Amir sends greetings to Qatar emir

His Highness the Amir Sheikh Tamim bin Hamad Al-Thani has sent a message of greetings and condolences to His Highness the Emir of Bahrain, Sheikh Khalifa bin Salman Al-Khalifa, on the tragic loss of His Highness the late Emir’s son, Prince Am Meer Mohammed bin Ali Al-Khalifa, who was killed in a plane crash.

Cypriot leader thanks Qatar

Cyprus President Nicos Anastasiades has expressed his thanks and appreciation to the Amir, His Highness Sheikh Tamim bin Hamad Al-Thani, for Qatar’s support to the Cyprus问题.

Qatar offers 4.85bn

Qatar’s State-owned Qatar Development Bank (QDB) announced on Sunday that it had signed a Memorandum of Understanding (MoU) with the UK-based World Health Organization (WHO) for a $4.85 billion ($7.01 billion) fund to support the Covid-19 vaccine programme in the Middle East and North Africa.

WHO raises alert

The World Health Agency (WHO) yesterday reiterated its call for countries to improve their vaccination rates, urging them not to become complacent and to step up their efforts to reach the 70% coverage goal.

A non-profit organisation has launched a project to provide free Covid-19 vaccines to the world’s poorest countries. The organisation, called the “Vaccine to the World”, aims to provide at least 1.5 billion doses of the vaccine to people who cannot afford it, with the goal of achieving global herd immunity.

A recent report by the WHO and the World Bank estimated that the cost of achieving herd immunity through vaccination could reach up to $1.5 trillion.

Covid-19 vaccine on track to roll out in September

Qatar’s Ministry of Health (MoPH) reported on Sunday that a total of 500,000 doses of the Covid-19 vaccine had been delivered to the country, marking a significant milestone in the vaccination campaign.

Amir’s wise leadership helped Qatar overcome blockade: al-Mahmoud

HE Rohaida al-Mahmoud, chairperson of the Qatari General Authority for Eastern Relations, has said that the country’s wise leadership under the Amir, Sheikh Tamim bin Hamad Al-Thani, has played a key role in helping Qatar overcome the blockade imposed by its neighbours.

Resilience and success in the face of blockade

According to a report published by the UN, Qatar has shown resilience and success in the face of blockade imposed by its neighbours. The report highlights the country’s efforts to diversify its economy and improve its infrastructure, despite the challenges posed by the blockade.

Ehtheraz made mandatory by three stores, banks

Al-Bayt Bank, Barwa Bank, and Qatar Islamic Bank have announced that customers will be required to use their mobile phones to scan their Barwa cards and Ehtheraz status before entering their branches, following Qatar’s previous announcement. Similarly, Commercial Bank has said it will require its customers to scan their EHtheraz app status before entering the bank’s branches.

Catching with the third anniversary of the blockade

The Emir of Qatar, Sheikh Tamim bin Hamad Al-Thani, expressed his appreciation on Twitter for the support provided by the GCC countries and the state of Kuwait in commemorating the third anniversary of the blockade.

Arabian Oryx

Oryx has taken part in the Environment Day, an annual event that raises awareness of environmental issues. This year, the event focused on the importance of biodiversity and the need for sustainable practices to protect endangered species.

In addition to the giraffe, the event featured exhibits and educational programs on the importance of protecting the Arabian Oryx and other endangered species. Visitors were encouraged to learn about the conservation efforts being made to protect these species and to take action in their own communities to promote biodiversity.

The event also emphasized the role of technology in conservation efforts. With the help of digital tools, conservationists are able to track and monitor the population of endangered species, allowing for more effective management and protection strategies.

Qatar marks World Environment Day

Qatar marks World Environment Day with a focus on biodiversity conservation. The event featured a range of educational and awareness programs to promote the importance of protecting endangered species like the Arabian Oryx.

The event also highlighted the role of technology in conservation efforts. With the help of digital tools, conservationists are able to track and monitor the population of endangered species, allowing for more effective management and protection strategies.

