Qatar’s CAA signs agreement with European Aviation Safety Agency

Qatar signed an agreement with the European Aviation Safety Agency (EASA) on the collection and exchange of information on civil aviation safety in accordance with the EU Ramp Inspection Programme. The agreement was signed by HE the Chairman of Qatar’s Civil Aviation Authority Abdulla bin Nasser Turki al-Subaey and Patrick Ky, in the presence of HE the Minister of Transport and Communications Jassim Seif Ahmed al-Sulaiti.

Under the agreement, the CAA is joining the EU Ramp Inspection Programme. The agreement also boosts cooperation and information exchange between CAA and EASA, in addition to providing assurance of the Programme database between the two sides.

The agreement is of great importance in enhancing cooperation among international organisations with extensive experience in aviation safety, thereby helping develop Qatar’s civil aviation industry. The agreement also focuses on air safety and the first to have scored 100% in the overall audit conducted by the International Civil Aviation Organisation (ICAO) on all aspects of air safety in its civil aviation system.

Following the signing ceremony, the ministers had a meeting to review the measures for further enhancing cooperation and exchanging information. The ministers also reviewed means of maintaining environmental integrity in the region and host practices for maintaining.
CRA announces public consultation on Qatar Spectrum Outlook 2022

The Communications Regulatory Authority (CRA) announced yesterday a public consultation on Qatar Spectrum Outlook 2022, with the aim of providing an opportunity for stakeholders to send their views and comments on the draft document “Qatar Spectrum Outlook 2022” by February 20.

The purpose of Qatar Spectrum Outlook 2022 is to provide stakeholders with an overview of CRA’s overall approach and planned activities related to meeting the spectrum requirements for the coming three years. CRA presents its spectrum outlook for the next period 2020-2022. This outlook will become the prioritization of spectrum work in the short- and be updated and reviewed on an annual basis. The consultation on Qatar Spectrum Outlook 2022 is to be completed before 2022.

“IT is a true pleasure to share the three-year spectrum outlook of CRA, with the stakeholders and interested parties in Qatar. This document will provide the CRA with the comments that assist and ensure the best and most efficient use of radio spectrum, through the integration of the international best practice and provide CRA with the suggestions that contribute to promoting the public policy objectives of Qatar,” CRA President Mohamed Al-Mannai.

Al-Mannai invited the stakeholders and interested parties in Qatar to review the document and provide CRA with the comments that assist and ensure the best and most efficient use of radio spectrum, through the integration of the international best practice and provide CRA with the suggestions that contribute to promoting the public policy objectives of Qatar.

The purpose of Qatar Spectrum Outlook 2022 is to provide stakeholders with an overview of CRA’s overall approach and planned activities related to meeting the expected spectrum requirements in relation to the spectrum, including the national frequency allocation plan, changes or advancements, user demand, technology and international policies. CRA has taken these factors into consideration and included it in its proposed work plan in accordance with the national frequency allocation plan, including the national frequency allocation plan and the international harmonization of radio spectrum, and relevant national or international policies. CRA has taken these factors into consideration and included it in its proposed work plan in accordance with the national frequency allocation plan and the international harmonization of radio spectrum, and relevant national or international policies.

The document outlines the CRA’s approach to spectrum management in the short term and to be completed before 2022. It is a true pleasure to share the three-year spectrum outlook of CRA, with the stakeholders and interested parties in Qatar. This document will provide the CRA with the comments that assist and ensure the best and most efficient use of radio spectrum, through the integration of the international best practice and provide CRA with the suggestions that contribute to promoting the public policy objectives of Qatar.

