C

Continuing to achieve impressive results, the second phase of the Qatar National Strategy for Conservation and Efficiency (QNR) has helped the country record more than $4 billion in savings for the year 2021, it was revealed by H.E. Sherida Al-Kaabi, the CEO of the Qatar General Water and Electricity Authority (Kahramaa).

The programme helped save roughly 5,000 GWh of electricity, more than 1,000m cubic metres of water, and an estimated 150m tonnes of CO2, it said. It also led to a reduction in emissions, amounting to about 1,150m tonnes of CO2 annually. The savings were achieved through the strict implementation of the programme and by ensuring that the programme’s objectives are strengthened during the third phase of the programme, which spans from April 2021 until 2030. The programme will continue to be applied on a massive scale, it said, adding that the programme will be implemented in workplaces, education, and healthcare sectors, and work to establish 1,000 electric charging stations in 2022. Also, energy efficiency will be enhanced while working on sustainable solutions to combat climate change and reducing carbon emissions,” she said.

She added that Kahramaa has worked to complete one of the last decades according to a plan that is aimed at achieving the goals set for energy efficiency and expanding the use of alternative energy in Qatar in line with Qatar National Vision 2030, the National Strategic Plan 2018–2022, the Qatar Energy Development and Climate Change Goal 2030, the Qatar National Energy Efficiency and Conservation Strategy Environment and Climate Change and the National Strategy 2018–2022, the Qatar National Energy Efficiency and Conservation Strategy Environment and Climate Change and the National Strategy 2018–2022.

Speaking about the completion of the programme’s second phase that ran from April 2021 to 2022, the CEO said that it was characterised by increasing the efficiency of electricity and water utilisation, optimising production management, improving environmental sustainability, increasing the efficiency of renewable resources, building nationalised communities and smart cities, and contributing to combating climate change.

She added that the programme’s goals were achieved and that the programme’s achievements are in line with the Sustainable Development Goals.

A Kahramaa press statement revealed that Kahramaa President and CEO, H.E. Essa bin Hilal al-Kuwari, noted that Tarsheed would continue to work to enhance the achievements for preparing and developing regulations and legislation related to energy optimisation and energy efficiency. “This will be achieved through adopting the latest technologies that are compatible with our environment and are fit for the Qatar’s stage of economic and smart Qatar. We will also contribute to the circular economy methodology and take advantage of all elements from energy efficiency in running the facilities, from agriculture, through the application of the solar panels, windmills, and solar energy, especially solar energy, to zero waste of water and electricity,” he said.

“Tarsheed is considered a key programme for reducing harmful carbon emissions, in order to reach the targets of Qatar, the climate action plan 2030, and to contribute into the social and economic growth of the country, and maintain a high level of well-being for all,” he added. (With inputs from QNA)

PM attends 10th anniversary of Tarsheed

M

ahmoud Al-Madid, the Prime Minister and Minister of Interior, attends a ceremony held in Tarsheed, the Qatar General Water and Electricity Authority (Kahramaa), to celebrate the 10th anniversary of Tarsheed, the Water Corp (Kahramaa) under the slogan “Towards Sustainability and Energy Efficiency”, the ceremony was attended by a number of ministers, members of the diplomatic corps and senior officials from various sectors.

Under the patronage of the Prime Minister and Minister of Interior, H.E. Abdullah bin Nasser Al-Qaabi, the ceremony was attended by a number of ministers, members of the diplomatic corps and senior officials from various sectors.

Ooredoo Group enhances customer experience with new ML fraud protection solutions

Ooredoo Group, a leading telecommunication company in the Middle East and North Africa, has enhanced its fraud protection solutions by launching a set of new services that utilise machine learning (ML) and artificial intelligence (AI) to protect its customers from fraud.

The new services include a fraud detection system that uses ML to identify patterns and anomalies in customer behaviour, enabling the company to quickly detect and respond to potential fraud incidents. The system also uses AI to learn from past incidents and improve its accuracy over time.

Additionally, Ooredoo has introduced a customer support system that utilises ML to understand customer queries and provide more accurate and helpful responses. This system is designed to reduce customer wait times and improve overall customer satisfaction.

The enhancements come as part of Ooredoo’s ongoing efforts to provide exceptional customer experience and protect its customers from fraud. The company has also invested in advanced technologies and strong security measures to ensure the protection of its customers’ data.

The new services are available for all Ooredoo customers in the region, and the company is committed to continuously improving its fraud protection solutions to provide the best possible experience for its customers.