Qatar reports 40,935 Covid-19 recoveries

Qatar has reported 40,935 recoveries from Covid-19, marking a significant milestone in the country's vaccination efforts.

The Ministry of Public Health (MoPH) reported that 2,612 new recoveries were recorded in the last 24 hours, bringing the total number of recoveries to 34,991. Qatar has made significant progress in its vaccination efforts, with over 1.8 million doses administered to date.

QNL, friends enlighten children through Ramadan programmes

Qatar National Library (QNL) and Friends of Qatar National Library (FQNL) have launched a series of programmes to educate children during Ramadan.

These programmes include storytelling sessions in local languages, interactive workshops, and educational events. The programmes aim to provide children with a fun and engaging way to learn about their heritage and culture.

The Friends of Qatar National Library (FQNL) have responded to this concern by offering new ways to bring our collections to life through the social media accounts of a variety of museums and cultural institutions.
Qatar has been very successful in transforming a challenge

By Joey Aguilera

Qatar has been very successful in transforming a challenge (blockades) to become one of the most successful and well-grown economies in the world. Qatar has managed to sustain its position as a global power player, maintaining robust economic growth and development. This success is owed to the strategic leadership of HH Sheikh Tamim bin Hamad Al-Thani, who has been instrumental in stabilizing and promoting economic growth.

The Qatar economy has been diversifying, reducing its reliance on oil and gas, and embracing new industries such as technology and tourism. Qatar has also been investing heavily in education and healthcare, improving the quality of life and well-being for its citizens and residents. In addition, Qatar has been actively engaging with the international community, promoting cultural exchange and fostering diplomatic relations.

While there are still challenges, such as the ongoing blockade and political tensions in the region, Qatar has demonstrated resilience and determination in overcoming obstacles. Qatar’s success is a testament to the vision and leadership of its rulers, who continue to guide the nation towards a bright and prosperous future.

HBJ Foundation donates QR2mn to HMC for treating Covid-19 patients

Sawed Mehtlin at-al-Muid

The role of music during the Covid-19 pandemic lies in the fact that it has the ability to unite people and help them cope with the challenges of the pandemic. Music has a powerful effect on people, and it can be used to bring people together in times of crisis. In this regard, the HBJ Foundation has donated QR2mn to the Hamad Medical Corporation (HMC) for the treatment of Covid-19 patients.

Elmar Gasimov, President of the Azerbaijan National Studio Orchestra, said in his speech during the ceremony that music has the power to unite people and bring them together in times of crisis. He highlighted the importance of music in bringing people together and helping them overcome challenges.

The donation was made to support the treatment of Covid-19 patients at HMC, which has been providing medical care to patients since the beginning of the pandemic. The donation is part of the foundation's commitment to supporting those affected by the pandemic and helping them recover.

The donation was received by the HMC CEO, who thanked the foundation for its generous gesture.

The donation is a sign of the strong ties between Qatar and Azerbaijan, as well as a symbol of the country's commitment to supporting those affected by the pandemic. The country has been praised for its response to the pandemic, and its efforts to support those affected have been widely praised.

The donation is a testament to the country's commitment to supporting those affected by the pandemic, and it is a sign of the strong ties between the two countries. It is a reminder of the importance of music in bringing people together and helping them overcome challenges.
Protests held in West Bank against annexation plan

AFP

The Palestinian Authority said on Saturday it had decided to withdraw from all Israel’s international agreements, in response to a new US drive to annex territories in the West Bank.

Nabila al-Khaldi, the Palestinian deputy minister of foreign affairs, said the decision was taken “in response to the occupying entity’s – Israel – announcement to annex the occupied Palestinian territories.”

Al-Khaldi did not specify which agreements were affected by the move, but several prominent international accords were looming in the background, including the 1979 peace treaty with Israel, UN General Assembly resolutions, and the Rome Statute of the International Criminal Court.