Furthermore, it provides an overview of CRA’s plans to address issues related to access to spectrum and enabling new technologies, and to make resources available to support telecommunications services and applications that are expected to require new or additional spectrum in the short term during the hosting of the 2022 FIFA World Cup. The document will open interested parties with an overview of CRA’s plans to address issues related to access to spectrum and enabling new technologies, and to make resources available to support telecommunications services and applications that are expected to require new or additional spectrum in the short term during the hosting of the 2022 FIFA World Cup. The document will open the doors of its three-year spectrum outlook to interested parties in Qatar and all stakeholders and interested parties with an overview of CRA’s plans to address issues related to access to spectrum and enabling new technologies, and to make resources available to support telecommunications services and applications that are expected to require new or additional spectrum in the short term during the hosting of the 2022 FIFA World Cup. The document will open the doors of its three-year spectrum outlook to interested parties in Qatar and all stakeholders and interested parties.

The document will open the doors of its three-year spectrum outlook to interested parties in Qatar and all stakeholders and interested parties. This includes the most important difficulties faced by countries in delivering education for all.

Qatar participates in World Education Forum in London

Qatar is participating in a delegation headed by His Excellency the Minister of Education and Higher Education Dr. Meshal bin Hamad Al-Thani in the World Education Forum being held in London, currently.

The theme of this year’s Forum is “One generation – One generation – What does it take to transform education?”. They will also discuss the challenges that co-operation and community participation can bring and how to develop and shape policies to address educational problems at the local and international levels.

The forum also discusses the challenges of transforming education, through the Programme for International Student Assessment (PISA) and long-term solutions to address these challenges. This includes the most important difficulties faced by countries in delivering education for all.

The document outlines the CRA’s approach to spectrum management in the short term and to be completed before 2022. It is a true pleasure to share the three-year spectrum outlook of CRA, with the stakeholders and interested parties in Qatar. This document will provide the CRA with the comments that assist and ensure the best and most efficient use of radio spectrum, through the integration of the international best practice and provide CRA with the suggestions that contribute to promoting the public policy objectives of Qatar.
Education Ministry, QF organise vocational guidance forum

The Ministry of Education and Higher Education organised the first vocational guidance forum, which was attended by the Education Ministry, Qatar Foundation (QF) and institutional representatives. The forum was a success in achieving its goal of providing guidance to students in the northern cities, and it was the first of its kind in the country.

The forum, held at Al Khareej Secondary School for Girls, aims at familiarising students, their parents, schools, and universities with the labour market and to help them identify specialisations available in the country. The forum focused on guiding students by introducing them to the most important activities anticipated in the future, as well as the roles and responsibilities of different governmental and non-governmental companies and areas of employment and future desired professional opportunities. The forum was also aimed at changing the perceptions of students to enrol in high schools that are better suited to their qualifications and their capacities to participate in building and advancing their homeland.

Director of Al Khareej Secondary School for Girls explained that the forum was a success in achieving its goal of providing guidance to students in the northern cities, and it was the first of its kind in the country. She emphasised the importance of high schools in the northern cities providing an opportunity for students to learn about the available fields of work and the labour market and current and future desired professional opportunities, training and qualification. She highlighted Qatar’s efforts to care for its citizens, achieve eff ectiveness, and mobilise all resources, technology development and financial resources, to complete its study of the said government. She also highlighted Qatar’s commitment with its commitment to achieve eff ectiveness. She noted that this means no one is left behind.

**Winners Colors:** are available for collection from Room No. 29, 2nd Floor, Al Madam Health Centre, Street No. 19, Al-Muhannadi, Doha. The colors can be collected by visitors to the forum, or by high school representatives. The colors can be collected by high school representatives. The colors can be collected by high school representatives.

Doha Bank to hold Al Dana Green Run on February 15

Doha Bank, in collaboration with Qatar Sports for All Federation, Ministry of Culture and Sports, and Qatar National Library, will host the 15th edition of the Al Dana Green Run on February 15, 2020, at Aspire Park.

The event will take place on Friday, with Nasser Bin Khaled, CEO of Nasser Bin Khaled Group, and Talal A. Abu-Ghazaleh, chairman of Talal Abu-Ghazaleh Organization, in attendance. The event will also feature a drawing competition and an exhibition of rare manuscripts and printed literature, as well as a session on the role of higher education institutions in countering violent extremism.