July Calendar packed with Eid celebrations and live shows

Qatar Calendar’s Eid-July release is out, featuring more events exclusive to the month, with upcoming events such as the highly anticipated Katara Beach Festival, the Qatar National Day celebration, and the Qatar Airways Flight Show. Eid-July is the month of celebration in Qatar, with many traditional and modern festivities taking place throughout the week.

Katara Beach Festival

The Katara Beach Festival is one of the most anticipated events of the year, with a range of activities and entertainment for the whole family. This year, the festival will feature live performances, traditional foods, and cultural activities.

Qatar National Day celebration

Qatar’s National Day is celebrated on the 18th of July each year, marking the country’s independence from the Emirate of pear.

Qatar Airways Flight Show

Qatar Airways Flight Show is a unique event that takes place in the Qatar International Airport. Spectators can watch as Qatar Airways aircraft perform various aerobatic maneuvers and stunts.

Other events

The July Calendar also includes a variety of other events such as art exhibitions, cultural shows, and sports competitions.

Eid-July is a month of celebration, with many traditional and modern festivities taking place throughout the month.

Ticked events

Organised by Ahl Beirum Project Environ-
ment

Ahh Al-Wakrah: Al-Wakrah is a city located in the Umm Al-Qaiwain emirate of the United Arab Emirates. This year, Ahh Al-Wakrah will host a range of events celebrating the city’s history and culture.

Leopard Ball and the game Larp

The Leopard Ball is a unique event that takes place in the Lusail Multipurpose Hall. This year, the event will feature a range of activities, including a live performance by a renowned anime voice actor.

The game Larp is a popular event that takes place in the Hamad International Airport. This year, the event will feature a range of activities, including a live performance by a renowned anime voice actor.

Ticket sales

Tickets for all events are available online at the websites of the respective event organisers.

Wanna attend the biggest event of the year? Check out our July Calendar and plan your month in advance. Don’t forget to make the most of Eid-July and enjoy the many events happening throughout the month.
Qatar's Consul General in Jeddah, Rashid bin Saeed al-Khayarin, inaugurated on Saturday the medical unit of the Qatari Haj Mission in Saudi Arabia, including a unique rescue jacket for Qatari pilgrims.

The Bali Rescue Jacket is a mobile ambulance vehicle which contains all medical devices that an ambulance vehicle contains for a patient who is on a stretcher. It is small and lightweight (6 kg) which can be worn easily, allowing the wearer to keep moving around, even on stairs.

He said the medical unit has three paramedic jackets which equal three ambulances. The Bali Rescue Jacket is equipped with all the necessary medical devices for a patient who is on a stretcher, including oximeter, blood pressure monitor, glucose meter, asthma inhaler, electrocardiogram EKG, automated external defibrillator, ventilator, and a small size CO2 detector. In addition, the jacket contains multiple primary medical devices for wounds and injuries and others.

The medical unit of the Qatari Haj Mission in Saudi Arabia includes distinguished competencies of doctors, nurses and pharmacists, to provide the best health services and necessary first aid, according to the highest standards.

The medical unit includes distinguished competencies of doctors, nurses and pharmacists, and it is responsible for providing all medical services and healthcare, and to create all means that facilitate performing of the Haj rituals. He explained that the Qatari consulate in Jeddah is co-operating with the Saudi Arabian health authorities, to fulfill the standards and conditions required for accreditation and included all the required equipment such as clinics, pharmacy, waiting rooms, isolation rooms, patient rooms, clinics and an emergency department at all sites and camps for Haj pilgrims.

The Qatari Haj Mission includes all the required equipment and services to the country's pilgrims, and it received the second batch of the country's pilgrims upon their arrival at King Abdulaziz International Airport in Jeddah.

The Qatari Haj Mission works continuously around the clock to facilitate the pilgrims in performing the Haj rituals smoothly.

The mission provides guidance and awareness services, first-aid, health advice, and the procedures required to ensure the safety of pilgrims through the unified call and support centre to serve the pilgrims of Qatar, which provides assistance and support, and responds to all pilgrims' inquiries through the specialized units and the free hotline (132). It also allows all pilgrims who hold (Qatari or Saudi) phone cards to communicate free of charge with the mission from inside the Kingdom via the number 8003040444.

All Qatari pilgrims set to arrive in Saudi Arabia on Sunday.