The decision comes amid a shift in US policy towards the West Bank, with President Donald Trump announcing earlier this month that he would be pushing forward with plans to annex 30% of the territory.

However, the move has been met with widespread condemnation from the international community, with many countries and organizations calling for a renewal of the peace process and an end to settlements.

The Palestinian Authority has also threatened to join the International Criminal Court, if Israel annexes the West Bank.

Meanwhile, threats of war have escalated in the region, with a number of Arab states and the international community expressing concern over the implications of such an annexation.

Protests held in Kyiv against Russia

AFP

People march amid a military check point near the town of Kamenka, Ukraine, on Saturday. Protesters clashed with riot police in the eastern city of Kharkiv, with several arrests and injuries reported.

The incident comes amid heightened tensions between Ukraine and Russia, following a series of pro-Russia demonstrations and arrests in the city.

Police said they used tear gas and rubber bullets to disperse the crowd, which had gathered to protest against the annexation of Crimea.

The unrest comes as Russia continues to expand its presence in the region, with reports of increased military activity in the eastern part of the country.

Kuwait registers 723 new virus cases, death toll rises

KUWAIT

Kuwait's Ministry of Health reported 723 new Covid-19 cases on Saturday, bringing the total number of infections to 167,156 since the start of the outbreak in February 2020.

The ministry also recorded 18,277 recoveries, increasing the total number of recoveries to 15,086 cases and 630 deaths.

The highest number of cases was recorded in the capital city of Kuwait, while the number of cases was relatively lower in the northern and southern provinces.

The ministry also reported 63 more people had died, with the total number of deaths rising to 1,983.

Meanwhile, the ministry also reported 3,574 new cases, bringing the total number to 31,525.

Kianoush Jahanpour, the health ministry's spokesperson, said the number of cases was expected to rise further in the coming days due to the increase in testing.

Meanwhile, the ministry also reported 18,277 recoveries, increasing the total number of recoveries to 15,086 cases and 630 deaths.

Nigerian campaigners stage protest over sexual violence

NIGER

A new wave of protests has broken out in Nigeria, following a series of high-profile rape cases that have sparked outrage among the country’s population.

The protests, which began in the southern city of Lagos and have since spread to other parts of the country, have been led by young women and students who are calling for an end to violence against women.

The protesters have been demanding justice for victims of sexual violence, as well as an end to the use of anti-riot police and the military to quell demonstrations.

However, authorities have been quick to quell the protests, with reports of violence and arrests in some areas.

Meanwhile, the government has announced a new anti-rape law that was due to come into effect on June 10, which criminalizes rape and provides for stiffer penalties for offenders.

The new law comes amid growing public concern over the issue of sexual violence in Nigeria, where cases are reportedly on the rise.

Australia court prohibits planned anti-racism rally citing coronavirus

**Australia**

Australia court prohibits planned anti-racism rally citing coronavirus

A court in Australia has prohibited a planned anti-racism rally, citing coronavirus concerns. The decision was made by a magistrate in Sydney, following a challenge by the organizers of the rally. The court ruled that the rally was likely to cause significant public health risks, including a surge in COVID-19 cases.

The protest was scheduled to take place on July 24, but the court granted a stay order, preventing the rally from going ahead.

The decision comes amid growing concerns about the ongoing pandemic and the risk of large gatherings, particularly in areas with high levels of community transmission.

The court stated that the organizers had not provided sufficient evidence to demonstrate that the rally would not cause significant disruption or harm to public health.

Organizations had hoped to highlight the high levels of incarceration for First Nations Australians and the large number of Indigenous people who have died from the virus in the last three decades. The decision also came as the state of New South Wales, where the rally was planned, reported a new outbreak of the virus.

The court said the rally poses a significant risk to public health and that the authorities have a duty to prioritize public safety during the pandemic.

The decision has been criticized by some who argue that it infringes on First Nations peoples' right to protest and express their grievances.

