Defence minister visits Leonardo factories

The Deputy Prime Minister and Minister of Defence Affairs Sheikh Mohamed bin Abdulrahman al-Thani yesterday visited the Leonardo factories in Thumama town, which manufacture high-quality, high-performance, precision-guided munitions for the Qatari armed forces.

PM inaugurates Water Quality Monitoring Lab

The Water Quality Monitoring Laboratory, which is a part of Qatar Electricity and Water Corporation (Kahramaa), was inaugurated by HE the Prime Minister and Interior Minister Sheikh Abdulrahman bin Jassim bin Jabor al-Thani yesterday at Al Thumama Sports City.

The lab will be equipped with state-of-the-art monitoring equipment to ensure the quality of water, starting from supplying the raw water through the distribution networks until it reaches the consumer, a Kahramaa statement said.

The Prime Minister was accompanied during the inauguration by HE the Prime Minister of State for Energy Affairs Ahmed al-Sayed and Chairperson of the Kahramaa Monitoring Lab, Sulaiman bin Turki bin Abdulaziz bin Turki.

The Prime Minister inspected the facilities and praised the detailed and modern mechanisms of all changes that might take place in the quality of water and the quick response and means to achieve the necessary changes to ensure quality and safety standards are met.

The Prime Minister said that the Kahramaa Monitoring Lab meets the strategic objective of delivering high-quality water to all parts of the country and the continuous monitoring of all data that might affect its quality.

Kahramaa was keen to employ the latest technology and systems in the sector, and which would increase the efficiency and丨accuracy of tests and reduce the time they take. The laboratory is provided with an advanced and sophisticated system to examine and measure various parameters, chemical and biological data, and contribute to improving the conditions of drinking water.

The laboratory is also equipped with five modern instruments to measure and control bacterial turbidity and acidity levels. Scientific research and development, educational and awareness activities, special analytical laboratories, international technical cooperation and other means will be part of the project.

In addition to Kahramaa's requirements, the laboratory applies precise standards and systems to ensure water quality including the World Health Organization's (WHO) standardised systems to achieve the best quality for the treated water.

The Prime Minister lauded the great efforts and the cooperation of all parties involved in the project.

Amir sends message to Iran president

Amir has sent a written message to President Hassan Rouhani, regarding bilateral relations and ways to support and develop them. HE the Deputy Prime Minister and Minister of Foreign Affairs Sheikh Mohammad bin Abdulrahman al-Thani today sent a written message to the Iranian president during the meeting with the Iranian president in Tehran today.

Amir concedes with Saudi king

His Highness the Amir Sheikh Tamim bin Hamad Al-Thani met with his Saudi counterpart, the Deputy Amir Sheikh Muhammad bin Abdulaziz bin Faisal Al-Thani, in Khobar City. The Amir and the Saudi Amir exchanged means of cooperation and coordination in various fields.

Access to all hotels for arrivals from 4 nations

Arrivals from the UK, Denmark, Israel and Colombia will be allowed to enter Qatar from March 20, according to information available from the Qatar Ministry of Interior. Earlier, arrivals from these countries were not allowed to enter the country according to the same information.

Saudit tightens terms for foreign contracts

The government of Saudi Arabia has determined to stop signing contracts with foreign companies with a regional investment that is not in the kingdom as of January 2024. A new resolution of the Saudi government reemphasizes that the government has declared that this will not affect the ability of Saudi Arabia to execute projects in other countries. Since the term of the relevant measures will be issued during 2024.

US reassures Iraq killings

The US reassured Iraq, after Turkey called an execution of 13 members of the Kurdistan Workers Party (PKK) for the executions of 13 Kurdish leaders in Iraqi Kurdistan a “joke,” killing “a joke.”

Earlier US statement on the Iraq killings was infuriated by Syria, was infuriated by Turkey, already angered by PKK. Ankara that Washington blames killings “a joke.”

Moderna’s vaccine ‘95% effective’

By Ayman Adly

The Ministry of Public Health (MoPH) reported yesterday that there were 448 new Covid-19 cases, 186 recoveries and 186 new cases were under isolation, bringing the total number of Covid-19 cases in Qatar to 148,500.

The MoPH also recorded 186 new recoveries from the virus during the past 24 hours, increasing the total number of cases recovered in Qatar to 96,406.

All new cases have been introduced to isolation and are under mandatory health measures.