Qatar Charity (QC) signed a co-operation agreement with Naseem Medical Centre, which will enable the organisation to continue its work to develop social responsibility programmes. The signing of the agreement comes in light of Qatar Charity's commitment and dedication to provide support and assistance to local target groups within Qatar's society, and facilitate continuous contributions to supporting humanitarian work, as a daily routine activity, a press release noted.

Under the terms of the agreement, Naseem Medical Centre enjoys the advantages of a humanitarian partner of Qatar Charity, it has the chance to cooperate with the social programmes and projects implemented by QC for the benefit of the target groups within the society. Qatar Charity was represented in signing the agreement by Ahmad Youssef Fakhro, assistant general director, while Naseem Medical Centre was represented by Dr. Faleh Alkhalaf, general director. Fakhro said: "Rahalah's participation in the Humanitarian Partnership programme and the signing of the agreement with it confirm our keenness to develop the community partnership system, alongside providing support and contributing to the development of charitable projects in the country. In addition, Qatar Charity aims to maintain and develop all activities and initiatives that are serving the national vision of the state."

In his side, Alkhalaf said: "It is necessary to support social responsibility and its significance in achieving sustainable development to contribute to raising the standard of people's lives. Adding that, it is evident that such support is crucial for Naseem Medical Centre, which operates in the medical field and is keen in continuing to develop the community and serve the local community in particular and the nation in it. We are a company that enjoys the spirit of responsibility and citizenship. This interest is seeking for support from national values to build a better sustainable society, which is a special label awarded by Qatar Charity to organisations and institutions in the humanitar-
Eid Mubarak
We extend our heartiest greetings to

His Highness
Sheikh Tamim Bin Hamad Al Thani
Amir of the State of Qatar

His Highness
Sheikh Hamad Bin Khalifa Al Thani
Father Amir

His Highness
Sheikh Abdullah Bin Hamad Al Thani
Deputy Amir

and to all the honorable people of Qatar on the occasion of

Eid Al Adha

We hope for more returns of this memorable occasion and wish that Qatar always enjoys security, welfare and prosperity under the wise leadership of His Highness The Amir.

Helpline for Alzheimer’s patients, carers handles over 5,000 interactions

QRDI Council to host webinar on ‘Global Competition for Innovation Talent’ on July 6

Ooredoo launches new roaming service for stress-free summer travel

Qatar Research, Development and Innovation Council (QRDI) will bring together four prominent entrepreneurs in a webinar titled ‘Global Competition for Innovation Talent’, taking place at 4pm on July 6, 2022.

The panellists include Dr Khalid Mal Ali, co-founder and CEO of Else Labs Inc, Melis Abacioglu, founder and CEO of Bluecore, and Melis Abacioglu, co-founder and CEO of Else Labs Inc.

The webinar will be part of a global competition to attract highly skilled workers, and joint efforts to modernise and develop policies to attract ‘High Talent and Innovative Entrepreneurs’.

The webinars are part of QRDI Council to host webinar on ‘Global Competition for Innovation Talent’ on July 6.

Ooredoo launches new roaming service for stress-free summer travel

Ooredoo announced a new roaming service for customers this summer. Ooredoo’s new roaming service lets customers use their local plan allowances in more than 100 countries across Europe, Asia, the Middle East and Africa, has launched its new roaming service in Europe, Asia, the Middle East and Africa, has launched its new roaming service in Europe.

Customers can simply subscribe to the Roam Like Home service via the Ooredoo app when they sign up. We wish everyone safe and happy travels this summer.

The National Alzheimer’s and Memory Services helpline, known as RAHA, celebrated its second anniversary in May this year. The service has developed over the past two years into an invaluable resource for families caring for someone who has memory loss or cognitive decline as a result of a major illness or Alzheimer’s disease.

The helpline was launched in May 2020 as part of a strategic commitment to improve the care of people with dementia and their families. It is funded under the Long-Term Care of Hamad Medical Corporation (HMC), explained the need for this service: “Memory loss and dementia, particularly Alzheimer’s disease, are among the most common forms of dementia, can be hugely challenging for the individual experiencing associated symptoms and for their carers, including family members.”

Dr Hanadi Al Hamad, chief of the Department of Geriatrics and Ageing for Qatar’s Ministry of Public Health (Natio- nal Alzheimer’s and Memory Services therapy in the Middle East and Africa), explained the need for this service: “Alzheimer’s disease is extremely important for families. Access to knowledgeable, professional and compassionate care is very important for people with dementia and their carers, who are often family members. We want to reassure them that they are not alone in this journey,” said Dr Pravija Manikoth, consultant geriatrician.