The court's ruling has sparked a debate about the balance between public health and civil liberties, particularly in the context of ongoing protests against police violence.

Singapore plans wearable virus-tracing device for all

Singapore plans to give a wearable virus-tracing device to all its 5.7 million residents as part of its efforts to prevent a second wave of COVID-19.

The device, known as TraceTogether, uses Bluetooth technology to track the proximity of individuals, allowing authorities to identify possible contacts and initiate contact tracing.

The device has been mandatory for some groups, such as foreign workers, but the government has announced plans to extend its use to the general population.

The initiative comes amid growing concerns about a potential second wave of the virus, particularly in countries with large populations of migrant workers who have been brought in from abroad.

The government has said that the use of the device is voluntary, and that individuals can choose to opt out if they do not wish to use it.

The World Health Organisation (WHO) and the use of fabric face masks across the world is widespread and physicochemical testing is difficult, the Norwegian University of Science and Technology's (NTNU) Prof. Finn Einar Thorvaldsen said.

"The WHO states that fabric masks are sufficient in most situations when a person is not coughing or sneezing," Thorvaldsen said in an interview. "However, this statement is based on the assumption that the masks are not used in high-risk situations, such as healthcare settings or in close contact with sick individuals."

Thorvaldsen and his colleagues have developed a method to test the effectiveness of face masks against SARS-CoV-2, the virus that causes COVID-19. The method involves subjecting masks to a high-speed air jet, simulating the air flow around a face, and measuring how much of the virus is transmitted through the mask.

"Our method can be used to test the effectiveness of different types of face masks under realistic conditions," Thorvaldsen said. "We have tested a variety of masks, including surgical masks, cloth masks, and masks made from different materials, and found that some masks are more effective than others."
Teacher ‘earns’ Rs10mn working in 25 schools

The director general of school education, Vijay Kumar Arora, said a probe is in

10 India

Source: Gulf Times, IANS, Times of India

The director general of school education, Vijay Kumar Arora, said a probe is in order to ascertain the facts about this teacher who is not traceable.

It is well known that children are victims of bullying, which can have serious consequences. Teachers need to be trained to handle such situations effectively.

The presence of a teacher who is not traceable in a classroom could have implications for the education of the students. It is important to ensure that all teachers are available and accounted for in the classroom.

According to the records at all schools, Shah was on the rolls of these schools for over a year.

The lack of any record of Shah in the school's administrative files is an issue that needs to be addressed.

The situation at this school needs to be investigated further to identify the reasons behind the absence of this teacher and to ensure that all students are receiving a proper education.

A letter launched in India campaign for UNSC seat begins

Senior Congress leader B. Ramanthy Aiyar, who had been a Minister of External Affairs, has launched the campaign for India's candidature for a seat on the United Nations Security Council.

The letter is directed at the Indian public to express support for India's candidacy.

India's candidature is very likely to win, according to the sources. The next election to the Security Council is scheduled for June 2021.

The letter is a call to action for all Indians to show solidarity with their country.

Second, traditional and non-traditional security threats require new approaches and solutions.

F **rance denies giving refuge to Venezuela’s opposition leader Juan Guaido**, who was _The Guardian_’s choice for the 2019 journalist of the year. It is the first time in a generation that France has left open the possibility of giving political refuge to a Venezuelan opposition leader, according to a ministry spokesman Agnez von der Muhl said.

France is among more than 50 countries that have recognized Guaido as the interim president of Venezueula, which has imposed an economic blockade against the country. The French president, Nicolas Macron, has long said that he would not give political protection to Guaido, who is currently under house arrest by the Venezuelan government. Macron appointed President Nicolás Maduro as the president of Venezuela in January, but the opposition has rejected this move as unconstitutional. Guaido is currently under house arrest by the Venezuelan government and has not been able to access the outside world.

"Warning shot" from Lahore authorities

The Lahore city administration had sealed 450 shops for violating standard operating procedures (SOPs) issued by the Punjab government to control the spread of the coronavirus.

