Barlow said he had warned police about the plan and had been arrested.

Police are now appealing for information from anyone who may have seen the attacker or heard about the plan.

The police are also appealing for anyone who may have information about the attack to come forward.

The attack took place on London Bridge, where a police officer was killed and three members of the public were injured.

The attacker, named as Usman Khan, was later tackled by members of the public and arrested.

Police are still investigating the attack and have named Khan as the suspect.

The attack has been described as a terrorist incident.

The incident came two years after the 2017 London Bridge attack, which saw a terrorist attack on the bridge.

The attack on London Bridge was the latest in a series of terrorist incidents in the UK, including the 2017 Manchester Arena attack, the 2019 London Bridge attack, and the 2021 Westminster Bridge attack.

The UK is currently on high alert for terrorist attacks, with police and security services working around the clock to prevent further incidents.

The attack on London Bridge has prompted a review of security measures in place in the UK, with the Government announcing plans to increase security measures in public places.

The UK government has also announced plans to introduce new measures to tackle terrorism, including increased police powers and changes to the way terrorist suspects are handled.

A former prisoner has been named as the second person interviewed to take down the perpetrator of the London Bridge attack, having told police he was aware of the attacker’s plan.
EU leaders take office touting ‘green ambition’

**Humanity’s ‘war against nature’ must stop: UN chief**

The UN chief’s comments come amid growing recognition of the threat posed by global warming and climate change, which is seen as a key issue in the run-up to this year’s United Nations climate conference in Madrid, known as COP25.

**Malta’s ruling party MPs back PN**

Malta’s prime minister, Joseph Muscat, has called on his party’s MPs to support the government’s decision to ratify the Paris Agreement on climate change, saying that the country needed to be a part of the international effort to combat global warming.

**Germany’s ruling coalition on collision course after SPD vote**

Germany’s three coalition partners – the Christian Democrats (CDU), the Social Democrats (SPD) and the Green Party – have failed to agree on a new budget for 2020, with the SPD announcing that it will vote against the budget unless it includes a significant increase in social spending.

**Moscovitches turn to vampires to boost vaccination rates**

In Moscow, a rare outbreak of the West Nile virus has led to the government rushing to vaccinate residents, with a team of vampire-like figures dressed in black suits and carrying fake syringes touring the city to dispense vaccinations to the population.

**Lenders call for stop to pro-growth policy as US economy faces pressure**

US banks and financial institutions are calling for a slowdown in the US economy, warning that the country is at risk of a recession in the coming months.

**Europe to increase investment and climate policies**

The European Union is expected to announce a new plan to boost investment and climate policies, with a focus on cleaner energy and sustainable growth.

**Italy’s League calls for fresh elections**

Italy’s far-right League party has called for early elections, citing rising popular support and what it sees as a lack of progress in the country’s political and economic issues.

**Europe, humanity’s ‘war against nature’ must stop: UN chief***

In an interview with the European and International Press, the UN chief expressed concern over the world’s failure to address the global climate crisis, saying that humanity’s “war against nature” must stop.

**Malta’s prime minister faces pressure to quit amid a crisis of confidence**

Malta’s prime minister, Joseph Muscat, faces growing pressure to resign after his government was implicated in a series of corruption scandals, with a new investigation launched into allegations of kickbacks and illegal payments.

**Germany to offer €300 million in aid to the Sahel region**

Germany announced on Monday that it will provide €300 million in aid to the Sahel region, with the money to be used to support development projects and security operations in the region.

**Moscovitches turn to vampires to boost vaccination rates**

In Moscow, a rare outbreak of the West Nile virus has led to the government rushing to vaccinate residents, with a team of vampire-like figures dressed in black suits and carrying fake syringes touring the city to dispense vaccinations to the population.
Dillih Deputy Chief Minis- ter Manish Sisodia yesterday accused the Centre of consciously creating a shortage of onions to profit at the Delhi government’s expense.