Officials from Doha Bank and Qatar Sports for All Federation after announcing the fifteenth edition of Al Dana Green Run.

The event is part of Doha Bank’s commitment to support and promote community initiatives and responsibilities, particularly in the field of education and environmental sustainability. The bank has been a gold sponsor of the event in previous editions.

Show of unique manuscripts, books opens at QNL

The Qatar National Library (QNL) has launched a show of rare manuscripts and printed literature from the Angelica Library of Doha, Qatar National Library, and the Angelica Library in Rome, Italy, the source of the Angelica Library in Doha.

The exhibition, which is part of the Qatar National Library’s mission to preserve and promote both modern and historical knowledge, opened on Sunday, January 26, 2020, and will run until February 29, 2020.

The collection includes works from the Angelica Library, which is located in what was the medieval complex of the Sant’ Agostino in Rome.

The different Arabic manuscripts and printed literature on display represent a new attitude that accrued between the 16th and 17th centuries, which was an excellent example of the Islamic civilization.

The event was co-organized with the Angelica Library of the University of Rome, which was founded in 1524 and is one of the oldest libraries in the world.

The exhibition also celebrates the support of digital means to scholarly projects, and no registration is required.

HBDK hosts high-level roundtable in New York

Hofstra University’s (HUB) Center for peace Education, in collaboration with Qatar Sports for All Federation at the Qatar National Library, will host a high-level roundtable discussion on the role of higher education institutions in countering violent extremism.

The event will take place on Wednesday, January 29, 2020, at Hofstra University’s Goldstein Visitors Center, with Nasser Bin Khaled, CEO of Nasser Bin Khaled Group, and Talal A. Abu-Ghazaleh, chairman of Talal Abu-Ghazaleh Organization, in attendance.

The roundtable will be moderated by Dr. Ahmad M. Hasnah, president of Hamad Bin Khalifa University, who will highlight the importance of higher education in countering violent extremism and the role of higher education institutions in promoting a culture of peace and understanding.

The panel will include representatives from various countries, such as the United States, the United Kingdom, and Qatar, and will feature a discussion on the role of higher education institutions in countering violent extremism, as well as the challenges and opportunities facing the educational sector.

The event is part of Doha Bank’s commitment to support and promote community initiatives and responsibilities, particularly in the field of education and environmental sustainability. The bank has been a gold sponsor of the event in previous editions.

Children go missing as migrants clash with Mexican border forces

MEXICO

Six-year-old Jenifer Garcia, center, cries as she and her parents search for a missing child while a group of migrants clash with Mexican authorities in the border town of Tijuana, Mexico. Jenifer's parents said they were looking for their 4-year-old daughter, who was taken from them by a group of migrants who tried to enter the United States. The migrants had been overwhelming border agents and police, and the authorities were trying to clear the border area. Jenifer's parents said they feared their daughter might have been taken by the migrants.

Clinton says he'll 'be a lot tougher' on Russia

WASHINGTON

President Donald Trump on Tuesday said he would "be a lot tougher" on Russia than his predecessor, while defending his administration's approach to the former Cold War adversary.

"I think Russia is a very powerful country," Trump said in an interview with the conservative news website RealClearPolitics. "They have a very strong economy and they're doing a lot of good stuff." Trump said he would work to "be a lot tougher" on Russia, but he did not specify what that might entail.

Trump also repeated his criticism of the Russia investigation, saying it was "phony" and "totally fake news." He added that it was a "disgrace" that the FBI had opened an investigation into his campaign's Russian contacts.

The president has previously said he believes Russia meddled in the 2016 election, but he has not offered evidence to support that claim.

Trump's comments come as the Russia investigation, led by special counsel Robert Mueller, continues to probe allegations of Russian interference in the election and potential coordination between Trump's campaign and the Russian government.