"It was a clear warning to shops and markets that will be sealed if violators do not mend their ways," Lahore district administration commissioner Shafqaat Khan said.

Khan stressed that the media and traders have been instructed to ensure that custom-

"The traders have been told that they won't spare those ignoring the SOPs here. They will also be asked to avoid rush and movement of people at the markets, and the district administration will make sure that those shops or centers of shops abide by the limiting restrictions.

Many violated shops, mostly meat and vegetable vendors, had been sealed for not maintaining social distancing and capitulating to the prescribed with respecto to imple-

The traders associations in the district were informed of the sealed shops and were asked to avoid rush and movement, and the district administration was also instructed to ensure that the traders associations are working to implement the SOPs here.

"The traders have been informed that checking would be conducted at the entire points of markets and no one without mask will be allowed to enter the market," he added.

"If a customer comes to shop without mask, the shop will be sealed," he said.

Shafqaat observed violations in Bheera Market on Jail Road, and New Aabpara Market, both of which were sealed, and said that this is a very dangerous situation that will result in the coronavirus spiraling out of control.

A statement issued by the office of the deputy commissioner and the district administration said a large cache of chars, heroin and liquor was also seized during the last month.

The police also arrested 14 people wanted for heinous crimes and seized unlicensed people wanted for heinous crimes and seized unlicensed heroin and liquor.
Jobless rate spikes amid virus lockdown

R. ight after the Enhanced Community Quarantine (ECQ) was declared, ABS-CBN’s Chief Content Officer (CCO) Ging Reyes led the station in providing assistance to the poorest of the poor, with the help of the government. However, on Thursday, May 14, ABS-CBN was granted a temporary franchise extension until August 31, 2020.

The extension was given to the station by the National Telecommunications Commission (NTC). The move came after the NTC rejected ABS-CBN’s application for a franchise extension until August 31, 2022.

The station was granted a temporary franchise extension until August 31, 2020, which is a six-month extension of its temporary franchise granted in March this year. The extension allows the network to continue its operations until August 31, 2020.

The franchise extension is expected to provide relief to the station, which has been struggling to stay afloat due to the COVID-19 pandemic. The station has been forced to cut jobs and reduce its programming in order to save costs.

The extension is also expected to provide relief to the network’s employees, who have been hit hard by the pandemic. The station has been forced to furlough some of its employees, and the extension will allow them to continue working.

The extension is also expected to provide relief to the government, which has been hit hard by the pandemic. The station has been forced to reduce its programming, and the extension will allow it to continue operating.

The extension is also expected to provide relief to the country, which has been hit hard by the pandemic. The station has been forced to reduce its programming, and the extension will allow it to continue operating.

The extension is also expected to provide relief to the network’s shareholders, who have been hit hard by the pandemic. The station has been forced to reduce its programming, and the extension will allow them to continue working.

The extension is also expected to provide relief to the government, which has been hit hard by the pandemic. The station has been forced to reduce its programming, and the extension will allow it to continue operating.

The extension is also expected to provide relief to the country, which has been hit hard by the pandemic. The station has been forced to reduce its programming, and the extension will allow it to continue operating.

Racial unrest raises questions for Corporate America

As the US grapples with an escalating racial justice crisis on top of a public health emergency, Corporate America faces a thorny question: How can companies engage on uncharted terrain without inciting division or furthering the crisis?

Companies need to do more than simply decry racism to meet the moment, say experts who fear that “people put out statements, they put out platitudes, they say this is terrible,” but fail to actually act. “The fundamental question is do we more than we’re required to give people full means to participate in this society?”

Mass protests in the wake of a police killing on an unarmed black man have put public pressure on companies to be at the forefront of the same time the country is dealing with the coronavirus. Many companies have issued statements deeming discrimination and, including Apple and Bank of America, have put policies in place to allow employees to be openly supporting civil rights advocacy groups or programs targeting disadvantaged populations.

