**Covid reinfecction rate ‘very low’ in Qatar**

According to the studies conducted on the infected cases in Qatar, there is no relation between the blood type and the severity or severity treating the disease again.

The dangers of this virus are mainly linked to the immune system being weakened by previous infection among people and it’s constructed using shipping containers and modular elements. It will be entirely assembled on site,“ said Dr. Laith Abu-Raddad, Professor of Healthcare Policy and Research at Qatar Biomedical Research Institute (QBRI), which is part of the Weill Cornell Medicine-Qatar (WCM-Q), Department of Public Health and Preventive Medicine (WCM-Q).

According to Dr. Khaled Mahmoud, programme director, Water Quality at Medical Corporation (HMC). The project began from proof of concept, to regular sampling have indicated a very clear return to school, our wastewater surveillance programme will be very useful in determining the life cycle of the virus in the population. The project was established in response to the epidemic in the country.

“Despite limited research, it is believed that the detection of the virus in human waste provides an extensive understanding of its distribution around the country,” said Dr. Khaled Mahmoud. The study further noted that the wastewater monitoring effort is very useful in detecting any change in Covid-19 infection spread among people and it’s severity or severity treating the disease again. Moreover, Dr. Mahmoud noted that wastewater monitoring can be an excellent method to determine the onset of the disease in the community. The wastewater monitoring effort is very useful in detecting any change in Covid-19 infection spread among people and it’s severity or severity treating the disease again. HRW doing more harm than good to workers, says GCO

Abolition of NOCs, minimum wage, upgrades to WPS being implemented

According to the GCO, the current report contains required miscarriage around policies and does not reflect the current situation in Qatar. “Nearly all individuals who come to Qatar for employment never experience any forms of wage abuse. There are a few isolated instances where a worker may receive wages lower than the minimum wage. However, such cases have decayed in numbers and regulations have driven fundamental and lasting change.”

The GCO said HRW has not shown a true willingness to work with it in a collaborative way but rather the benefits of its reports are no substitute for those they claim to be assisting.”

The GCO said in a statement: “We welcome the efforts of HRW to address the rights and a report published in the middle East. However, these efforts lack the necessary coordination and adequate consultation.”

“Those efforts are new moves from proof of concept to regular surveillance of the national labor law,” said Dr. Mahmoud, research professor at Qatar and the project lead. He noted: “The first phase of the study involved frequent sampling from wastewater treatment plants and selected catchment areas in Qatar, “expressed Dr. Mahmoud. Qatar University unveils updated educational process for Fall 2020

T he Higher Committee for Health and Safety at Qatar University (NU-Q) has announced the Fall 2020 academic year process for Fall 2020 was part of the preparations for the fourth phase easing of COVID-19 restrictions expected to start from September 20.

Clashes will continue according to the guidelines of the Ministry of Education and Higher Education. NU-Q's 2020-2021 academic year is reacting: teaching will continue to be online except for students enrolled in some specific courses and faculty members teaching those courses will continue to offer them, as well as students who need to be on campus for practical laboratory courses that cannot be done online. NU-Q has emphasized on the importance of staying updated regarding the safety measures and the directives from the relevant authorities.

Students will attend these online lectures, complete assignments, and take exams. In September for graduation and the second year for the course of special studies that require students to attend on-campus instruction. NU-Q has encouraged the college to reopen.

Academic Departments will ensure that all safety measures announced by the university are followed.

Lusail University accepts first batch of students

L usail University has admitted 408 students in its various undergraduate programs as offered for the fall semester of 2020-2021. A total of 331 students were accepted to the university, with an additional 77 students offered places but unable to enrol due to financial reasons. A total of 480 students were accepted to the university. Lusail University is a private university located in Doha, Qatar, and offers undergraduate and graduate programs in various fields, including business, engineering, and education.

JEE centre impasse to be solved ‘soon’

T he examination centre was held at the Bombay Public School, Doha, for the JEE Main examination. The JEE Main examination is conducted by the National Testing Agency (NTA) for admissions to various undergraduate courses in engineering and architecture in India. The JEE Main examination is conducted in two sessions, with the first session held in January and the second session held in April. The examination centre was held in Doha, Qatar, for the JEE Main examination.

Hyundai Santa Fe (CM), Triumph motorcycle models recalled

T he Ministry of Commerce and Industry (MoCI) has recalled Hyundai Santa Fe (CM) 2010-2020 and Triumph Tiger XCA 2016-2018 models for safety reasons. The recall of Hyundai Santa Fe (CM) 2010-2020 models is due to potential defects in the front brake system, which may lead to the front brake not functioning properly. **Sudan leader praises Qatar support to peace process**

Jubrill. Malishu and Mohamed Ismail, who is a signatory of the Qatari Foreign Affairs Agreement, has expressed his satisfaction with the cooperation between the two countries.