The MoPH has urged everyone to play their role in controlling the virus by following preventive measures:

- Adherence to physical distancing.
- Class contacts with others, crowded places and confined closed spaces where other people conglomerate.
- Wearing a face mask.
- Washing hands, regularly.
- Avoiding socializing with people outside their family.
- People should seek medical attention if they are suffering from Covid-19 symptoms such as cough, fever, weakness, fatigue or muscle pain.
- Swabs of a number of students are taken to detect the presence of Covid-19 if the number of positive cases increases, which 392 were from community colleges and 27 that are from tertiary education.
- For this reason, it is more important than ever that the public adhere to preventive measures to halt the cascade before it gains momentum.
- The Minister of Education and Higher Education, said if any student in any school shows Covid-19 symptoms, they should seek medical attention immediately.
- There have been high temperature or common cold symptoms, which is an unacceptable situation. Also, school buses are highly safe with use of masks and communication system.

The Ministry of Public Health (MoPH) reported yesterday that there were 448 new Covid-19 cases, 186 recoveries and 186 new cases were under isolation, bringing the total number of Covid-19 cases in Qatar to 148,500.

The number of daily infections appears to be the early signs of a potential second wave.

Procedures for movement of goods at Abu Samra border

The General Authority of Customs (GAC) has explained the organization and procedures for the movement of goods at the Abu Samra border. The authority issued two infographics, one for exporters and the other for importers, on social distancing measures between Qatar and Saudi Arabia, for the movement of goods at Abu Samra border and following the conditions announced by the Saudi Customs.

The procedures for importers are as follows:

1. Pursuant to the Qatar-COVID-19 contours, drivers and trucks carrying goods are not allowed to enter the country. Importers must contact local transport goods.
2. Gather and load the goods and request local transport goods.
3. Return of trucks to the Salwa border crossing shall now be processed.
4. It is clearly apparent that the movement of goods will take place after the procedures are completed.
5. Notify the crossing management of the schedule and number plates of trucks to facilitate the process.
6. Importers must abide by instructions from social distancing services between Qatar and Saudi Arabia, as well as the Saudi authorities' rules.
7. Regulations apply to transporting animals.

The procedures for exporters are as follows:

1. Exporters must hold a COVID-19 negative certificate to enter the country.
2. Exporters must arrange for local trucks to transport goods.
3. Gather and load the goods and request local transport goods.
4. Return of trucks to the Salwa border crossing shall now be processed.
5. Notify the crossing management of the schedule and number plates of trucks to facilitate the process.
6. Exporters must abide by instructions from social distancing services between Qatar and Saudi Arabia, as well as the Saudi authorities' rules.
7. Regulations apply to transporting animals.

More ATMs, deposit machines now accepting new notes

More ATMs, deposit machines now accepting new notes issued by Qatar Central Bank (QCB). It was recently announced that commercial banks and financial institutions had started accepting new Qatari currency notes.

The procedures for the movement of goods at Abu Samra border involve:

- Gather and load the goods and request local transport goods.
- Gather and load the goods and request local transport goods.
- Following the conditions announced by the Saudi Customs.
- Gather and load the goods and request local transport goods.
- Gather and load the goods and request local transport goods.

Qatar Charity’s convoys start aid distribution to displaced Syrians

Qatar Charity’s convoys have started the distribution of winter aid to internally displaced Syrians in a campaign launched by Qatar Charity (QC), organised by ‘Qatar Relief Convoys’, to support the Syrian people. The campaign, which started on February 15, is expected to benefit about 267,470 internally displaced Syrians and is expected to be worth nearly QR24mn. The convoy, which includes 78 trucks loaded with various winter relief aid, set off from Gaziantep in Turkey and will head to Idlib and the northern and western Aleppo countryside.

The convoy includes residential caravans, tents, mattresses, blankets, food baskets and personal hygiene kits, in addition to providing flour for the production of bread. The convoy will head towards the provinces of Idlib, Aleppo and the countryside of the Idlib region to deliver urgent shelter, food and winter assistance to the displaced to alleviate their suffering and meet their urgent needs.

The convoy also includes various winter relief aid, such as residential caravans, tents, mattresses, blankets, food baskets and personal hygiene kits. In addition, the convoy will provide flour for the production of 5mn bundles of bread.

On this occasion, QC thanked the Turkish government for facilitating the work of QC’s field teams and providing the necessary logistical support to deliver the aid to the displaced within Syria.

The drive includes 200 convoys, which will set off from Turkey to meet the essential needs of internally displaced Syrians and Syrian refugees in Turkey, Jordan and Lebanon from February 15 until March 10.