Yet the longestsuccess points to deeply inequity in American society and its role in the crisis. A 2019 report by Boston Consulting Group noted that only 3% of the 500 biggest US companies were led by African-Americans and just 24% by women.

“Our society is more divided than it’s ever been,” said Faisal Abdulhameed al-Mudahka, CEO of a New-Jersey company, who credits his success to an education initiative that bussed a hundred black students from inner-city Philadelphia to the city’s top schools.

Hiring and promoting African-Americans and Latinos is essential to strengthening a company’s ability to understand the communities they serve, according to data from the Economic Policy Institute, a progressive think tank.

But it has not just been about communication, it has to be about action,” said Edelman, who pointed to examples of major companies supporting minority-owned contractors or hiring people who were previously incarcerated.

Other concrete steps can include supporting startups created by African-Americans and Latinos and having senior executives serve on boards advising community groups and non-government organizations that lead local and national coalitions, said Edelman.

Edelman noted that many of the protesters are younger workers who are weighing how different companies respond to the crisis.

Experts urge corporate takeaways to a page from the National Football League’s “Bigger than Life” campaign, teams to interview non-white candidates for coaching and football operation jobs when possible.

“There are a lot of companies out there that want to do the right thing, but they’re not doing enough,” said Hank Boyd, a professor of marketing at the University of Maryland. “You need to be acting, you need to be supporting, civil rights advocacy groups or programs targeting disadvantaged populations.

“We have the responsibility to help bridge the gap here,” Boyd said. “You’re not Switzerland.”

Boyd said. “You don’t have that luxury anymore. Brands today have to be above the fray, ‘let’s not get involved, we’re Switzerland, ’” Boyd the University of Maryland. “You need to be acting, you need to window dressing,” said Hank Boyd, a professor of marketing at

As doctors go virtual, pandemic turbocharges telemedicine

By Jean-Marc Bernard, Coulibaly

This strategy of education and telemedicine is critical to Africa’s Covid-19 response. Teachers are one of the largest groups of essential workers and continue to work remotely, while children have been affected by school closures. By 2021, 90% of African countries have adopted the virtual classroom model to resume teaching. However, the distribution of technology is uneven. This means people outside bigger towns are often forced to seek medical advice from untrained or ill-qualified practitioners. Education and telemedicine are essential for productivity and competitiveness. Virtual tools in education provide access to a wide range of content that can be adapted to the needs of learners. However, there is a significant gap in educational resources due to the pandemic, which has exacerbated inequalities in education. The technological divide is widening the gap between the haves and have-nots of information. In a matter of weeks, African governments have shifted from physical classrooms to digital platforms. The extent to which Africa’s long-term economic competitiveness can be maintained depends on how well it adapts to the challenges of the new normal. Without continued investment in education, the lifetime earnings of today’s students in the United States will be less than those of today’s students in the United States.

African policymakers are discussing how to ensure that education continuity can contribute to socio-economic development. The Human Capital Index is currently under construction. The Education and Training Index, which measures the quality of education and training, has been around for decades. Developing nations have been using telemedicine, alongside communication technology. This technology is underused in Africa, but it has been essential for health care in remote communities. In order to change their families’ and communities’ livelihoods, many people turn to telemedicine. In the future, telemedicine could be a useful tool for in-home care, providing healthcare to the isolated and elderly. African policymakers should consider the technological infrastructure and the specific needs of the region when implementing telemedicine programs. The government and the private sector should work together to ensure that telemedicine is accessible to all. The government should also provide training for healthcare providers to ensure that they are able to provide quality care. This will require investment in technology, training, and infrastructure. Telemedicine is not a panacea, but it can be a valuable tool in the fight against COVID-19.

In conclusion, African policymakers should prioritize education and telemedicine as key strategies in the fight against COVID-19. The government should invest in technology, training, and infrastructure to ensure that telemedicine is accessible to all. This will require collaboration between the government and the private sector to ensure that telemedicine is a sustainable solution.