The RAHA service has been a real boon for many people, especially during the Covid-19 pandemic. From the time the helpline was established until now, the team has managed over 5,000 telephone interactions with patients and caregivers,” added Dr Al Hamad. It is critical to give family members and caregivers access to information and support to cope with the challenges of caring for a person with dementia, she added. The RAHA helpline was launched in May 2020 and continues to lead the digital banking and payment front through its related digital solutions and innovations for stress-free summer travel

LuLu Hypermarket hosts International Plastic Bag Free Day organised by Doha Municipality

By Peter Alagos

LuLu Hypermarket, D-Ring Road branch, yesterday hosted an awareness campaign for the International Plastic Bag Free Day. Doha Municipality was also on the scene to mark the International Plastic Bag Free Day.

LuLu Group distributed free reusable bags and promoted them in all its outlets as a part of its ongoing efforts to reduce the amount of plastic in the system. Reusable bags are being offered to shoppers in an attempt to educate people about the importance of protecting the environment by reducing the use of plastic bags.

The event was attended by senior officials from the municipality, including Ali al-Qahtani, director of the Food Control Section. Many dignitaries, including Dr Mohamed Althaf, director of the LuLu Group for the last two decades, as well as other dignitaries, including Dr Ahmed al-Deghan, director of the Food Control Section, and Minister of Municipality Development, were present.

The event was held within the framework of the Ministry of Municipality Development’s efforts to encourage customers on waste segregation. Three compartment bins are placed in all general areas to encourage customers on waste segregation.

Officials from LuLu and Doha Municipality cut the ceremonial cake.

Ashghal completes work on 11km drainage network

The Public Works Authority (Ashghal) has completed work on a 11km foul sewer network in a number of areas in Wadi Al Banat, Al Ebb, and Lusail.

This newly constructed network is part of the final sewer foul network in these areas, where 35 deep shafts have been installed to connect the new foul sewer lines to the existing drainage networks in Wadi Al Banat, Al Ebb, and Lusail.

He said the project faced some challenges, including an aerial urban growth, as it collects the sewage of other existing projects in the area. The project serves several areas witnessing a significant urban growth, as it collects the sewage of other existing projects in the area.

He said the project came as part of Ashghal’s commitment to solve sewage-related issues in these areas by installing 6.5km of micro-tunnelling works, including the high level of groundwater flows to the main treatment plant in the area, and employing tools to ensure workers’ safety and efficiency.

In addition, 11km excavation works for the foul sewer network required using safety measures by increasing safety measures in deep sewer as well as increasing the number of workers and machines to accelerate the progress of works. The micro-tunnelling technique was also employed as part of the works, which is a technique that is not visible to the public to maintain traffic and minimize the impact on residents and ensure fast implementation.

Flagship POCO F4, POCO X4 GT debut with ‘powerhouse’ chips

POCO, a popular technology brand among the young and tech-savvy, has announced the launch of POCO X4 GT in Qatar with collaborative efforts with Qualcomm. Trimmed with Snapdragon 8100 chipset, this high-end phone is the latest device with ‘best-in-classes’ chips that deliver powerful performance while retaining a cost-effective price statement.

"Our customers trust us to deliver the power of technology that will make a major contribution and provide entertainment benefits to our customers," said Ashghal's General Manager, Nasser Al-Shahlin, who managed the Roads Projects Department, adding that this newly constructed network is a big achievement, as it collects the sewage of other existing projects in the area. "It will also improve the quality of life as well as health and environmental conditions in the area," said Mr. Al-Shahlin. The project has a total of 150 shafts and 4km of foul sewer lines, in addition to 14km of fresh water networks.

Al-Shahlin added that the project comes as part of Ashghal’s commitment to solve sewer-related issues in these areas by providing a deep sewer network encased via micro-tunneling technique to transfer sewage flows from the areas, which are located within the existing main trunk lines.

The project faced some challenges, including the high level of groundwater, which required using pumps to drain the area before starting construction works.

POCO X4 GT comes with a Snapdragon 8100 chipset, giving users best-in-class 5G performance speedster opti- mized for efficient and smoother performance in all aspects of gaming and entertainment.

POCO X4 GT is equipped with an 8MP ultra-wide camera, 64MP main camera, and 2MP macro camera setup featuring the first-ever 12MP Ultra Wide Angle Camera with 92° field of view. The main camera is an AI-powered 64MP high-quality prime sensor and has an 87-degree field of view.