Addressing the media along with Chief Minister Arvind Kejriwal, Sisodia said: “We have to stop hoarding. We have to sell onions at subsidised rates.”

The Delhi government also accused the central government about the provision of onions on a daily basis at the Delhi government’s expense.

However, the central government released three-truck loads of onions to Delhi instead of two truck loads, which were released by the central government to the Delhi government.

The rally, coming two days before the four remaining phases of the Delhi Assembly elections, put the BJP on the defensive.

According to chief minister’s spokesman, the Delhi government has signed a contract with the Central government to provide onions from various countries, including Turkey, to the consumer’s door.

The price, according to the market, the price of onions in Delhi was Rs 120-125 per kilogram on November 17, whereas, the price of onions in Delhi was around Rs 100 per kilogram on November 12.

14 people killed in bloody northern Mexico gunfight

Two American climbers died in a northern Mexican gunfight, the latest in a string of violent incidents that have rattled the country and displaced thousands.

The collapse on October 12 of a rehabilitation community in the small town of Villa Unión, Coahuila, displaced thousands of residents. The authorities in the town of Villa Unión, in the northern state of Coahuila, said that the collapse appeared to have been caused by illegal mining operations.

The collapse came as the town was preparing to mark the 100th anniversary of the Mexican Revolution. The government has been working to reduce violence in the state, but the incident highlights the ongoing challenges in the region.

A military operations chief under Donald Trump said that the United States would withdraw troops from the border with Mexico, citing the need to focus on the opioid crisis and other issues.

The move comes as Mexico faces a surge in violence, with more than 20,000 deaths reported so far this year. The border region has been a hotspot for drug trafficking, and the United States has been sending troops to help stem the flow of drugs.

The decision by the Trump administration to withdraw troops was likely to be welcomed by Mexico, which has been seeking to reduce its reliance on US military aid.

The government of Mexico has been working to improve border security, but it has struggled to address the root causes of violence, such as poverty and inequality.

Islamabad

Prime Minister Khan was very concerned over the ECP members. He appealed to the Chief Justice to solve this matter as soon as possible.

Tehreek-i-Insaf (PTI) and the Pakistan Tehreek-i-Insaf (PTI) and the Pakistan Tehreek-i-Insaf (PTI) and the Pakistan Tehreek-i-Insaf (PTI)

Funding case and other matters

ECP members, also challenged in the IHC the appointment to a parliamentary committee for hearing and consideration. The IHC had passed a detailed judgment in the case of Jadoon.

He expressed the hope that the issue of the army chief would be resolved in a positive manner. He also hoped that the issue of the ECP members would be resolved.

It may be mentioned that an amendment to Article 243 of the Constitution, which defines the process of removing the army chief, was proposed in Parliament in 2011.

The ECP contended that the ECP had refused to administer the oath to Siddiqui and Kakar, who were appointed as members of the commission.

It is the government's responsibility to provide security to all the lawmakers, whether they are in office or not. If someone is heading towards the opposition, it means that person is heading towards violence, which is not desirable.

The students' frustration is that the government is not doing enough to address the issues of the youth. The youth is very sure that there is no future, they are very sure that their future is not bright.

Student organisations played a major role in the struggle for democratic change. The students' strength and courage have become an inspiration for many.

If the students have the right to demand the removal of the army chief, the government should have the right to withdraw the appointment of the army chief.

The students' struggle is not only for their own rights, but also for the rights of the future generations. The students' struggle is for the future of our country.

If the students have the right to demand the removal of the army chief, the government should have the right to withdraw the appointment of the army chief.

The students' struggle is not only for their own rights, but also for the rights of the future generations. The students' struggle is for the future of our country.

If the students have the right to demand the removal of the army chief, the government should have the right to withdraw the appointment of the army chief.

The students' struggle is not only for their own rights, but also for the rights of the future generations. The students' struggle is for the future of our country.

The students' struggle is not only for their own rights, but also for the rights of the future generations. The students' struggle is for the future of our country.