Mueller has interviewed dozens of witnesses and obtained thousands of documents as part of his investigation. He has not publicly commented on his findings or said when his work will be complete.

Trump has repeatedly called the investigation a "hoax" and has expressed frustration with the probe. He has also hinted that he might考虑 firing Mueller, but he has not followed through on that threat.

The Russia investigation is one of several probes into potential wrongdoing by Trump and his associates. Mueller is also leading an investigation into potential obstruction of justice by Trump, and a grand jury has also been looking into possible obstruction of justice and other crimes.

Mueller has made it clear that he is not seeking to litigate the president's case and has said that he will not charge Trump with a crime.

The president has repeatedly denied any wrongdoing and has said that he has "totally exonerated" himself. He has also said that he has "total and complete authority" to fire Mueller at any time.

Trump's comments come as the Russia investigation continues to dominate the political landscape and as the midterm elections come closer.

The president has been criticized for his handling of the Russia investigation and for his efforts to undermine the probe. He has also faced criticism for his handling of the country's foreign policy and his handling of immigration issues.
Asia steps up checks as China virus kills six, infects over 300

**China**

Beijing (AFP) – China confirmed late Monday six virus deaths and over 300 additional infections amid rising fears that a virus spreading from the central Chinese city of Wuhan has killed six, infected over 300 and prompted authorities to take drastic measures to contain it.

Fears of a bigger outbreak rose as China and in other countries. A virus, which was first reported in the central Chinese city of Wuhan, has quickly spread to multiple countries and the WHO has called an emergency session today.

China has also registered cases at airports to detect the Sars-like coronavirus, and regional governments have started to confirm cases as well.

In Malaysia yesterday, officials confirmed late Monday a third case of the disease, bringing the total number of infections to 14. Malaysia is the latest country, besides China, to report the virus.

The virus has spread to at least 13 countries including Singapore, Thailand, Taiwan, Vietnam, Japan, South Korea, Russia, Australia, India, the Maldives, and the United States.

Fears of a bigger outbreak rose as the virus has killed six and infected over 300 people, prompting authorities to take drastic measures to contain it.

China has also registered cases at airports to detect the Sars-like coronavirus, and regional governments have started to confirm cases as well.

Laws cannot be implemented through threats, says BJP leader

Dr Babul Supriyo, Minister of State for Development of North Eastern Region, said on Tuesday that the prospects of a long-term solution to the Kashmir dispute were slim.

"We have to be pragmatic and realistic," Supriyo said. "We have to understand that the Kashmir issue is not just about political solutions, it is also about economic solutions. We need to work on both fronts to achieve a just and peaceful resolution."
Disgruntled PTI lawmakers form ‘grievance cell’

**Interviews**

T he Election Commission has fined the PTI’s MPA from North Sheikhupura, Sardar Shahabuddin, Rs10,000 for not submitting the membership of a Member of the Provincial Assembly (MPA) to the Prime Minister within the prescribed time limits.

Shahabuddin had been elected as MPA on the PTI ticket from PP-231 (Lahorwala-I), and it has been reported that 20 MPAs have joined hands to remove Shahabuddin as an “incompetent” party leader. Shahabuddin has been issued a notice for not submitting his yearly asset details.

According to Section 54 of the Local Government Ordinance 2001, the members of the National Assembly, senators, members of the Provincial Assembly (MPAs) for not filing their statements of assets and liabilities filed by the ECP bars lawmakers from participating in the proceedings.

Shahabuddin has denied that he had not submitted his papers and claimed that he had not received any notice from the ECP. The ECP has restored the membership of Shahabuddin, who had been elected to the NA as a PTI candidate from Lahore-IV, to the NA. The ECP has clarified that it had increased the fine to Rs10,000 from Rs10,000.

**Interviews**

ECP restores the membership of 66 lawmakers

The Election Commission has restored the membership of 66 lawmakers who had not submitted their asset declarations to the Prime Minister on November 30, 2020, as required under the Anti-Money Laundering Act (AMLA).