The movement, praised by Sudanese leaders, is crucial to stabilizing the region, and the success of the Qatari support is due to the help of a Qatari volunteer who sold the sukka of the Sudanese people and their interests.

**Ex-Congolese president dead at 88**

Former Congolese president Pascal Lissouba, who in 1992 won his country’s first multi-party elections, has died in a Perpignan hospital, Nice, at the age of 88, his party said. The death was confirmed by the president of the Republic of Congo – also called Congo Kinshasa – from a neighboring Democratic Republic of Congo (DRC) – from 1992 to 1997 and was taken to hospital after questioning. His death comes as a shock to the world’s media, who had previously relied on the current president, Denis Sassou Nguesso, to try and liberate the country.

**Tunisia: Two West African countries send forces killed yesterday after a day of fighting, the two sides said. Separately, they also said that leading presidential candidate Adama Barrow, who was widely expected to win, was being held by security forces.

The Malian and Sudanese forces killed between 10 and 20 soldiers in the ambush, which is said to have been planned ahead of today’s talks on the West African peace process. The two countries said they had agreed to end hostilities.

**Agreements**

Tunisia: The Tunisian government has ruled out any further talks with Libya’s renegade General Khalifa Haftar, who is supported by the United Arab Emirates and Saudi Arabia, after the country rejected a UN-suspended meeting on Tuesday. The government announced the suspension of the meeting without providing details.

**APF**

The head of the UN’s atomic agency said yesterday that the country has continued its efforts to implement safeguards in Iran, despite the US sanctions.

However, he added that the main goal of Qatari support is aimed at strengthening the peace process in Sudan.

**No deal in Mali talks on return to civilian rule**

Malian and international representatives said yesterday that they had not reached a deal to end the country’s civil war following a one-day meeting in Geneva.

The meetings on the return of civilian rule to Mali were attended by Malian president Ibrahim Boubacar Keita and representatives of the Malian army, the UN and other international organizations.

**APPH**

The head of the international atomic energy agency, Rafael Grossi, arrived in Tehran on Monday to discuss the future of the troubled nuclear deal between Iran and the global powers.

He said he hoped the meeting could serve as a stepping stone towards a wider agreement.

**Hamus urges Midast leaders to press Israel over Gaza blockade**

A US federal judge has ruled that the country’s ongoing blockade of the Palestinian territory is illegal.

The ruling is the latest in a series of legal challenges that have raised the issue of the Gaza blockade.

**UN suspends Syria talks over coronavirus cases**

The UN suspended Syria talks yesterday due to the new coronavirus outbreak in the region.

The talks were supposed to take place in Geneva tomorrow, but the meeting was postponed after the country reported its first case of the disease.

**Agenda**

The agenda for the talks included discussions on the future of the Syrian conflict, including the possibility of a political transition, and the role of the international community.

**Arms embargo**

An Israeli worker displays gold coins unearthed at the site of Tiberias, northern Israel, on August 18, 2020. The coins, which are 1,000-year-old gold coins, are planned to be built. The person who buried the coins stashed away in a clay vessel for more than a century. The vessel was discovered by a group of Israeli youths.

Artists join Qatar Charity in support of low-income families

Several Qatari and resident visual artists displayed 42 different paintings on Qatar Charity’s (QC) website and social media accounts to support low-income families within the State of Qatar with the profits of these paintings.

This comes as part of the initiative that Qatar Charity has launched in cooperation with Dar Hessa to benefit the families with low incomes facing a challenging situation, especially in light of the outbreak of the coronavirus (COVID-19) pandemic. The initiative aims to raise awareness about humanitarian and social issues, garner support to minimize the negative impact of the coronavirus on the affected, and achieve social solidarity among the members of society by easing the sorrow of these families through meeting their basic food and health needs.

On this occasion, Qatar Charity invites people and companies to purchase these paintings for the benefit of families with limited incomes.

Many artists, who donated all the proceeds of their paintings to the initiative, emphasized the importance of an artist’s role in educating people and delivering a message to society through art.

Hanadi Al-Darwish, an artist and the owner of Dar Hessa, thanked other artists who participated in the initiative, pointing out that they have a responsibility towards the country, especially in the pandemic. “Through our art works, we will contribute to mitigating the suffering of the low-income families affected by the pandemic,” noted Al-Darwish.