POCO X4 GT is an affordable performance powerhouse optimized for smooth performance in all aspects of gaming and entertainment. POCO X4 GT is equipped with a Snapdragon 8100 chipset, giving users best-in-class 5G performance speedster opti- mized for efficient and smoother performance in all aspects of gaming and entertainment.

Introducing these powerful chips will make a major contribution and provide entertainment benefits to our customers," said Ashghal's General Manager, Nasser Al-Shahlin, who managed the Roads Projects Department, adding that this newly constructed network is a big achievement, as it collects the sewage of other existing projects in the area. MoPH holds workshop on dietary guidelines

The Ministry of Public Health (MoPH), Qatar, holds a workshop for its specialists in the fields of nutrition and physical activity. The workshop was part of the Qatar Dietary Guidelines (QDG), which are launched in 2015 to support and promote healthy lifestyles.

The workshop featured numerous lectures and practical activities to support the MoPH specialists in the fields of nutrition and physical activity.

The Qatar Dietary Guidelines serve as a tool to promote healthy dietary habits and eating patterns in Qatar. They are based on recommendations made in light of the nutritional needs of Qataris and are intended to promote healthy eating habits among all age groups, to maintain a healthy weight, to ensure the safety and cleanliness of food preparation methods, healthy eating, and maintaining the environment and as well as caring for the family.

The workshop was attended by around 500 participants, including staff, students, nurses, and dietitians.

A summary on the workshop is as follows:

- Practice the new knowledge
- Apply their knowledge and
- Promote their health

The Ministry holds awareness activities to mark International Plastic Bag Free Day

F ords of anti-coup protesters in Sudan defy security forces

T he Qatari Calendar House announced that the earth reached its farthest point from the sun today, which falls on July 3 every year. The event, marked by the calendar house, the Qatar Calendar House, Qatar Museum, and Qatar Foundation. The House noted that the distance between the earth and the sun at this time is about 5,358,120 km, which is the farthest distance from the sun. The event is known as the aphelion point, which is the point in the earth's orbit when it is farthest from the sun. This event is one of the astronomical phenomena that occurs during the year, and it is an important point in the study of the earth's orbit and its effects on the climate and weather. The event is also used as a reference point in the study of the earth's orbit and its effects on the climate and weather. The event is also used as a reference point in the study of the earth's orbit and its effects on the climate and weather.
**Reliance and Britain’s Pret bet on India’s changing tastes**

B  Briton said that Pret is well suited to the Indian market because of its focus on food, such as spiced paneer. Mehta added that it was also looking at 3%-4% of the Indian market. "We are looking at 35%-45% of India’s population, it is right in the middle of our strategy," he said.

"I think the situation is stabilizing. India is opening up," the government spokesperson said. "We are looking at the opportunity for additional trade and investments." He added that the situation in India was improving, "though we need to be cautious and monitor the situation closely."
Snap ballot likely in Greece ahead of tough winter

Each time Greek Prime Minister Kyriakos Mitsotakis faces the media these days, he seems to announce that the next elections will be before the end of the year.

The conservative premier has been power since July 2019 and is due to serve a 4-year term. But as the war in Ukraine and the energy crisis stunt growth in the economy, he faces pressure to hold an early vote.

But while the prime minister’s party has been garnering widespread praise, the opposition Syriza, led by Alexis Tsipras, has been gaining ground in recent months.

While Tsipras, who preceded Mitsotakis as premier from 2015-2019, has faced criticism for his handling of the pandemic and economic reforms, he has been able to portray his opponent as out of touch with the country’s problems.

Tsipras said this week he expected an election in September.

Many analysts believe a snap ballot is likely in the autumn, with Tsipras hoping to take advantage of the war in Ukraine and soaring gas prices to secure another term in office.

So far, increased visitor traffic from Europe and the United States points to a brightening tourism outlook, with the government hoping to replenish state coffers with tourism revenue.

Another €6.5bn have been set aside for energy and fuel benefits in 2022. The government hopes the expanded rebate and reduced VAT rate will help poorer households.

At a time of major uncertainty over soaring costs, the war in Ukraine and the energy crisis, many Greeks are likely to be deeply affected by the result of the upcoming elections.

Mitsotakis remains the country’s choice for prime minister over Tsipras, but the last general election was held in 2019, and many analysts believe that elections or a reshuffle aren’t going to be defined by a single issue, but by a range of factors including the pandemic, the economy, and the war in Ukraine.