**Panelo calls for review of varity tech deal**

President Rodrigo Duterte has ordered his administration to review the government's deal with the state-owned China National Tobacco Corporation (CNTC) for the construction of permanent evacuation centres in the provinces affected by the Taal volcano eruption. The president said he was concerned about the deal with CNTC, which was signed by his predecessor, Benigno Aquino III, in 2016. Duterte said he would appoint an independent body to review the deal before giving his final approval.
The world's last gasp past its warmest decade on record. According to the State of the Ocean and the National Oceanic and Atmospheric Administration, 2019 was the second-hottest year on record, trailing only 2016. Sure, the findings were not without their share of problems; and across the financial world, central banks, policymakers and financiers have already begun reining in global co-ordination ranging from government policy to financial regulation.

The number of extreme weather events has quadrupled over the last 40 years. Only 4% of the financial losses caused by weather disasters were covered by new policies now available. In Asia it's 4% and in Africa only 9%.

Central banks can't be expected to save the world from climate change, the Bank for International Settlements said on Monday, urging instead global co-ordination ranging from government policy to financial regulation.

The 2019 Paris Agreement on global warming among almost 200 countries brought together the developed and developing worlds to pledge limits on pollution that cause climate change. The voluntary and non-binding agreement, which would hold the rise in the temperature to below 2°C, is seen as a milestone of almost this century, to avoid the rising seas and superstorms that are now a reality.

But not enough has been done. Human activities are estimated to have caused about 1°C of warming and to have a level of warming at that of about 3°C per day. The UN World Meteorological Organisation reported last year that global temperatures on land are up to 3°C by the end of the century, in contrast to the 2°C target set at the last round of 2°C.

There are some silver linings, too. In addition to the Paris accord, there's also been a global grassroots movement that has taken the form of street protests, green finance, efforts to decarbonize industries such as agriculture and steel, a diversification push to pressure energy companies to adopt greener ways, and even a climate change policy in Africa.

The Global Carbon Disclosure Project, or GCP, encourages companies, cities and states to disclose and manage their environmental impacts. The data is used by shareholders and other stakeholders which can help reduce greenhouse gas emissions.

“Up to a quarter of global GDP of $80tn currently at risk from CO2 emissions.”

The European Union, and particularly Germany, has yet to deliver on the promise of the United States’ “back out of the Paris Agreement” promise. The recent agreement on market access from China, together with financial and energy support, has helped the EU to comply. This, combined with a supportive approach to the Paris climate agreement, has helped to improve the climate change situation.

The first is Germany’s relationship with Russia. The country’s energy independence is a major factor in its climate change policy. Germany is keen to become Europe’s economic hub and is keen to avoid any potential conflict with the EU. This is the best example of how the EU is becoming Europe’s economic hub and is keen to avoid any potential conflict with the EU.

The second is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the EU’s efforts to diversify its energy sources. The EU has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The third is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The fourth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The fifth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The sixth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The seventh is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The eighth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The ninth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.

The tenth is the EU’s dependence on Russian gas. The Commission has made it clear that it will support the move towards renewable energy, and has been acting in line with this. The EU has also made it clear that it will support the development of the market for electricity.
Fish oil supplements tied to improved male fertility

By Linda Carroll

Men who consume fish oil supplements, which are rich in omega-3 fatty acids, might enjoy a boost in their sperm count, according to a new study. After examining data from nearly 25,000 men, researchers found that those who took fish oil supplements had healthier sperm overall and more effective treatment for men with infertility.

The study, published in the journal *Fertility and Sterility*, is the first to examine the effects of fish oil supplementation on sperm quality. Researchers analyzed data from two large studies: the Fertility and Sterility (FAS) study, which included 1,542 men with infertility, and the Swedish Fertility Study (SFS), which included 28,561 men.