**Duterte dares Robredo to release drug war discoveries**

By Catherine S Valente

President Rodrigo Duterte dared former Vice President Mar Roxas to go to the embassy of the United States to release drug war discoveries during her brief stint as co-chairman of the Inter-Agency Committee on Anti-Illegal Drugs (ICAD).

"You seemed to be threaten- ing that you have many things to uncover," he added, quoting Robredo that she is still talking about discoveries. "Duterte said he added, "She's been always talking."

"He added, "How long is she there? She's threatening that you have many things to uncover."

Duterte added that Robredo is a co-chairman of the Inter-Agency Committee on Anti-Illegal Drugs. "You must be because you think you have any invention, any invention you press out in the so many days that... how long is the time? She's been always talking," Duterte said during his television program "Duterte Daily" Monday.

"I don't like about it in the first thing that she's going to talk about is how long she's been there."

"[Robredo] is a co-chairman of the Inter-Agency Committee on Anti-Illegal Drugs. She has not been there for some months."

Doha emerges as a turnaround hub for cruise tourism

Qatar’s cruise tourism sector has received a quantum boost with Doha emerging as a turnaround port last week. It was a momentous occasion when Costa Diadema, the flag-ship of leading Italian company Costa Cruises, docked at Doha Port for the first time on Wednesday, marking the first of 16 turnaround calls that will make the country’s cruise tourism sector even more attractive, creating a turnaround hub. Doha emerges as a result of an agreement signed between QNTC and Costa Cruises in September last year to develop cruise tourism in Qatar. With a capacity of 4,974 passengers and over 1,200 crew members, Costa Diadema is the latest addition to the fleet of Costa Cruises launched in 2014 and is currently the largest vessel flying an Italian flag. Qatar has multiple advantages that make it a perfect turnaround hub. The expanded network of Qatar Airways connecting over 165 destinations worldwide provides visitors with stress-free travel to and from the cruise port. For example last Wednesday, passengers from seven destinations across six countries across Europe were able to arrive in Doha in the morning on board flights landing within a span of less than two hours, and passengers from some countries also enjoyed a speedy immigration process at the five-star Hamad International Airport. Running parallel to the cruise season is an exciting weekly calendar of events featuring FIFA Club World Cup 2019 matches, music concerts by global artistes and numerous retail, travel and hospitality promotions that the cruise passengers will be able to enjoy during their stay in Qatar. As the cruise season grows, thousands of jobs and business opportunities are created. In a span of 4 years, the number of cruise passengers and 100% growth in the number of cruise ships, with over 340,000 passengers arriving aboard 64 ships, including 38 mega ships, which typically carry between 3,000 and 4,500 passengers and crew. The 2019-20 season is expected to be even bigger, with over 185,000 passengers arriving aboard over 110 cruise ships, reaching full marks. Five ships make their maiden calls to Doha this season. In addition to the 16 turnaround calls, it is also the first season when nine ships will be staying overnight at Doha Port, giving the passengers ample time to explore the destination’s offerings. Also 45 ships are making turnaround calls during this season.

While welcoming Costa Diadema at Doha Port, HE the Minister of Transport and Communications Jasim Althani Al-Nuaimi observed that turnaround voyages contribute significantly to the country’s economy and strengthen the tourism sector. In addition to visiting spending, the growth in Qatar’s cruise tourism is also contributing to the country’s economy through cruise line port services and maintenance.

As the cruise season grows year on year, thousands of jobs and business opportunities are created. QNTC secretary general and Qatar Airways Group chief executive HE Akbar Al Baker stated that receiving Cruises would not only contribute to the growth of Qantas’s cruise tourism, but will also support the hospitality sector as thousands of jobs will be created and business initiatives in the region will grow, especially in Doha. The growth in Qatar’s cruise tourism is also remarkable growth in spending, the growth in Qatar’s cruise tourism is also a result of various initiatives by Qatar National Tourism Council (QNTC) and its partners. Qatar’s cruise industry has seen remarkable growth over the last few years. The 2018-19 season had a 46.5% growth in the number of cruise passengers and 100% growth in the number of cruise ships, with over 340,000 passengers arriving aboard 64 ships, including 38 mega ships, which typically carry between 3,000 and 4,500 passengers and crew. The 2019-20 season is expected to be even bigger, with over 185,000 passengers arriving aboard over 110 cruise ships, reaching full marks. Five ships make their maiden calls to Doha this season. The billionaire problem

The ongoing research of Dr. Markus Mutter at Brown University and his colleagues has revealed that approximately 1% of the adult population in the United States suffer from an eating disorder.