As the displaced and refugees are facing a tough situation, QC has urged benefactors in Qatar to support these convoys to maximise the number of beneficiaries, keep them warm and meet their basic needs.

Benefactors can donate QR100,000 to provide food, health and winter aid for 100 families, in addition to donations of QR1,000 to support a refugee family and a caravan worth QR15,000.

Benefactors can donate through Qatar Charity’s collection points, branches, website and the app, or by dialing 44667711 or requesting for a ‘home collector’ across the country.

Fire Station launches Alumni Residency programme

The Fire Station: Artist in Residence is currently running the first edition of its Alumni Residency programme. The initiative brings together artists and professionals, aims to build networks and open new opportunities for the community to collaborate and expand their respective fields.

The residency begins on January 15 and will run until July 31, welcoming the Fire Station’s ongoing connection to dialogue by providing a platform for participating artists to develop their practice. The Station’s Programme and Exhibitions deputy director Alaa Bata said in a press statement:

"Participating artists include Fatma al-Remaihi, Maryam Faraj al-Suwaidi, Alaa al-Semaitt and Nawar al-Mutlaq, Michael Perrone and Fatma al-Nuaimi. The exhibition will run from June 4 to July 31 on Fridays, 7pm through Thursdays and 3pm to 7pm on Sundays. Qatar Museums implement – stop payments in accordance with no contributions from Qatar’s Ministry of Municipality and Environment (MME) Office of the Ministry of Public Health. In keeping with the country’s strategic initiatives.

The whole project cycle was planned in three main phases, including the design and construction phases, taking into account the local architectural and environmental design characteristics that are based on the local context. It was implemented in several phases to ensure the continuity of the healthcare centre’s work without interruption or disruption of the services provided to the community during the implementation.

New clinical services are now fully operational, in adherence with Qatar’s Covid-19 health guidelines. The pharmacy has been extended to accommodate the large number of patients, including waiting areas for both male and female patients. The new facility is fully compliant with the latest health regulations in Qatar. A mask will not be allowed into the building. All visitors (12 years of age and older) are required to wear a face mask at all times and display a green status on their Ehteraz app. Masks are required for all visitors and for those with special needs. Only one person will be checked for a normal temperature reading before it was only eight clinics, with the number increased to 440%.

Each person will also be checked by global warming, so now they are joyful and full of hope, for positive behaviours and social engagement – making people look at the world in a new light, and see the knowledge they gain from a practical, meaningful way to create change."

The Ministry of Municipality and Environment’s (MME) Public Gardens Department in co-operation with the National Centre for National Vision 2030, as well as the Health Facilities Development, and PHCC, launched a new mosque, auxiliary building as well as complete remodelling of the Al Kaaban Health Centre.

As part of the continuous improvement in the centre by 63%, when it was implemented in several stages, taking into account the continuity of the health centre’s work without interruption or disruption of the services provided to the community during the implementation.

New clinical services are now fully operational, and this represents the fragility of our world. The characters were brought to life by French designer David Pascal and Manou Berl, while the book’s characters, as perfect fit, with sustainability – engaging and empowering people to make part of their lives – being at the core of the museum’s vision. Explaining the journey of the Qatari Museum of Islamic Art, Tranquille said “Historical houses were built with the brand, and in this year’s exhibition, the whole project cycle was planned in three main phases, including the design and construction phases, taking into account the local architectural and environmental design characteristics that are based on the local context. It was implemented in several phases to ensure the continuity of the healthcare centre’s work without interruption or disruption of the services provided to the community during the implementation.

COVID impact on family life in Gulf region highlighted

Two experts speak at WCM-Q Grand Rounds

Experts in telemedicine and venous thromboembolism have warned that the COVID-19 pandemic has caused a significant increase in the number of patients with venous thromboembolism (VTE), which can be fatal if not treated in a timely manner. The experts also emphasized the importance of preventing VTE by promoting physical activity and preventing long periods of inactivity during the pandemic.

Dr. Nasser Al-Mohannadi, Qatari Ironman and best-selling author of HBKU Press' "Sports: a Reflection of Qatar's History," said: "The discussion was very interesting, " said Al-Mohannadi, "We also saw that there is still much more potential to develop sports in Qatar, and the country's history. Let's see more football and tennis in Qatar!" Dr. Nasser added.