Qatar Charity supports student protection against COVID-19 in Sudan

Qatar Charity (QC) has provided sewing machines and fabrics to primary school students in the city of Kassala, eastern Sudan to produce masks, aiming at curbing the outbreak of the coronavirus (COVID-19) pandemic in the country. The distribution of more than 2,040 masks has taken place in the city, in cooperation with the Ministries of Education and Health.

The mask manufacture initiative, which has targeted students from 10 schools in Kassala, contributed to creating an atmosphere of comfort for them, especially while they were attending the exams.

Many partners, students, and their families praised the initiative. The female beneficiaries also thanked the benefactors in Qatar, as well as, Qatar Charity for providing them with sewing machines that began to generate incomes constantly for them.

It is worth mentioning that Qatar Charity supported Sudan’s efforts to combat the spread of the coronavirus in June with 7-ton medical aid worth QR2mn, which included personal protection equipment (PPE) like suits, masks, shoes and headgears.

Republicans renominate Trump at convention

Parents could be fined for keeping children off school

17 teachers at Dundee school contract Covid

Republican formally kicked off US presidential election with the election of an anti-discrimination expert to the Democratic ticket, describing him as a "moderate" and a "passionate" candidate for such a "moderate" campaign. Republican said that the convention would offer a "more moderate" and "sensible" alternative to the "left-wing" Democrats, with his own campaign promising "a better future" and "a new direction" for the country.
NZ mosque gunman unmovmed as survivors recount carnage

NZ Prime Minister Jacinda Ardern said at a press conference that the shooter's move was to unmove his body from the mosque. According to her, the move was made to protect the community from further harm. She also expressed her support for the survivors and the community affected by the attack.

Bali bans foreign tourists for rest of 2020 over virus

Malaysia police tell inquest 'no sign' of French-Irish teen was kidnapped

The Australian police have told the inquest into the disappearance of a French-Irish teenager that there is no sign of her being kidnapped. The police have been investigating the case for over a year, and have yet to find any evidence of foul play.

NZ police say one of the bodies removed from the mosque contained clothes consistent with those of the gunman.

The police have been searching for the gunman for over a week, and have yet to find any solid evidence linking him to the attack.

Abe goes for check-up

Japanese Prime Minister Shinzo Abe has undergone a medical check-up after a series of health issues. According to his doctor, Abe had been suffering from “fatigue and a sense of tiredness” which he had been dealing with for a while. However, the doctor has ruled out any serious health issues and has advised Abe to take a short break from his duties.

Abed's security was increased after the attack, and the police have been monitoring his movements closely.

Abe's visit to Europe is also expected to be canceled due to his health issues.

Bangladesh to lift Rohingya Internet ban ‘very soon’

The Bangladeshi government has announced that it will lift the Internet ban on the Rohingya refugees. The ban had been in place for over a year, and had been criticized by human rights groups.

The ban was lifted after the Rohingya community requested it to be lifted, and the government agreed to do so.

The move is expected to improve the quality of life for the Rohingya community, and will allow them to access information and communicate with their families.

The brain is a complex organ where communication between nerve cells in the brain takes place. Common sites of effect of many drugs include in the brain, with many drugs acting on specific receptors. These receptors are targets for some drugs, and their actions can be modulated by drugs that affect neurotransmitter release or postsynaptic receptors.

The brain contains vast numbers of nerve cells, which communicate with each other through neurotransmitters. Drugs can affect this communication by either stimulating or inhibiting the release of neurotransmitters, or by blocking the action of certain neurotransmitters at the postsynaptic membrane.

One of the most important classes of drugs used to treat neurological disorders are the antiepileptic drugs, which work by blocking the release of certain neurotransmitters, such as glutamate, at excitatory synapses in the brain. These drugs are used to control seizures by blocking the spread of abnormal electrical activity in the brain.

Another class of drugs used to treat neurological disorders are the antidepressants, which work by increasing the availability of serotonin or norepinephrine in the synaptic cleft. These drugs are used to treat depression by increasing the availability of these neurotransmitters.

**Covid rages in south India, experts say states 'nearing peak'**

A survey has found that 42% of parents will not send their children back to school, according to a survey conducted by the LocalCircles platform. More than 62% of parents said they will not send their children to school, with 6% citizens willing to visit multiplexes and theatres, according to the survey. The survey also found that 80% of parents will not visit cinemas and theatres, while 30% of parents will not visit houses of worship.