Lead author Dr. Paul writers: “The composition of the sperm cell membrane is rich in omega-3 fatty acids and is critical for proper sperm function.” He notes that omega-3 fatty acids are known to improve male fertility and could help men who struggle with infertility.

The researchers found that men who took fish oil supplements had higher sperm counts, better sperm motility, and lower rates of abnormal sperm. They also had a lower risk of infertility compared to men who did not take supplements.

The study’s authors suggest that these benefits may be due to the anti-inflammatory properties of omega-3 fatty acids, which can improve sperm function and reduce oxidative stress.

While more research is needed, the findings suggest that fish oil supplements may be a natural and effective way to improve sperm quality and fertility. They could be a valuable addition to fertility treatments and may help reduce the risk of infertility.

It is important to note that the study was observational and does not establish causation. Further research is needed to confirm the findings and understand the mechanisms behind the benefits of fish oil supplementation on sperm quality.
Mattarella and delegation visit National Museum of Qatar

Italian President Sergio Mattarella and his accompanying delegation visited the National Museum of Qatar (NMQR) as part of their visit to Qatar. The president, who was welcomed by NMQR director Sheikha Amna bint Abdulaziz bin Jassim al-Thani, who gave him a tour of the museum's galleries and briefed him on the pieces and collections related to the life and history of the people of Qatar.

While 10 are from Jordan, seven are from Palestine and four from Yemen. Li Col al-Husn explained that the college grants a bachelor's degree in law and police science after four years of study, while the second batch of college students includes 110 from Qatar representing various military entities in the state, and 21 from other Arab countries.

The graduation ceremony was held at the press conference. The director-general of the Training Department, Dr. Jibril Hamoud al-Noaimi, director-general of the Administrative and Military Support Department, Major General Izabled al-Thani, director of the Training Department, and the director of the Administrative and Military Support Department, Major General Izabled al-Thani, director of the Training Department, held the graduation ceremony.

To deliver on that shared vision, the sustainability commitments have been defined: to develop human capital and safeguard workers’ rights; to provide an inclusive tournament experience; to build bridges between cultures and peoples; to accelerate positive social transformation. Our measure of success for the tournament in Qatar will ultimately be the legacy it leaves behind. This strategy will help Qatar realize that the 2022 FIF A World Cup is a unique opportunity to bring about positive change – one that FIF A and Qatar have committed to delivering.

T o deliver on that shared vision, the sustainability commitments have been defined: to develop human capital and safeguard workers’ rights; to provide an inclusive tournament experience; to build bridges between cultures and peoples; to accelerate positive social transformation. Our measure of success for the tournament in Qatar will ultimately be the legacy it leaves behind. This strategy will help Qatar realize that the 2022 FIF A World Cup is a unique opportunity to bring about positive change – one that FIF A and Qatar have committed to delivering.

Qatar, FIF A present 2022 sustainability strategy

From Page 1

For Qatar, the FIFA World Cup offers us a unique opportunity to bring about positive change – one that FIF A and Qatar cannot, and will not, let slip away. All critical topics related to the event have been identified and thoroughly addressed in the strategy, including human rights, non-discrimination and environmental protection. This document is also in line with the UN’s sustainable development goals, and we are committed to contributing to those through the power of football and all of the biggest stakeholders in the game.

The Institute of Art Studies, Department of Art History, has been announced. A press conference was held at the press conference. The director-general of the Training Department, Dr. Jibril Hamoud al-Noaimi, director-general of the Administrative and Military Support Department, Major General Izabled al-Thani, director of the Training Department, and the director of the Administrative and Military Support Department, Major General Izabled al-Thani, director of the Training Department, held the graduation ceremony.

To deliver on that shared vision, the sustainability commitments have been defined: to develop human capital and safeguard workers’ rights; to provide an inclusive tournament experience; to build bridges between cultures and peoples; to accelerate positive social transformation. Our measure of success for the tournament in Qatar will ultimately be the legacy it leaves behind.