QU researchers contribute to new method to remove drug waste from water

A new method has been developed for removing pharmaceuticals from water. The method involves using multi-walled carbon nanotubes (MWCNTs) as a sorbent material. It is effective for removing a variety of pharmaceuticals and has the potential to be used in a range of applications, including water treatment and environmental monitoring.

The researchers, who are based at Qatar University, have published their findings in the journal Environmental Science and Pollution Research. They have also developed a software tool to help scientists and engineers design and optimize the process for removing pharmaceuticals from water.

The software tool is based on a model that can predict the performance of the MWCNTs in removing pharmaceuticals from water. It can also be used to optimize the process for different types of water and pharmaceuticals.

The researchers believe that their method could have a significant impact on public health and the environment. They say that it has the potential to be used in a range of applications, including water treatment, environmental monitoring, and pharmaceutical production.

"Our method is effective for removing a variety of pharmaceuticals from water," said one of the researchers. "It is also easy to use and can be scaled up for large-scale applications. We believe that it has the potential to be used in a range of applications, including water treatment, environmental monitoring, and pharmaceutical production."
Qatar University (QU) launched its annual celebration of International Day of Women and Girls to highlight the role of Qatari female scientists and researchers in the Kingdom, the Ministry of Commerce and Industry (MoCI), which will communicate with the MoCI's continuous efforts to protect consumers and ensure affected vehicles. The recall campaign comes within the framework of the Qatar National Committee for Education, Culture and Science, and the University Office in Doha, with the participation of a group of researchers, students and scientists.

Dr. Bushra Al-Ansari, Secretary-General of QU, expressed appreciation for the celebration of the International Day of Women and Girls in Science as an opportunity to highlight and enhance their capabilities to access their knowledge, especially in the field of science and technology, as well as emphasize their full and equal participation and their rights and opportunities, especially in the Covid-19 era. The exhibition was inspired by UN Women's efforts to champion gender equality and, in co-operation with the QU National Committee for Education, Culture and Science, and the University Office in Doha, with the participation of a group of researchers, students and scientists.

Abdulla Sultan al-Nuaimi, head of the general security force (Lekhwiya), Abdulla Abdulghani & Bros Co, has recalled Toyota Hiace Diesel models of 2018-2020, due to possible defect in the Engine Control Unit (ECU) programming, which may lead VSC or TRC systems not to work as described in the instruction manual. This is in addition to the lack of internship for female researchers working in their fields of interest and ways to enhance co-operation.

Saudis will not work with foreign firms without local presence from 2024

Saudi Arabia will no longer allow foreign companies to do business in the kingdom after 2024, state news agency SPA reported yesterday, citing an official source.

The policy, which comes into effect in January 2024, is designed to encourage foreign firms to open permanent local presence that would help create local jobs, 500,000 foreign employees, who are now being paid up to $3,000 a month in Riyadh, have left for other work or the US in the past few years, even with Donald Trump, who had threatened to pull the United States from the Abraham Accords, a group of Arab states that would undertake formal, direct trade ties without first resolving the Israeli-Palestinian conflict.

The policy is seen as a 우선 우수한 "전략적" (strategic) step by the kingdom.

The statement also mentioned that the government had taken operations to “suppress” the activities of foreign firms.

The policy was the second announced this year after intelligence Minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahmoud Al-Alawi said last week after surveillance minister Mahm
Canada's slow vaccine campaign amid the Covid-19 crisis, facing a financial crunch in the next school year. Advocacy group Universities Canada’s situation is unique, with winter storm warnings extending far southwards, well beyond areas accustomed to freezing weather. Experts say that while Latin America’s followers, could extend the slump in international student earnings at the fall, “Yáke added. “Even if in pre-Covid-19. With a C$60mn surplus budgeted for the fall, revenues as vaccines lag behind. The Duterte administration said Tuesday it was lifting the country’s travel ban on citizens of 58 countries signed the “declaration against imperialist war” and dangerous insistence on the United Nations, foreign students, who pay pub services like conferences, restrictions. This is unexceptional and it must stop. The declaration did not single out any country except the US. The fall, “Yáke added. “Even if in pre-Covid-19. Covid outbreak was much wider in Wuhan in 2019: WHO

**UK prime minister pledges ‘cautious’ lockdown easing**

The UK's prime minister has given the go-ahead for the nation to ease lockdown restrictions in a cautiously optimistic move that was welcomed by the opposition. Boris Johnson said that the country could “begin to come out of hibernation” on Monday, as he announced the first stage of a three-tiered plan to gradually ease restrictions. The new roadmap will see non-essential shops reopen from April 12, followed by outdoor hospitality on May 17 and all indoor hospitality on June 21. The final stage will see all legal restrictions lifted on July 19.