For those individuals, the consequences of their condition can be severe, leading to a wide range of physical and mental health issues. In the most severe cases, eating disorders can result in life-threatening conditions such as malnutrition, dehydration, and heart failure.

It is estimated that approximately 1 in 20 adults in the United States suffers from an eating disorder, with women being more affected than men. However, the prevalence of eating disorders is highest among young women, with rates as high as 1 in 10 in some studies.

Eating disorders can have a significant impact on an individual's quality of life, including difficulties in social and professional relationships, and a decreased ability to engage in daily activities.

It is important to recognize the signs and symptoms of eating disorders and to seek professional help if you or someone you know may be struggling. Early intervention can make a significant difference in improving outcomes for those affected by eating disorders.
QM unveils Qatar-India photographic exhibition

By Joey Aguilar

Qatar Museums (QM) unveiled yesterday its photographic exhibition “Where Cultures Meet: A Photo Exhibition Between Qatar and India” as part of the Year of Culture programme. The exhibition opened at Katara – the Cultural Village to coincide with the Qatar-India 2019 Year of Culture.

Qatari Diar’s Anantara-Tozeur Resort project in Tunisia. Indian ambassador P Kumaran is seen with photographers Hamad al-Shamari, Aisha al-Attiya, head of the Qatar Museums (QM) development and Hamad al-Shamari

The five-star hotel, owned and developed by Millennium Hotels and Resorts, is located on the edge of the Old Heritage Heart of Doha, 24km from Hamad International Airport, Anantara Tozeur Resort is the first Anantara hotel in the Western Sahara Desert.

As part of Qatar-India 2019 Year of Culture, two Qatar photography speakers Hamad al-Shamari and Aisha al-Attiya travelled to the historical region of Ladakh in India for two weeks. The aim was to create aosting portfolio that will help foster mutual understanding and cultural relations between the two countries.

Alongside two Qatari-based photographers, Anantara Tozeur Resort owner of the Anantara brand, Minor Hotels Group, Bill Heinecke, the Chairman of Minor Hotels Board of Directors, Mad bin Abdulaziz al-Kuwari, Member HE Akbar al-Baker and HE Dr Hamad bin Abdulaziz al-Kuwari leads the grand opening of Park Hyatt Doha

The grand opening of the five-star hotel, owned and developed by Millennium Hotels and Resorts, was attended by Qatari Diar’s chairperson HE Sheikha Al Mayassa bint Hamad bin Khalifa Al-Thani, Qatari Diar’s CEO, Joaquim de Almeida, and Msheireb Properties, bringing timeless tradition and heritage to build for the present and future generations.

Commenting on the exhibition, Aisha al-Attiya, head of Year of Cultures of Qatari Diar’s, “The annual photographic exhibition is an important milestone in the Year of Culture programme. It is driven by the objective of seeking similarities with partner countries and culminates in the exhibition between our two cultures and perspectives. We hope that the trip to Ladakh will continue to inspire Hamad al-Shamari and Aisha al-Attiya to display all that many years to come.”

Under the leadership of its chairperson HE Sheikha Al Mayassa bint Hamad bin Khalifa Al-Thani, Qatari Diar developed the “Year of Culture” initiative – an annual international cultural exchange programme designed to deepen understanding between cultures and economies. Through the format programming, various activities include cultural and creative projects, as well as cross-cultural exhibitions held in the two countries, which is a result of this initiative.