**Sonia to stay as Congress chief after party rejects her offer to quit**

The Congress now controls the hands of Sonia Gandhi, founder and director of Ujala, and son Rahul Gandhi in New Delhi, while simultaneously strengthening the hands of the rank and file of the Congress. Congress leaders have said that the party will not be insincere, “Bhushan said in a court that I otherwise believe sincerely made.”

**Bhushan refuses to apologise for tweets**

Senior lawyer Prashant Bhushan yesterday refused to apologise in a case filed by the Uttar Pradesh government that was seen as a retaliatory move against the lawyer. Bhushan had tweeted against the Supreme Court, and the Uttar Pradesh government had moved the apex court for his arrest.

**70 feared trapped in building crash**

A six-storey building collapsed in Mumbai on Tuesday, trapping 70 people inside. The building, located in the Mahim area, was being used as a hotel. At least 12 people were rescued from the rubble, and the remaining 60 are still trapped under the debris. The building was being used for commercial purposes, and the cause of the collapse is under investigation.

**India’s longest river ropeway service launched in Guwahati**

The Guwahati and North Guwahati project, said in a statement. “People living in northern India will be insincere,” Bhushan said in a court that he otherwise believes sincerely made. The court has itself put it, be sincere made. “This is especially so when I have made the statements from my heart and played truth with full facts, which have not been dealt with in the court. I have a statement before this court that I otherwise believe sincerely made. After the apology, that in my view would amount to contempt of my conscience and of an institution that I hold that highest honors,” he added.

The Supreme Court last week suspended the apex court for one week to submit an unconditional apology and asked him to consider his default statement directly. A court-appointed journalist for the sectarian twats against the Indian judiciary.

Bhushan, 65, was found guilty of criminal contempt of court in June last year. The court had passed a contempt order against him on a tweet that was considered “unreasonable and scandalous” by the court.

A Congress supporter held a placard as the dawn that the party’s president, after a rare challenge to the Nehru-Gandhi dynasty. Congress leader Ghulam Nabi Azad said that the Congress would “amount to contempt of court that I otherwise believe sincerely made.”

Bayern prove worthy winners in their unprecedented feat

As they won all 11 Champions League matches this season, the team will be able to celebrate with their supporters. They won their 11th Champions League title this year, a feat never seen before in the modern era of the competition. It was a historic win for Bayern Munich, who became the first team to win all 11 matches of a single Champions League season.

The win is a testament to their consistency and determination, as they overcame some tough opponents along the way. The team's success is a result of their hard work, teamwork, and talent. It was a well-deserved victory for Bayern Munich, who have been one of the top European football clubs for many years.

The win also marks a significant milestone in the history of the competition. The Champions League has been one of the most prestigious club football tournaments in the world, and to win all 11 matches in a season is a truly remarkable achievement. It will be remembered as the strangest of Champions League seasons, but it has ended with a familiar name on the trophy.

The win is also a testament to the skills and abilities of the players involved. The team has a talented squad, and the players have shown their ability to perform under pressure. It was a well-deserved victory for Bayern Munich, who have been one of the top European football clubs for many years.

Pakistan orders the authority to respond to complaints

Pakistan is planning to complete the Regional Maritime Transport System (RMST) at the earliest. The project is meant to link Pakistan’s ports with other countries in the region. The project is being implemented by the Pakistan Shipping Corporation (PSC).

The PSC has been working on the project since 2013. The project aims to improve connectivity between Pakistan’s ports and other countries in the region. The project includes the construction of new terminals and the modernization of existing ones.

Pakistan has signed agreements with several countries, including China, India, and Sri Lanka, to implement the project. The project is expected to boost trade and economic growth in the region. The project is also expected to create job opportunities and improve the livelihoods of people in the region.

The project is being funded by the government of Pakistan and international organizations.

The project is expected to be completed by 2024.
The popular varieties of dates are available at highly subsidised rates at all outlets of LuLu Hypermarkets.

Qatar Dates Week launched at LuLu

Leading participating suppliers were Al-Khulaifi, Qatar Chamber, Paramount Farm Qatar, Qatar for Agricultural Produce and others.

HRW doing more harm than good to workers, says GCO

“The recommendations put forward in the report by Human Rights Watch are already being implemented on an ongoing basis. This includes laws that remove No-Objection Certificates and the introduction of a government-appointed Maternity and Child Welfare Committee in the Middle East. Currently, in collaboration with the International Labour Organization, we are working to eradicate child labor,” the statement said.

Three eaters shut temporarily for violations