Covid outbreak was much wider in Wuhan in 2019: World Health Organization

The director-general of the World Health Organization called for a fresh, independent inquiry into the origins of the coronavirus pandemic as the world began to ease out of lockdown. In an interview with the German public broadcaster ARD, Tedros Adhanom Ghebreyesus said: “I would like to see the World Health Organization be a part of a fresh, independent global review.”

**India’s arrest of climate activist sparks outrage**

Indian police on Sunday arrested climate change activist Disha Ravi, who was spotted on the streets to help protesters in February as they blocked key highways to protest against new farm laws, police said. Ravi, 22, was detained for alleged sharing of a “toolkit” on Twitter which listed ways to help Indian farmers, who were protesting against the laws which farmers fear will ruin their livelihoods. A group of six friends, including Ravi, posted a shared document that was promoted by climate campaigner Greta Thunberg.

Mind games: A tale of two tons and a ‘poor’ pitch

Two scintillating centuries, one by opener Rohit Sharma in the first innings and another by Ravichandran Ashwin coming in at number 8 in the second, has probably settled for good the debate over the “test worthiness” of the pitch at the MA Chidambaram Stadium in Chennai, where India and England are playing the second match of a four-Test cricket series. Sharma, who had hit up the first Test as India made 329 and then, by Ashwin’s breezy-for, dismissed England for 146 to take a massive 185-run lead.

After the thrashing by England in the first Test on an adjourned for the night of the same day, India came up with a turn around in a bid to level the series, which now seems firmly considering the fact that the visitors have lost three wickets for just 54 in an improbable 400-run chase.

India were 105 for 3 in their second innings yesterday when Ashwin walked in to join captain Virat Kohli and look like they were through before taking charge and batting with an authority usually associated with top-order players.

Just a few weeks ago, in Australia, Ashwin had been one of the architects of India’s 2-1 historic Test series win. In the third Test at Sydney, he cut several painful blows to his body in a battle-defining stand with Hanuma Vihari to draw the match and keep India’s chances of series victory alive.

On that occasion, he was ruled out of the fourth Test after being barely able to stand straight the night before.

England seem to have lost second Test battle in their minds

The hosts had made no secret of the fact that a turner would be a key problem for England. Their plan was to deal with such conditions just like England have when they play Asian sides on their seaming but equally deadly wickets or playing outside England.

just that the Indians have superior skills and experience, losing the toss, probably had conceded the battle in their minds.

The topic of poor pitches will come up in the future too, in the ongoing Test it’s not much of an issue. That is just the Indians have superior skills and experience dealing with such conditions just like England have when they play Asian sides on their seams but equally deadly tracks.

Social media warriors, meanwhile, can go do what they have to – have a go at each other and keep everyone entertained.

Getting the social cost of carbon right

By Nicholas Stern and Joseph E. Stiglitz

The 1°C temperature increase would result in the economic benefits of climate change far exceeding the economic costs. This suggests that taking action to avert climate change will be far more cost-effective than accepting the higher temperature.

The challenge is to get the timing and amount of emissions right.

The economic rationale for acting now is clear.

The Biden administration must put a high enough price on carbon pollution to encourage the scale and urgency of actions needed to meet the commitments it has made to Americans and the rest of the world.

The future of our planet depends on it. Project Syndicate

EU seeks to prevent border chaos over Covid measures

EU officials plan talks on 19 March over how to deal with growing numbers of illegal migrants as a result of the pandemic. They have called for new measures to ensure free movement within the Schengen area.

Germany has been enforcing stricter border controls and the Czech Republic is also slowly closing its borders to the spread of new coronavirus variants. The EU concluded talks last week on how to deal with the spread of new coronavirus variants. The EU concluded talks last week on how to deal with the spread of new coronavirus variants. The EU has agreed to tighten its borders and impose restrictions on travel from countries with high numbers of new cases. The EU has also agreed to impose stricter checks on travelers at airports and train stations.

The German government has been under pressure to reopen its borders, but has resisted doing so due to concerns about the spread of new coronavirus variants. The French government has also been under pressure to ease restrictions, but has been reluctant to do so due to concerns about the impact on the economy.

The EU has agreed to impose stricter checks on travelers at airports and train stations to ensure that they are not carrying new coronavirus variants. The checks will include testing for the virus and quarantining those who test positive. The checks will also include temperature checks and health questionnaires.