Gulf Times

Russia’s invasion of Ukraine has exposed gaps in society-wide understanding of geopolitical risks and human rights.

Before Moscow sent troops into Ukraine on February 24, Sberbank, a Moscow-backed bank already the target of international sanctions, enjoyed higher ratings for environmental, social and governance (ESG) risks than some other Russian firms and state-connected businesses, including Gazprom and Rosneft.

MSCI and FTSE Russell improved their ESG scores for Russia’s largest lender last year as Moscow’s hard line on Ukraine continued to cloud political and business and lending from abroad.3

Last week, the market debut of a Russian-linked hybrid bond issued by the Russian Direct Investment Fund (RDIF) and subscribed by the American investment bank Jefferies Group, was held across 75 ESG labelled US indexes.

“Part of our strategy is to give exposure to countries despite their sometimes poor human rights records,” said Julie Cane, CEO of Democracy Funds, the fund that invested in Russia.

MSCI said it regularly reviewed its ESG methodology for affected companies in Russia, Ukraine and other countries.

The fund reduces the weighting of firms that exclude or are suspending their scores on Sberbank to an “A” rating from “BB, ” the lowest possible rating.

“T o suggest that investors were more aware of autocracy risk in Russia than before, and that this freedom within a leading indicator,” Tolle said.

Moscow calls its invasion a “special military operation” to protect Russian speakers from Ukrainian nationalism and to stop what it calls Moscow’s “impressive progress” on ESG.

Sberbank said in a statement that the U-turns have sparked calls from some investors for an overhaul of how ESG ratings are assessed.

To be sure, most ESG-focused funds have little or no exposure to Russia.

A spokesperson for S&P said it had little or no exposure to Russia.

Several killed, hurt in mall shooting 22-year-old Dane held; ‘act of terror’ not ruled out

Terror claimed yesterday to have captured the strategic city of Lugansk and the entire frontline Donbas region as a mayor said fighting was ongoing in the city. Russia accused Ukraine of holding on to two cities that Russia claims its forces had surrounded, while the Ukrainian president said Russian troops had been "neutralised" and that their aura was "completely surrounded." A few minutes prior to the announcement, which AIP did not verify, a spokesman for the Russian defence ministry denied that the capitals of both Lugansk and Donetsk had been "neutralised" and that Ukrainian troops were "completely surrounded." A spokesman for the Lugansk regional government said Russian forces had been "neutralised" and that the city was "completely surrounded." A spokesman for the Donetsk regional government said Russian forces had been "neutralised" and that the city was "completely surrounded." The multi-storey shopping mall was attacked by a small group of patients for medical treatment, a spokesman said, and four officers were injured when shots were fired. Police had urged people in the mall's exit as the first shots were fired. Ukrainian President Volodymyr Zelensky said today that Russian forces had been "neutralised" and that the city was "completely surrounded." Tarsheed turns 10

By Shokhali AlNaqsh

Tarsheed 10, a prestigious annual competition, has been successfully held in Qatar for 10 years. It is designed to recognize and celebrate the achievements of students in various fields, especially in the fields of sustainability and environmental awareness. The competition has been highly successful in raising awareness and promoting sustainable practices among students.

The event was opened by HE the Minister of Municipality Dr. Abdullah bin Abdulaziz Al-Thani. During his speech, he highlighted the importance of sustainability and environmental protection. He encouraged students to continue their efforts in promoting these values in their daily lives.

The competition has been organized by the Qatar General Electricity and Water Corporation (Kahramaa), which is a significant contributor to Qatar’s economic growth. Kahramaa has been instrumental in promoting sustainability and environmental protection, and the Tarsheed competition has played a key role in this.

The competition has been widely supported by various stakeholders, including the Qatar University, the Qatar Academy of Education and Business, and the Qatar General Authority for Labour and Social Affairs. These partnerships have been crucial in making the competition a success.

The Tarsheed competition has been a platform for students to showcase their creativity and dedication to sustainability. The competition has been highly competitive, with students from various universities participating. The winners of the competition have been awarded certificates and prizes, which have motivated them to continue their efforts.

The Tarsheed competition has been highly successful in raising awareness and promoting sustainability and environmental protection. The event has been a significant contribution to Qatar’s efforts in achieving its Vision 2030. The competition has been a testament to the country’s commitment to sustainability, and it is hoped that it will continue to inspire students to continue their efforts in promoting these values.
